Introduction

The World Class Brand 2-3

Cylinders & Lifting Products 4 - 67

Introduction & Overview 4 - 5
RC-Series, Single-Acting, General Purpose Cylinders.. 6 - 9
A, CAT, JBI, RB, RE-Series, Cylinder Accessories 10
RA-Series, Aluminium Cylinders, Introduction 11
RAC-Series, Single-Acting, Aluminium Cylinders 12 - 13
RACL-Series, Single-Acting,
Aluminium Lock Nut Cylinders..... 14 - 15
RACH-Series, Single-Acting,
Aluminium Hollow Plunger Cylinders..... 16 - 17
RAR-Series, Double-Acting,
Aluminium Cylinders 18 - 19
RT-Series, Telescopic Cylinders 20 - 21
RSM, RCS-Series, Single-Acting,
Flat-Jac® and Low Height Cylinders..... 22 - 23
CULP-Series, Ultra-Flat Cylinders 24
CUSP-Series, Ultra-Flat Cylinders, with Stop Ring..... 25
LPL-Series, Single-Acting,
Low Height High Tonnage Lock Nut Cylinders..... 26 - 27
BRC, BRP-Series, Single-Acting, Pull Cylinders..... 28 - 29
RCH-Series, Single-Acting,
Hollow Plunger Cylinders..... 30 - 31
RRH-Series, Double-Acting,
Hollow Plunger Cylinders..... 32 - 33
BRD-Series, Double-Acting,
Precision Production Cylinders 34 - 35
RR-Series, Double-Acting,
Long Stroke Cylinders 36 - 39
High Tonnage Cylinders,
Introduction & Quick Selection..... 40 - 43
HCG-Series, Single-Acting,
High Tonnage Cylinders..... 42 - 47
HCR-Series, Double-Acting,
High Tonnage Cylinders..... 42 - 43, 48 - 51
HCL-Series, Single-Acting,
High Tonnage Lock Nut Cylinders..... 42 - 43, 52 - 55
SC-Series, Cylinder-Pump Sets 56 - 57
P, RC, V-Series, Extreme Environment Products..... 58
SC, SL, SR, SW-Series, Hydraulic Toolbox 59
JH, JHA-Series, Aluminium and Steel Jacks 60
GBJ-Series, Steel Bottle Jacks 61
PR-Series, POW'R-RISER® Mobile Lifting Jacks 62 - 63
PL-Series, POW'R-LOCK® Mobile Lifting Systems .. 64 - 65
Custom Hydraulic Cylinders & Pumps 66 - 67

Pumps & Directional Control Valves 68 - 119

Introduction & Overview 68 - 69
P-Series, Lightweight Hand Pumps 70 - 71
P-Series, Steel Hand Pumps 72 - 73
P-Series, Low Pressure Hand Pumps 74 - 75
MP-Series, Multifluid Hand Pumps 76
P-Series, Foot Pump 77
P, 11-Series, Ultra-High Pressure Hand Pumps 78 - 79
XC-Series, Cordless Hydraulic Pumps 80 - 81
PU-Series, Economy Electric Pumps 82 - 83
PE-Series, Submerged Electric Pumps 84 - 87
Z-Class Power Pumps, Introduction & Overview 88 - 89
ZU4-Series, Portable Electric Pumps 90 - 95
ZE-Series, Electric Pumps 96 - 101
PE8000-Series, Electric Pumps 102 - 103
PA-Series, Air Hydraulic Foot Pumps 104
PAM-Series, Air Hydraulic Pumps 105
PATG-Series, Turbo II, Air Hydraulic Pumps 106 - 107
XA-Series, Air Driven Foot Pumps 108 - 109
ZA4-Series, Modular Air Hydraulic Pumps 110 - 111
ZG-Series, Gasoline Hydraulic Pumps 112 - 113
EGM8000-Series, Gasoline Hydraulic Pumps 114

Directional Control Valves 115 - 119

Introduction & Overview 115
VM, VE-Series, Pump Mounted Valves 116 - 117
VC-Series, Remote Mounted Valves 118
VC, VM, VE-Series, Valve Dimensions 119

System Components & Control Valves 120 - 137

Introduction & Overview 120 - 121
H700, H900-Series, High Pressure Hoses 122 - 123
A, C, F, T-Series, Hydraulic Couplers 124 - 125
HF, LX-Series, Hydraulic Oil..... 126
A, AM-Series, Manifolds 126
FZ, BFZ, XSC-Series, Fittings 127
GF, GP-Series, Force & Pressure Gauges 128 - 129
G, H-Series, Pressure Gauges 130 - 131
T-Series, Test System Gauges 132
DGR-Series, Digital Pressure Gauge 133
GA45-Series, Gauge Adaptor Assembly 134
GA, NV, V-Series, Gauge Accessories 135
V-Series, Pressure and Flow Control Valves 136 - 137

Hydraulic Presses 138 - 149

Introduction & Overview 138 - 139
IP, VLP-Series, H-Frame Presses 140 - 143
IPR-Series, Roll-Frame Presses 144 - 145
A-Series, Arbor, Bench and C-Clamp Presses 146 - 147
Press Accessories & Custom Made Presses 148
TM-Series, Tension Meter 149
LH-Series, Load Cells 149

Pullers 150 - 169

Introduction & Overview 150 - 151
BHP-Series, Master Puller Sets 152
BHP-Series, Grip Puller Sets 153
BHP-Series, Cross Bearing Puller Sets 154, 161
BHP-Series, Bearing Cup Pullers
and Bearing Separators 155
SGM-Series, Mechanical Sync Grip Pullers 156 - 158
SGH, GPS, MPS-Series,
Hydraulic Sync Grip Pullers 156 - 160
EP-Series, Posi Lock® Mechanical Grip Pullers ... 162 - 165
EPH-Series, Posi Lock® 10 - 50 ton
Hydraulic Pullers and Accessories 166 - 168
EPH-Series, Posi Lock®
100 Ton Hydraulic Grip Pullers 169

Tools 170 - 189

Introduction & Overview 170 - 171
MS-Series, Maintenance Sets 172 - 175
SP-Series, Lightweight 35 ton Hydraulic Punch ..176 - 177
SP-Series, 50 ton Double-Acting Punch 178 - 179
LW-Series, Hydraulic Vertical Lifting Wedge 180
SOH-Series, Hydraulic Machine Lifts 181
ER, EL-Series, Heavy Duty Load Skates 182 - 183
CM-Series, Industrial Storage Cases 184
A, WR-Series, Wedgie & Spread Cylinders 185
WHC, WHR-Series, Hydraulic Cutterheads 186
WMC-Series, Self-Contained Hydraulic Cutters 187
STB-Series, Pipe Bender Sets 188 - 189

Bolting Tools and Pumps 190 - 247

Introduction & Overview 190 - 191
E-Series, Manual Torque Multipliers 192 - 193
S-Series, Square Drive Torque Wrenches 194 - 196
RTE, SRS-Series, Accessories for S-Series 197
BSH-Series, Heavy-Duty Impact Sockets 198
Bolting Application Ideas 199

W-Series, Low Profile Hexagon Wrenches 200 - 213
W-SL-Series, Ultra-Slim Stepped Width,
Bi-Hexagonal Cassette Wrenches 210 - 211
WCR-Series, Roller Cassette Wrenches 212
WTE, WRP-Series, Accessories for W-Series 213
PTW-Series, Pneumatic Torque Wrenches..... 214 - 215
ETW-Series, Electric Torque Wrenches..... 216 - 217
Accessories for PTW and ETW-Series 218
Application Examples PTW and ETW-Series 219
Selection Matrix Wrench-Pump Combinations 220
PME, PMU-Series, Electric Torque Wrench Pumps 221
TQ-Series, Electric Torque Wrench Pumps 222 - 223
ZU4T-Series, Electric Wrench Pumps 224 - 227
ZE-Series, Electric Torque Wrench Pumps 228 - 229
ZA4T-Series, Air Driven Torque Wrench Pumps .. 230 - 233
GT-Series, Hydraulic Bolt Tensioners 234 - 235
ZUTP-Series, Electric Tensioning Pump, 1500 bar 236
HPT-Series, Tensioning Hand Pump, 1500 bar 237
HT, B-Series, Hoses and Couplers, 1500 bar 237
ATP-Series, Air Pump 1500 bar 238
NC-Series, Hydraulic Nut Splitters 239
NS-Series, Hydraulic Nut Splitters 240 - 241
FS-Series, Hydraulic Flange Spreaders 242
FSH, FSM-Series, Wedge Spreaders 243
ATM-Series, Flange Alignment Tools 244 - 245
FF-Series, QuickFace Mechanical
Pipe Flange Face Tool 246 - 247

Heavy Lifting Technology 248 - 272

Introduction & Overview 248 - 249
SFP-Series, Electric Split-Flow Pumps 250 - 251
EVOB-Series,
Basic Synchronous Lifting Systems 252 - 253
EVO-Series,
Standard Synchronous Lifting Systems 254 - 255
BLS-Series, Climbing Jacks 256 - 257
JS-Series, Jack-Up Systems 258 - 259
HSL-Series, Heavy Lifting Strand Jacks 260 - 261
SHS-Series, SyncHoist,
Synchronous Hoisting System 262 - 263
SHAS-Series, SyncHoist, Wireless Autonomous
Synchronous Hoisting System 264 - 265
SL, SBL, MBL-Series,
Telescopic Hydraulic Gantries 266 - 267
HSK, LH-Series, Skidding Systems 268 - 269
SPMT-Series, Self-Propelled Modular Transporter 270
Custom Heavy Lifting Solutions,
Experience & Expertise 271

The World Class Brand

A complete range of quality high pressure hydraulic tools, controlled force products and solutions for all industrial applications, with local availability and after sale service anywhere in the world.... this is what has made Enerpac the undisputed global market leader in high pressure hydraulics.

Across every continent, Enerpac's network of authorized distributors and service centers can reach even the most remote locations, supplying and servicing products that are designed to enhance productivity and performance, while making the workplace safer.

With over 150 sales specialists and a network of service and engineering support in 22 countries across the globe, Enerpac has become the product of choice in industries such as heavy lifting, manufacturing, construction, energy, oil & gas, shipbuilding, railroads, mining, and metals transformation.

Always at the leading edge of technology, Enerpac has continued to develop its range of time and cost-savings tools, utilizing modern engineered materials to improve productivity and minimize operator fatigue.

Enerpac's commitment to the continued development of quality high force tools ensures that the products you purchase are the best tools in the industry.

We will continue to lead the way in the development of quality high force tools for all industrial applications.

10 Reasons to Work with Enerpac

- Expert Design
- Highly Reliable
- Service Excellence
- Worldwide Experience
- Application Support
- Availability
- Quality
- Value
- Innovative Products
- Systems Solutions

Total Quality

Our products are tested to the most exacting standards. These high standards guarantee the quality, price and performance requirements of the markets we serve around the globe.

Global Network, Support and Service

Enerpac has an extensive network of authorized distributors and service centers located in more than 90 countries worldwide. You can rely on Enerpac for the products and technical support you need to get your job done, anywhere in the world.

Logistics Excellence

Enerpac's mission is to maintain service excellence in the ever-changing world of modern distribution. Providing our extensive range of products to our thousands of distributors worldwide demands a logistic expertise only a market leader can provide.

A Tradition of Innovation

Enerpac has a long history of finding new solutions to better meet the challenges of the industries we serve. We were the first to develop a composite hand pump and the first to offer a computerized lifting system. Our latest innovations include the next generation ultra-flat, low height and high tonnage cylinders, and telescopic cylinders with highest level of durability, the new XA-Series of air driven foot pumps, designed for less operator fatigue – with the unique XVARI® Technology, delivering variable oil flow and fine metering for precise control, a full range of aluminium cylinders with the strength of steel and the advantages of aluminium and the Z-Class series of power pumps ... pumps that were designed to run cooler, use less electricity and are easy to service.

We design and manufacture heavy lifting equipment. For more than 60 years, we've combined high pressure hydraulics and controls to deliver intelligent and innovative solutions that maintain the highest level of quality, reliability and safety.

ENERPAC 
POWERFUL SOLUTIONS. GLOBAL FORCE.

Enerpac hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application. Enerpac jacking cylinders fully comply to ASME B30.1 (except BRD-Series).

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO general purpose cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

Improved saddle retention

Hardened plunger saddle protects plunger end during all lifting operations. Easily removable for access to plunger mounting threads.

Thread protector

Protector is easily attached and removed with oily hands or whilst wearing gloves.

Easy assembly and disassembly

External access to fasteners requires only standard shop tools for simplified maintenance.

Heavy-Duty return spring

Pre-tensioned return spring improves retraction performance, reducing retraction times.

Unique GR2 Bearing System

GR2 design surrounds seal of longer stroke models for improved life and reduced bearing loads. Bearing surface area increases side-load resistance and significantly improves cylinder life.

Coupler Protector

Coupler Dust Cap has new shape and more pliable material for easy push-on/pull-off operation. Protector is easily attached and removed with oily hands or whilst wearing gloves.

Easy assembly and disassembly

External access to fasteners requires only standard shop tools for simplified maintenance.

Note: The cut-away drawing is representative of typical cylinder construction, and may not represent all cylinders in this section.

Cylinders and Lifting Products Section Overview

Capacity ¹⁾ ton (kN)	Stroke Range (mm)	Cylinder type and functions	Series	Page
5 - 95 (45 - 933)	16 - 362	General Purpose Cylinders, Single-Acting, Accessories: Saddles, Base Plates, Mounting Attachments	RC A, CAT, JBI, RE	6 ▶ 10 ▶

¹⁾ All ton values specified in this catalog are metric ton and are for cylinder class identification only. Please refer to the kN data for calculations.

RC-Series DUO, Single-Acting Cylinders

▼ From left to right: RC-506, RC-50, RC-2510, RC-154, RC-10010, RC-55, RC-1010

- **Unique GR2 Bearing Design, reduces wear, extending life**
- **Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models)**
- **Designed for use in all positions**
- **High strength alloy steel for durability**
- **Redesigned cylinder thread protector for ease of use**
- **Heavy-duty, pretensioned spring improves retraction speed**
- **Baked enamel finish for increased corrosion resistance**
- **CR-400 coupler and dust cap included on all models**
- **Plunger wiper reduces contamination, extending cylinder life.**

▼ *Foundation repair: to re-stabilize the foundation, the 308 ton silo needed to be lifted, levelled and structurally supported. 25 ton RC-Series hydraulic jacks were attached to a bracket on the top of each steel pier. Powered by a Z-Class pump, the hydraulic jacks applied 20 ton of force at each placement to lift the silo 5,1 cm.*

The Industry Standard General Purpose Cylinder

Saddles

All RC cylinders (except RC-50, 101) are equipped with hardened removable grooved saddles.

For tilt and flat saddles, see the RC-Series accessory page.

Page: 10

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50 ton RC cylinders.

Page: 10

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25 ton RC cylinders.

Page: 174

▼ *Synchronous lifting set-up for 200 ton petrochemical process module using twelve RC-2510 cylinders. To ensure the stability of the cylinders JBI-25 base plates are installed.*

Single-Acting, General Purpose Cylinders

GR2 Bearing Technology

The exclusive GR2 is a unique bearing design on RC-Series DUO cylinders which absorbs eccentric load stresses to protect your cylinder against abrasion, over-extending or plunger blow-

outs and jamming or top-end mushrooming. As a result, RC-Series DUO cylinders provide long, trouble-free operation.

▼ QUICK SELECTION CHART

For complete technical information see next page.

* Available as set, see note on this page.

RC Series

Capacity:

5 - 95 ton

Stroke:

16 - 362 mm

Maximum Operating Pressure:

700 bar

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits. Good practice encourages using only 80% of these ratings.

Page: 274

Lightweight Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the RAC-Series are the perfect choice.

Page: 12

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment.

Refer to the System Components Section for a full range of gauges.

Page: 120

Cylinder-Pump Sets

All cylinders marked with an * are available as sets (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

The Enerpac Lightweight Aluminium Cylinders

▼ From left to right: RAC, RACL, RACH, RAR

- **Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio**
- **Non-corrosive by design, aluminium has always been a good material for use in many caustic environments**
- **Composite Bearings on all moving surfaces guarantee no metal-to-metal contact, to resist side loads and increase cylinder life.**

RA Series

Capacity:
20 - 150 ton

Stroke:
50 - 250 mm

Maximum Operating Pressure:
700 bar

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings.

Page: **274**

Aluminium versus Steel

Aluminium cylinders, while offering the most lightweight solution, also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminium cylinders should NOT be used in high-cycle applications such as production.

The Enerpac line of aluminium cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

Steel Base Plate

The steel base plate protects the cylinder from damage, it should not be removed.

The base holes in these aluminium cylinders are designed for securing the steel base plate. **They will not withstand the capacity of the cylinder.**

Do not use the base holes in these aluminium cylinders to attach any device to the cylinder.

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards.

◀ The unique Enerpac RA-Series cylinders – lightweight and made of aluminium alloy – these RAC-506 cylinders are ideal for the positioning of tunnel elements under the river. (High Speed Train Line, The Netherlands)

Lightweight for Maximum Portability

Saddles

All RAC-cylinders are equipped with bolt-on removable hardened steel saddles. For Tilt Saddles see next page.

RACL-Series, Aluminium Lock Nut Cylinders

▼ Shown from left to right: RACL-1006, RACL-504, RACL-5010

- Aluminium Lock Nut provides mechanical load holding for extended periods
- Hardened steel stop ring increasing cylinder life and resistance to side-loads of up to 5%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Composite bearings increase cylinder life and side load resistance
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on hollow removable saddles of hardened steel.

Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P-392 or P-802 make the optimal lightweight set.

Page: 70

- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and sideload resistance
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Floating center tube increases seal and product life
- Handles standard on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR-400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 and ISO 10100 standards.

RAR-Series, Double-Acting, Aluminium Cylinders

▼ Shown from left to right: RAR-5010, RAR-308, RAR-204

Saddles

All RAR-cylinders are equipped with bolt-on removable hardened steel saddles.
For Tilt Saddles see next page.

Page: 19

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 122

- Double-acting for rapid retraction, regardless of hose lengths or system losses
- Composite bearings increase cylinder life and sideload resistance
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- Built-in safety valve prevents accidental over-pressurization.

▼ RT-2111 Telescopic Cylinder (shown with plunger extended and retracted)

- Nitrocarburized surface treatment inside and out provides corrosion protection
- 3% side-load of full capacity
- Double or triple wear bearings support lifting stages
- Tilting saddles with 5 degrees of maximum tilt standard on all models
- Design Safety factor complies with ASME B30.1 & EN1494
- Lifting eyes for safe handling and positioning
- CR-400 coupler for compatibility with standard product
- Steel cylinder base for maximum strength.

Moving a load a greater distance

RT-Series, Multi-Stage Cylinders

Enerpac compact, multi-stage telescopic cylinders are available with two or three pistons, and can lift loads up to 600 mm in a single movement.

Nitrocarburized surface treatment inside and out provides unparalleled sideload resistance and corrosion protection for safe use in the harshest conditions. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

Tilt Saddles

All RT-Series cylinders include integral tilt saddles with maximum tilt angles up to 5 degree.

◀ *The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.*

Cylinder Capacity at Maximum Stroke ton (kN)	Maximum Stroke (mm)	Model Number	Collapsed Height (mm)	Extended Height (mm)

	600	RT-3323	476	1076

Multi-Stage Telescopic Cylinders, Single-Acting, Load Return

- 1 **Wiper Ring** on each stage to minimize contamination.
- 2 **Nitrocarburized Coating** for maximum corrosion protection and surface hardness. Exterior in nitrided and Enerpac yellow epoxy.
- 3 **Stop Ring** full load capable to prevent plunger overstroke.
- 4 **Wear Bearings.** Double or triple wear bearings for maximum sideload capability and wear resistance.
- 5 **Seals** for maximum compliance and high wear resistance.

RT Series

Capacity:

14 - 31 ton

Stroke:

270 - 600 mm

Maximum Operating Pressure:

700 bar

Multi-Stage Cylinders

1st Stage: maximum load capacity at lowest maximum stroke

2nd Stage: extended stroke but at lower maximum capacity than the 1st stage

Final Stage: maximum stroke extension but lowest maximum capacity.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac

hydraulic hoses.

▼ Shown from left to right: RSM-1000, RSM-300, RSM-50, RCS-1002, RCS-302

RSM-series, Flat-Jac® Cylinders

- Compact, flat design for use where most other cylinders will not fit
- Single-acting, spring return
- RSM-750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR-400 coupler and dust cap included on all models¹⁾
- Hard chrome plated high quality steel plungers
- Grooved plunger ends require no saddle.

RCS-series, Low Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Single-acting, spring return
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR-400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS-1002 for easy carrying
- Plated steel plungers.

Maximum Power-to-Height Ratio

Saddles

All RCS-Series cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: **23**

Low Clearance Lifting

The LW-16 Lifting Wedge and SOH-Series Machine Lifts are the perfect choice for lifting the first few millimeters.

Page: **180**

▼ Only a couple of centimeters will do for an RSM-cylinder to lift a large construction.

Cyl. Capacity	Stroke	Model Number	Cylinder Effective Area	Oil Capacity

¹⁾ Coupler AR630 including dustcap: Use HB7206 hose including AH630 coupler to connect to your pump.

CULP Series

Capacity:

10 - 50 ton

Stroke:

6 mm

Maximum Operating Pressure:

700 bar

IMPORTANT!

All Ultra-Flat Cylinders require a solid lifting surface for correct support. The use of these flat cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

WRONG!

Rough soil

RIGHT!

Flat lifting surface

For more safety instructions see our 'Yellow Pages'.

Page: **274**

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac

hydraulic hoses.

Page: **122**

- ▼ The Ultra-Flat cylinders are designed for applications where high lifting forces are required in confined spaces starting at 3,6 cm.

High Tonnage, Ultra-Flat Cylinders

▼ CUSP-Series, Ultra-Flat High Tonnage Cylinders, integrated tilting function.

- Up to 4% side load of maximum capacity
- Extremely low collapsed height
- Integrated tilting function up to 4 degrees to evenly distribute the load
- Nitrocarburized surface treatment for harsh conditions
- “Red Line” for visual maximum stroke limitation.

CUSP Series

Capacity:

10 - 1000 ton

Stroke Straight / Tilted Stroke:

7 - 17 mm / 6 - 10 mm

Integrated:

Tilting Function

Maximum Operating Pressure:

700 bar

IMPORTANT!

CUSP-Cylinders DO NOT have a Stop Ring for stroke limitation!

IMPORTANT!

All Ultra-Flat Cylinders require a solid lifting surface for correct support. The use of these flat cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

See instructions on page 24 or more safety instructions in our Yerlow Pages.

²⁾ Coupler CR400 including dustcap: Use HC-Series hose including CH604 coupler to connect to your pump.

LPL-Series, Low Height Lock Nut Cylinders

▼ LPL-Series, Low Height Lock Nut Cylinders

- Lock nut provide mechanical load holding for a safe work environment
- Integrated tilt saddle allows for up to 5 degrees of misalignment
- Extreme low height for use in confined areas
- Side-load resistance 5-10% of maximum capacity
- Overflow port as stroke limiter to prevent plunger blow-out
- Single-acting, gravity return.

▼ Only the extreme low height LPL-cylinder fits in this confined area to lift the construction. The lock nut provides positive and safe mechanical load holding over a long period of time.

Integrated Tilt Saddles

All LPL-Series cylinders include integral tilt saddles with maximum tilt angles up to 5°.

The Summit Edition

Innovation is at the heart of the new Summit Edition of cylinders, delivering the high quality construction that you expect from Enerpac. The durability ensures your job gets done safely and reliably.

- Replaceable plunger support bearing adds support for eccentric loads *
- Nitrocarburization surface treatment for improved load and wear resistance and corrosion protection
- Low wear, high pressure seals provide longer service life.

* Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side load. Increased bearing surface maintains stability and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

Single-Acting, Low Height Lock Nut Cylinders

IMPORTANT!

All LPL-Series cylinders require a solid lifting surface for correct support. The use of these cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

For more safety instructions see our 'Learning Center' on www.enerpac.com

LPL Series

Capacity:

60 - 500 ton

Stroke:

45 - 50 mm

Maximum Operating Pressure:

700 bar

Longer Stroke Lock Nut Cylinders

For longer stroke applications **HCL-Series** lock nut cylinders are the perfect choice.

Page: 52

Assisted Return Pumps

Enerpac HCG, HCL and LPL-Series cylinders are hydraulic advance and gravity return. To improve productivity and plunger retraction

Enerpac offers assisted return on ZU4 and ZE-Series pumps featuring Enerpac Venturi valve technology, specifically to facilitate the faster return of single-acting gravity and spring return cylinders.

89

Split-Flow Pumps

SFP-Series Pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points these pumps are a

far better alternative than using separately operated pumps.

- Hollow plunger design allows for both, pull and push forces
- Single-acting, spring return
- Nickel-plated, floating center tube on models over 20 ton increases product life
- Baked enamel finish for increased corrosion resistance
- Collar threads for easy fixturing
- RCH-120 includes AR-630 coupler and has 1/4" NPTF port
- RCH-121 and RCH-1211 have FZ-1630 reducer and AR-630 coupler, all other models feature CR-400 coupler.

▼ Hollow plunger cylinder RCH-1003 used in an application for intermediate boom suspension on a dragline.

Versatility in Testing, Maintenance and Tensioning Applications

Cylinder-Pump Sets

All cylinders marked with an * are available as sets (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

Page: 56

Ultra-Lightweight Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the lightweight RACH-Series are the perfect choice.

Page: 16

Saddles

Most RCH-Series cylinders are equipped with smooth saddles. See table at next page for optional threaded saddles and all dimensional information.

High Precision and High Cycle Performance

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 283

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life
- Imperial models (RD-series) available on request.

▼ Clamping application using Enerpac BRD cylinders (with clevis eye attachments on both ends) for their high pressure capability and mounting flexibility.

RR-Series, Double-Acting Cylinders

▼ Shown from left to right: RR-10013, RR-1502, RR-20013, RR-1010, RR-7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR-400 couplers and dust caps included on all models
- Plunger wiper reduces contamination, extending cylinder life.

▼ A lateral bridge slide method was utilized to slide the new bridge into position. Two RR-Series double acting hydraulic cylinders with ZU4-Series electric pumps were used to push the bridge into position over PTFE sliding elements.

Most Versatile Performers

RR-Series, Double-Acting Cylinders

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses.

Saddles

RR-Series cylinders up to 75 ton have plunger mounting holes for installation of CAT-Series tilt saddles.

Page: **37**

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with RR-Series cylinders.

Page: **88**

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 69

▼ QUICK SELECTION CHART

For complete technical information see next page.

Stroke:

57 - 1219 mm

Maximum Operating Pressure:

700 bar

Enerpac HCR-Series, High Tonnage Cylinders

If your application does not require high-cycle, Enerpac HCR-Series cylinders may be

the right alternative.

Page: 48

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: 283

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders:

Saddle Type	Cylinder Model Number	Saddle Model Number
Flat	RR-1010, 1012	A-102F
	RR-1010, 1012	CAT-10
Tilt	RR-308, 3014	CAT-50
	RR-506, 5013	CAT-100
	RR-5020, 756	
	RR-7513	

Standard Saddles:

Grooved	RR-1010, 1012	A-102G
	RR-308, 3014	A-252G

For additional information on saddles:

Page: 10

RR-Series, Double-Acting Cylinders

RR-1010 - RR-3014

RR-506 - RR-50048

RR-1006 - RR-30048

No mounting holes on:
RR-506, 5013
RR-756, 7513
RR-1502, 15013

RR-4006 - RR-50048

Base mounting hole location is for reference only, as it is affected by assembly.

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief valve pressure settings:

RR-308/3014: 275 bar
RR-506/5013/5020: 480 bar
RR-756/7513: 495 bar

◀ For full features see previous page.

▼ HCL-2006, HCG-2002, HCR-2006

Reaching the Summit Edition:

- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Low friction to easily spin the load locking rings ¹⁾
- State of the art bearing material provides maximum conformity to reduce wear and avoid bore damage even in high side-load conditions

Low wear, high pressure seals

- Improved geometry and material selection increases seal performance even in harsh conditions
- Low friction to improve retraction times

Versatile

- Over 200 models in 4 configurations ¹⁾
- Certified lifting eyes, base mounting holes and collar threads are included for secure handling and cylinder mounting ¹⁾

¹⁾ See specific models technical data for more information.

Highest Level of Durability

The Summit Edition

Innovation is at the heart of the new Summit Edition of cylinders, delivering the high quality construction that you expect from Enerpac. The durability ensures your job gets done safely and reliably.

- Plunger support bearing adds support for eccentric loads ²⁾
- Nitrocarburization surface treatment for improved wear resistance and corrosion protection
- Replaceable composite bearings surround the seal providing support for eccentric loads
- Low wear, high pressure seals provide longer service life.

²⁾ Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side-load. Increased bearing surface maintains stability and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

▼ Bridge lifting and launching system. The load is balanced on groups of lock nut cylinders. The hydraulic movements are synchronised using the Enerpac PLC-controlled synchronous lift systems.

High Tonnage Cylinders

The Enerpac High Tonnage Cylinders are particularly suitable for (multipoint) lifting applications.

In combination with our state of the art power packs, you will have a world class hydraulic system to perform the most challenging lifting jobs in a safe and professional manner. See the back page for more information on our pump offering.

HCG, HCR, HCL-Series Cylinders

- 50 - 1000 ton lifting capacity
- 50 - 300 mm lifting stroke

HCG-Series - single-acting

- gravity return
- stop ring to prevent plunger blow-out
- designed to withstand 10% side-load of maximum capacity.

HCR-Series - double-acting

- hydraulic advance and retract for controlled movement
- designed to withstand 10% side-load of maximum capacity.

HCL-Series - lock nut, single-acting

- gravity return
- lock nut for mechanical load holding
- overflow port to prevent plunger blow out
- designed to withstand 10% side-load up to 90% of maximum stroke.

LPL-Series - lock nut, low height, single-acting (see page 20)

- 60 - 500 ton lifting capacity;
- 45 - 50 mm lifting stroke
- integrated tilt saddle
- gravity return
- lock nut for mechanical load holding
- 5-10% side-load of maximum capacity.

HCG HCR HCL Series

Capacity:

50 - 1000 ton

Stroke:

50 - 300 mm

Maximum Operating Pressure:

700 bar

Assisted Return Pumps

Enerpac HCG, HCL and LPL-Series cylinders are hydraulic advance and gravity return. To improve productivity and plunger retraction Enerpac offers assisted return on ZU4 and ZE-Series pumps featuring Enerpac Venturi valve technology, specifically to facilitate the faster return of single-acting gravity and spring return cylinders.

Page: 89

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points these pumps are a far better alternative than using separately operated pumps.

Page: 250

Synchronous Lifting Systems

Pumps for multiple lift point capabilities. The economical **EVOB-Series** for basic applications and the multi-functional **EVO-Series** lifting system.

HCG-Series, High Tonnage Cylinders

HCG-Series, Single-Acting, Gravity Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand 10% side-load of maximum capacity ¹⁾
- Stop ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads.

SELECTION CHART 50 -300 TON HCG-MODELS

For 400 - 1000 ton models, see pages 46-47.

For full product features see pages 40-41.

Collar Thread (mm)		
Model / Capacity ton	Thread Size	Thread Length
	W	X
HCG-50	M130 x 2	30
HCG-100	M175 x 3	46
HCG-150	M215 x 3	55
HCG-200	M250 x 3	63
HCG-250	M280 x 3	64
HCG-300	M305 x 3	73

The collar thread length is designed for the full rated cylinder capacity.

Base Mounting Holes (mm)					
Model / Capacity ton	Bolt Circle	Thread Size	Minimum Thread Depth	Number of Holes	Angle from Coupler
	U	V	Z		
HCG-50	105	M12 x 1,75	22	2	90°
HCG-100	150	M12 x 1,75	22	2	90°
HCG-150	185	M12 x 1,75	22	2	90°
HCG-200	215	M12 x 1,75	22	3	60°
HCG-250	245	M12 x 1,75	22	3	60°
HCG-300	260	M16 x 2	25	3	60°

¹⁾ HCG-506 and HCG-5012: 7% side-load of maximum capacity.

²⁾ 1500 and 2000 ton models and additional stroke lengths available on request.

Single-Acting, High Tonnage Cylinders

Capacity:
50 - 300 ton

Stroke:
50 - 300 mm

Maximum Operating Pressure:
700 bar

HCG-Series, Single-Acting, Gravity Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand 10% side-load of maximum capacity
- Stop ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads.

Collar Thread (mm)		
Model / Capacity ton	Thread Size	Thread Length
	W	X
HCG-400	M350 x 3	83
HCG-500	M400 x 4	90
HCG-600	M430 x 4	100
HCG-800	M505 x 5	122
HCG-1000	M570 x 5	137

The collar thread length is designed for the full rated cylinder capacity.

Base Mounting Holes (mm)					
Model / Capacity ton	Bolt Circle	Thread Size	Minimum Thread Depth	Number of Holes	Angle from Coupler
	U	V	Z		
HCG-400	300	M16 x 2	25	3	60°
HCG-500	340	M24 x 3	36	3	60°

HCL-Series, High Tonnage Lock Nut Cylinders

HCL-Series, Single-Acting, Gravity Return Cylinders

- Lock nut provides positive and safe mechanical load holding
- Low friction to easily spin the load locking rings
- Designed to withstand 10% side-load up to 90% of maximum stroke
- Hardened surface resists side-loading and cyclic wear
- Overflow port as stroke limiter to prevent plunger blow-out
- Weather protected, inside and out
- Replaceable bearings enclose the plunger for support throughout the stroke
- Certified lifting eyes and base mounting holes.

SELECTION CHART 50 - 300 TON HCL-MODELS

For 400 - 1000 ton models, see pages 54-55.

For full product features see pages 40-41.

HCL-Series, High Tonnage Lock Nut Cylinders

HCL-Series, Single-Acting, Gravity Return Cylinders

- Lock nut provides positive and safe mechanical load holding
- Low friction to easily spin the load locking rings
- Designed to withstand 10% side-load up to 90% of maximum stroke
- Hardened surface resists side-loading and cyclic wear
- Overflow port as stroke limiter to prevent plunger blow-out
- Weather protected, inside and out
- Replaceable bearings enclose the plunger for support throughout the stroke
- Certified lifting eyes and base mounting holes.

SELECTION CHART 400 - 1000 TON HCL-MODELS

▼ SCR-1010H cylinder-pump set

The Quickest and Easiest Way to Start Working Right Away

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' section.

Page: **283**

- Optimum match of individual components
- All sets are ready-for-use
- Sets include 1,8 m safety hose and gauge with gauge adaptor
- All pumps are two-speed.

Single-Acting Cylinder-Pump Sets

SET SELECTION:

- 1 Select the cylinder
- 2 Select the pump
- 3 Find the set model number in the gray matrix

SELECTION EXAMPLE

Selected cylinder:

- RC-106, Single-Acting cylinder with 156 mm stroke

Selected pump:

- P-392, Lightweight hand pump

Set model number:

- SCR-106H

Included:

- HC-7206 hose
- GF-10P gauge
- GA-2 adaptor

SC Series

Capacity:

5 - 95 ton

Stroke:

38 - 362 mm

Maximum Operating Pressure:

700 bar

Portable Hydraulic Toolbox

Toolbox with hand pump, gauge adaptor assembly, hose and LW-, RC-, RCS, RSM-or WR-Serie cylinder.

²⁾ Cordless Pump includes 230V Charger. For 115V charger replace the "E" by the "B" in the model number.

▼ From left to right: P-142ALSS, P-392ALSS, V-152NV, V-66NV, RC-256NV, RC-106NV, RC-53NV

- Corrosion resistant, nickel-plated valves and cylinders
- Stainless steel pump inserts will not corrode
- Viton® Seals provide heat and chemical resistance
- Anodized aluminum pump reservoirs and plastic encapsulated pump bodies resist wet environments
- Two-speed operation reduces pump handle strokes 78% compared to single-speed pumps
- Pump handles lock for easy carrying.

RC, P, V Series

Cylinder Capacity:
5 - 25 ton

Stroke:
51 - 156 mm

Maximum Operating Pressure:
700 bar

Applications

For use in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

Multifluid Hand Pumps

MP-Series corrosion resistant hand pumps for low pressure filling and high pressure testing applications, suitable for a wide range of fluids.

▼ The portable hydraulic toolbox – applicable everywhere

▼ Shown from left to right: JHA-356, JHA-156

JH, JHA Series

Capacity:
7 - 150 ton

Stroke:
76 - 155 mm

Maximum Operating Pressure:
700 bar

- All-directional operation on 7, 15 and 35 ton JHA-series
- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- Chrome plated plungers
- Pumping handle included
- Automatic by-pass port to prevent over-extension (JH-series).

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few centimeters. The LW-16 Lifting Wedge requires a very small access gap of only 10 mm.

Page: **180**

Load Skates

For moving heavy loads easily and safely.

Industrial Steel Bottle Jacks

▼ Shown: GBJ-010, GBJ-030, GBJ-003

GBJ Series

Capacity:

2 - 100 ton

Stroke:

62 - 460 mm

Screw Extension Feature

Heat treated, adjustable extension screw with cleated saddle on selected GBJ models helps adjusting and prevents slipping.

- Lower handle effort reduces operator fatigue
- Fully serviceable
- High-strength beam and pump linkage for long life
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic by-pass port to prevent over-extension
- Wiper seal for extended life
- Thick base material with large area for increased strength and stability during lifting.

Cylinder-Pump Sets

As an alternative to bottle jacks where the operator is required to stand remote from the jacking point, see our range of cylinder-pump sets.

Safe, Efficient, Mobile Load Lifting

Pendant cord

Supplied with 3,5 m pendant cord for air driven units with pneumatic valves and 6 m pendant cord for electric driven units keeps operator away from the load.

- 54, 90, 136 and 181 ton capacities with pneumatic or electric pumps for the toughest jobs
- 102 mm ground clearance for transport over rail and rough terrain
- Double-acting cylinder
- Three position handle provides easy tilt back and transport
- Complies with ASME/ANSI B30:1 2015 and CE specifications
- Easy to change external filter minimizes down time
- Rugged, fully enclosed 610 mm wide frame with no exposed fittings or hoses
- SUP-R-STACK™ Extension System allows lifting at all heights without blocking.

POW'R LOCK – Self-Locking Mobile Lift System

A self-locking jack that performs automatic locking during lifting, lowering and holding.

* Based on one 457 mm and one 279 mm extension and one 76 mm spacer.

** Based on one 457 mm extension and one 76 mm spacer.

For power source, the following characters should be inserted in the 5th space of the model number.

Ordering Example:

Model No. PREME06014L is a 356 mm stroke, 54 ton model, with a manual valve and a 230 VAC, 1-ph, 50 Hz electric motor.

- A** Air Pump, 1416 l/min air consumption at 5,5 bar
- B** 115 VAC, 1-ph., 50-60 Hz, 20 A
- E** 208-240 VAC, 1-ph., 50-60 Hz, Euro Plug, 10 A
- I** 208-240 VAC, 1-ph., 50-60 Hz, USA Plug, 10 A
- G** ¹⁾ 208-240 VAC, 3-ph., 50-60 Hz
- W** ¹⁾ 380-415 VAC, 3-ph., 50-60 Hz
- J** ¹⁾ 440-480 VAC, 3-ph., 50-60 Hz
- R** ¹⁾ 575 VAC, 3-ph., 50-60 Hz.

¹⁾ Not available for 54 ton capacity.

▼ Shown: PL20025-ASA and PL20014-ASA

- Provides continuous locking protection during lift, lower and hold functions
- Patent-pending control technology synchronizes cylinder and lock nut for smooth and efficient lifting and lowering
- Unique double-acting cylinder offers a low collapsed height to accommodate more lifting applications
- Simple 2-button pendant allows operation of raise and lower functions from up to 6,1 metres away
- All load-bearing cylinder components have a nitrocarburized treatment to improve wear characteristics and resist corrosion
- Ergonomic handle has six positions for comfortable handling and folds when not in use
- Meets ANSI/ASME B30.1-2015, AS/NZS-2538, AS/NZS-2693 certification criteria.

Efficient Lifting with Continuous Automatic Load Locking

POW'R-LOCK™ Self-Locking Lift System

Only the POW'R-LOCK™ Lift System provides continuous positive locking of the load through all stages of lifting and lowering. No operator intervention is required to activate or de-activate the automatic locking system.

Two different stroke lengths are available. Both models are powered by an external compressed air system (user-supplied).

A convenient two-button pendant controls operation of the Lift System's air motor and directional control valve.

Tilt Load Cap

All POW'R-LOCK™ Lift System models feature a Tilt Load Cap to reduce side-loading.

Safety First

When lifting large, heavy vehicles certain precautions must be followed. Follow your published safety directions for lifting and cribbing your loads. The Pow'R-LOCK™ Lift System provides load/lock protection, but you must follow the safety directions for load cribbing operations.

◀ The PL-Series POW'R-LOCK™ Portable Lift System.

POW'R-LOCK™ Mobile Lift System

Accessories

Flat Load Cap – Non-tilt load cap has lower profile for tight lifting spaces.

Spacers – Minimize gap between load cap and lifting point to maximize hydraulic stroke of the jack.

Extensions – Stackable, with large alloy steel locating studs to resist effects of side-loading.

Extension Base Adapter – Extension Base Adapter design eliminates risk of improper stacking when using more than one extension.

PL Series

Rated Lifting Capacity:

181 ton

Stroke:

356 - 622 mm

Maximum Operating Pressure:

700 bar

Model Number	Description	Height (mm)	PL20014-ASA	PL20025-ASA
PLC1	Flat Load Cap	34	x	x
PLS1	Spacer	26	x	x
PLS2	Spacer	51	x	x
PLE5	Extension	127	x	x
	PLE7	Extension	178	x
	PLE9	Extension	229	x
	PLE11	Extension	280	x
PLE14	Extension	356	x	-
PLB12	Extension base adapter	305	x	-

WARNING!

PLE11 and **PLE14** Extensions and **PLB12** Extension Base Adapter are to be used with the "short" model **PL20014-ASA** only. Use of these extensions on the "tall" model **PL20025-ASA** will result in an excessive maximum lifting height. Load could become unstable and drop, resulting in possible personal injury and/or property damage.

Model Number	Maximum Additional Stack Height *
PLS20014-ASA	712 mm
PLS20025-ASA	229 mm

* Using optional PLB and PLE-Series extensions and PLS-Series spacers. Load cap height is NOT included in the stack height.

PR-Series, POW'R-RISER® Mobile Lifting Jack

When automatic load-locking is not required, the POW'R-RISER® jack provides a mobile lifting solution.

Page: 62

Capacity ton (kN)	Stroke (mm)	Model Number with Air Pump	Cylinder Lifting Speed ¹⁾ (mm/min)		Recommended Air Supply ²⁾		A ³⁾ (mm)	B ³⁾ (mm)	(kg)
			Load	No Load	(l/min)	(bar)			
181 (1779)	356	PL20014-ASA	51	61	3681 - 4247	3,8 - 6,9	1219	864	501
	622	PL20025-ASA	51	61			1778	1156	599

¹⁾ Depending on available airflow, regulator setting, pump speed and load weight.

²⁾ Minimum dynamic air pressure of 3,8-4,1 bar. 6,2-6,9 bar required to achieve 1779 kN capacity.

³⁾ Height A and B are with Swivel Load Cap installed. Subtract 51 mm if flat load cap is used.

There's no substitute for experience in customizing hydraulic cylinders and Enerpac meets the needs of the most demanding applications.

Cylinders are the primary workhorse in hydraulic systems required to push or pull. Although Enerpac offers a wide variety of cylinders to fit many application requirements, there are many applications that require customization.

These may include special corrosion protection, ability to handle extreme side loads, or having special mounting needs.

◀ Large capacity, double-acting lock nut cylinders with an external lock ring used for bridge work.

◀ Double-acting cylinders with pilot-operated check valves and rod eyes on both ends for lifting and positioning applications.

◀ Custom private-label cylinders for OEM applications.

Overview Custom Cylinders

▲ Custom 500 ton double-acting cylinders with 1.83 m stroke for lifting electric rope shovels.

CUSTOMIZABLE FEATURES:

- Stroke
- Capacity
- Paint
- Pressure Rating
- Fitting
- Special Attachments
- Seals
- Imbedded Sensors
- Collapsed Height
- Rod Modifications
- Special Mounting
- Corrosion Resistance

Enerpac offers a wide variety of hydraulic pumps for all your custom needs. Still, many applications require a customized pump to operate the system.

Hydraulic pumps are at the heart of any hydraulic system. Different systems require different flow, pressure and control.

Enerpac offers a wide variety of hydraulic pumps from small hand-operated pumps to large gasoline-powered pumps.

Still, many applications require a customized pump to operate the system. These may include larger reservoir capacity, custom valve configurations or added electrical controls. Enerpac also specializes in power units and controls used for synchronous lifting/lowering of multiple jacking points.

◀ *Private-label hand or foot pumps with fire-resistant oil and special exterior paint.*

◀ *XC-Series Cordless Pump with custom black shroud for private-label OEM customer to be used with a variety of hand held hydraulic tools.*

◀ *Electric pump with large cooler and controls for high-temperature applications.*

Overview Custom Pumps

CUSTOMIZABLE FEATURES:

- Reservoir and Frame
- Valves
- Controls
- Oil
- Seals
- Pressure and Flow
- Coolers and Heaters
- Paint
- Motor Type

Enerpac hydraulic pumps are available in over 1000 different configurations. Whatever your high-pressure pump needs are... speed, control, intermittent or heavy duty cycle you will find an Enerpac pump suited to the application.

Featuring Hand, Battery, Electric, Air and Gasoline powered models, with multiple reservoir and valve configurations, Enerpac offers the most comprehensive pump line available.

Pump Selection

For help in selecting the correct pump for your application, please see our 'Yellow Pages'.

If you require further assistance, contact the Enerpac office located near you.

P-Series, Lightweight Hand Pumps

▼ Shown from top to bottom: P-802, P-842, P-202, P-142

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminium pump base for maximum corrosion resistance
- Two-speed operation reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P-842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for operator safety
- Internal pressure relief valve for overload protection.

▼ Cylinder-pump set SCR-254H used to support the construction while monitoring pressure and load with the gauge.

Exclusively from Enerpac

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder Matching Chart located in the 'Yellow Pages'.

▼ Shown from left to right: P-77, P-80, P-84, P-801, P-39

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P-39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on the P-84 and P-464 for operation of double-acting cylinders.

▼ In the absence of a power supply, the P-80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to load contact, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your P-39, P-77, P-80 or P-801 to foot power with the PC-11 Kit. Includes instructions for easy conversion.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 134

4-Way Control Valve

P-84 and P-464 feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system set-up information see our Yellow Pages.

Page: 278

Pump Type	Usable Oil Capacity (cm ³)	Model Number	Pressure Rating ²⁾ (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)
			1 st stage	2 nd stage	1 st stage	2 nd stage	
Single	672	P-39	-	700	-	2,46	39

	7423	P-464 ³⁾	14	700	126,20	4,75	49

¹⁾ Available as a set, see note on next page.

²⁾ Contact Enerpac for applications where operating pressure is less than 10% of pressure rating.

³⁾ P84, P-464 is for use with double-acting cylinders.

ULTIMA Steel Hand Pumps

P Series

Reservoir Capacity:
672 - 7423 cm³

Flow at Rated Pressure:
2,46 - 4,75 cm³/stroke

Maximum Operating Pressure:
700 bar

P-39, P-77

P-80, P-801, P-84

P-462, P-464

Extra Capacity Hand Pumps
P-462 and P-464 feature extra large reservoirs and high first-stage flow rate. These pumps are ideally suited for powering high-capacity cylinders.

Pump-Cylinder Sets
The P-80 is also available as set (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: **56**

Cylinder Matching Chart

For help in selecting the correct hand pump for your application, please refer to the Cylinder-Pump Matching Chart located in the 'Yellow Pages'.

P-Series, Low Pressure Hand Pumps

▼ Shown from left to right: P-25, P-51, P-18

- P-25 and P-50 pump oil in both forward and reverse handle movement improving overall efficiency, ideal when mounting space is restricted
- External load-release valve
- Internal pressure-relief valve for overload protection
- P-51 can be operated in horizontal and vertical position with pump head and oil outlet facing downwards
- For use with single-acting cylinders and tools.

When Less Than 700 Bar is All You Need

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 134

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac

hydraulic hoses.

MP Series

Flow at Rated Pressure:

1,6 - 20,6 cm³/stroke

Maximum Operating Pressure:

110 - 1000 bar

Optional Reservoir Kit

Includes 10 litres tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 7,4 litres. Order model number: **MP-10T**.

Stainless Steel Hand Pump

Also available as stainless steel hand pump, model number: **11-400**.

Page: **78**

- Superior corrosion resistance
- Standard Nitrile seals – can be used for a wide range of fluids such as demineralised water, oil/water emulsions, waterglycols, mineral oils
- Two speed pumps up to 1000 bar pressure
- Buna Nitrile seals can be exchanged with optional EPDM seal for use with Skydrol or brake fluids
- Impregnated aluminium anodized pump housing with stainless steel internal pumping components
- Externally adjustable pressure relief valve
- 1/4" NPTF gauge port
- For use with single-acting cylinders and tools.

MP-110, 350, 700, 1000

- ① Suction / Tank return port 3/8"-18 NPTF
- ② Pressure port 3/8"-18 NPTF
- ③ Gauge port 1/4"-18 NPTF

Pump Type	Usable Oil Capacity * (cm ³)	Model Number **	Pressure Rating (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)	Piston Stroke (mm)	Weight (kg)
			1st stage	2nd stage	1st stage	2nd stage

	*	MP-1000	35	1000	52,6	1,60	45	26,5	6,6

* MP-Pump includes 1,5 mm thick gasket for reservoir mounting. MP-Series pumps requires the use of an external reservoir.

** MP-Series pumps are for use with single-acting cylinders and tools.

MP-10T

Lightweight Hydraulic Foot Pump

▼ Shown: P-392FP

- **Robust, durable and compact**
 - Steel frame for maximum stability
 - Steel pumping handle
 - Aluminium reservoir
- **Foot pedal lock and lightweight construction for easy carrying**
- **Two-speed operation reduces foot pedal strokes**
- **Large foot-pad release valve for controlling load descent**
- **Internal pressure relief valve for overload protection.**

P Series

Reservoir Capacity:

492 cm³

Flow at Rated Pressure:

2,47 cm³/stroke

Maximum Operating Pressure:

700 bar

Pump-Cylinder Sets

The P-392FP is available as **set** (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: 56

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 122

▼ P-392FP offers the advantage of hands free operation to handle and control the tool or cylinder.

▼ Shown from left to right: 11-100, P-2282

Ultra-High Pressure up to 2800 bar

2-Way Shut-Off Valve Model Nr. 72-750

For 2800 bar applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and utilizing .38 inch cone fittings, it is the perfect selection for use with your ultra-high pressure hand pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit. Test System Gauges, such as the **T6010L**, are available with cone threads or NPTF threads and a variety of pressure ranges.

Page: **132**

- Two-speed operation on the P-2282 allows for faster fill operation, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 2800 bar rating
- Ultra-high pressure fittings feature all stainless steel construction except adaptor 41-366 which features nickel plated carbon steel construction.

▲ Typical Test System

Cone Seal

Stainless Steel High Pressure fittings seal on a 'cone' surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 2800 bar seal.

Pump Type	Usable Oil Capacity (cm ³)	Model Number	Pressure Rating* (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)
			1 st stage	2 nd stage	1 st stage	2 nd stage	
Two-Speed	983	P-2282	13	2800	16,22	0,61	48,1
Single-Speed	737	11-100	-	700	-	2,49	54,4
	737	11-400	-	2800	-	0,62	54,4

* Contact Enerpac for applications where operating pressure is less than 10% of operating pressure.

Ultra-High Pressure Hand Pumps

▼ Optional Ultra-High Pressure Fittings and Tubings

Description	Connection	Model Nr.
2800 bar		
Gland Nut Plug	.38" cone	43-001
Elbow	.38" cone	43-200
Tee	.38" cone	43-300
Gauge Tee	.38" cone side/ .25" cone gauge port	43-301
Gauge Adaptor	.38" cone side/ .25" cone gauge port	83-011
Coupling	.38" cone	43-400
Cross	.38" cone	43-600
Gland Nut with Sleeve	.38" cone	43-701
Gauge Connector	.25" cone	43-704
Tubing	100 mm tube, O.D. .38" * 200 mm tube, O.D. .38" * 300 mm tube, O.D. .38" *	45-116 45-126 45-136
700 bar only		
Adaptor	.38" F cone to 1/4" M NPTF	41-146
	.38" F cone to 3/8" M NPTF	41-166
Adaptor	.38" F cone to 1/4" F NPTF	41-246
	.38" F cone to 3/8" F NPTF	41-266
Adaptor	.38" M cone to 3/8" F NPTF	41-366

Note: .25" cone fittings use 9/16"-18 threads, 3/8" cone fittings use 3/4"-16 threads.
* Actual tubing lengths are 19 mm less than nominal size shown. These dimensions make distance between centers of valves and fittings multiples of 100 mm spaces.

P, 11 Series

Reservoir Capacity:
737 - 983 cm³

Flow at Rated Pressure:
0,61 - 2,49 cm³/stroke

Maximum Operating Pressure:
700 - 2800 bar

Ultra-High Pressure pumps DO NOT have an internal safety pressure relief valve.

Stainless Steel Construction

Ultra-high Pressure Fittings feature all stainless steel construction except adaptor 41-366, which features nickel plated carbon steel construction.

- **Lightweight design with integrated handle and carrying strap for portability**
- **Bladder reservoir prevents contamination and allows pump usage in any position**
- **Powerful 0,37 kW motor and 28 Volt Lithium-Ion battery deliver exceptional speed and run time**
- **High-strength fiberglass reinforced composite shroud for superior durability in demanding job site environments**
- **Cordless technology eliminates tripping hazards found in other electric or air powered pumps**
- **Available for operating single-acting and double-acting cylinders and tools.**

Performance of a Powered Pump

Portability of a Hand Pump

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: **134**

Battery packs contain no cadmium, so they are environmentally friendly. Enerpac encourages recycling.

28-Volt Battery

The XC-28V with Lithium-Ion technology for maximum battery performance.

Battery Charger

1-hour quick charger.

Model Nr.	Voltage
XC-115VC	115 VAC
XC-230VC	230 VAC

3/8" Swivel Connector

Customer installed 360 degree swivel coupler for optimal orientation of the hydraulic hose.

Order Model Number ¹⁾ **XSC1**

¹⁾ Accessories must be ordered separately.

◀ Portable power and simplicity for the toughest jobs.

Cordless Hydraulic Pumps

XC-Series Cordless Hydraulic Pumps

The XC-Series cordless pump is ideal for jobs that require a combination of portability, speed, and safety. These cordless pumps are perfect for remote locations without access to power, but also indoors where trip hazards, ergonomics or size is a concern.

The XC-Series cordless pump is compatible with all Enerpac hydraulic tools and small to medium sized cylinders.

The XC-Series cordless pump is CSA and CE compliant.

The Lithium-Ion battery provides superior run time:

- 270 cuts of 10 mm reinforcing bar using a WHC-750 Cutter
- 112 lifts with a WR-5 Spreader
- 45 splits on M27 - 8.8 nuts using a NC-3241 Nut Cutter
- 30 times lifting with a RC-104 cylinder (10 ton, 100 mm stroke).

Note: Actual number of cycles per charge will vary depending on condition of battery, tool and ambient conditions. Battery life with double-acting tools is approximately 75% of that for comparable, single-acting tools.

XC Series

Reservoir Capacity:
1,0 - 2,0 litres

Flow at Rated Pressure:
0,25 l/min

Maximum Operating Pressure:
700 bar

- ① Outlet "Advance" Port 3/8"-18 NPTF
- ② Oil Fill (must use funnel)
- ③ User Adjustable Relief Valve Access Port
- ④ Directional Control Valve
- ⑤ Shoulder Strap Connection Points
- ⑥ Safety Lock Feature
- ⑦ On/Off Switch
- ⑧ Inlet "Retract" Port (double-acting models only)

¹⁾ Available as a cylinder pump set, see page 56.

²⁾ Batteries and charger not included.

Take the battery pump anywhere without power cords or air hoses.

▼ Shown: PUJ-1200E

- Lightweight and compact design: 11,8 to 18,6 kg
- Large easy-carry handle for maximum portability
- Two-speed operation reduces cycle times for improved productivity
- 230 VAC 50/60-cycle universal motor will operate under poor voltage supply
- 24 VAC remote motor control, 3 m length for operator safety
- Starts under full load
- High strength molded shroud, with integral handle, protects motor from contamination and damage
- Designed for intermittent duty cycle.

▼ An Economy Pump PUJ-1200E is used with a low height cylinder RCS-302 to reposition a Scissor lift to simplify maintenance.

Heavy on Performance, Light on Weight

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment.

For use with the Economy pump the **G-2535L** gauge and **GA-3** gauge adaptor are suggested.

For a full range of gauges, please refer to the System Components section.

Page: 120

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 122

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 283

	3,8	PUJ-1401E	13	700

* For 115 volt applications replace 'E' suffix with 'B'.

** Electric dump valve for auto-retract of cylinders.

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders or hydraulic tools. Its lightweight and compact design make it ideal for applications which require easy transport of the pump. The universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the 'Yellow Pages'.

PUD-1100 Series

- Provides advance-retract of single-acting cylinders
- Ideal for punching applications
- For applications not requiring load holding
- 3 m cord with pendant controls motor and valve operation.

PUD-1300 Series

- Provides advance-hold-retract of single-acting cylinders
- Ideal for applications requiring load-holding
- For applications requiring solenoid valve operations
- 3 m cord with pendant controls motor and valve operation.

PUJ Series

- Manual valves provide advance-hold-retract tool operation
- Available with 3- and 4-way valves for single or double-acting cylinders
- 3 m cord with pendant controls the motor operation.

▼ Shown: PEJ-1401E

- Two-speed operation reduces cycle times for improved productivity
- Powerful 0,37 kW induction motor is submerged in the oil reservoir to run cooler, protect the motor, simplify the pump interface, save space and reduce noise
- Large 5,5 litres reservoir allows operation of a wide range of cylinders
- 24 VDC remote pendant control on certain models for safer operation
- Externally adjustable relief valve allows control of operating pressure without opening the pump
- 40-micron internal return line filter keeps oil clean, promoting longer pump life
- Full length side tube for easy monitoring of oil level.

◀ The Remote Jog model (PEJ-Series) of the Submerged Pump simplifies maintenance on this machine.

Best Performance for Mid-Range Cylinders and Tools

▼ SELECTION CHART

For more technical information see next page.

5 BASIC PUMP TYPES

Select the model that suits your application. For special requirements see page 87 or contact your Enerpac office.

PED Series: with Dump Valve

- Ideal for punching, crimping and cutting
- For use when load holding is not required
- Control pendant with 3 m cord controls valve and motor.

PEM Series: with Manual Valve

- Ideal choice for most applications
- Manual valve control, for both single-acting and double-acting applications
- Manual motor control.

PER Series: with Solenoid Valve

- Ideal for production and lifting
- All valves are 3 position for Advance-Hold-Retract
- Control pendant with 3 m cord for remote valve operation.

PEJ Series: with Remote Jog

- For light production and lifting applications
- Manual valve control for single-acting or double-acting cylinders
- Control pendant with 3 m cord for remote motor operation.

PES Series: with Pressure Switch

- Designed for continuous pressure applications, such as clamping, workholding and testing
- All versions include manual valves for directional control.

Submerged Electric Pumps

PE-Series Submerged Pump Application

The Submerged pump is best suited to power small to medium size cylinders or hydraulic tools, or whenever quiet, intermittent duty cycle is needed.

With its low sound level and the addition of the optional oil cooler, the Submerged pump is suited to light production work as well.

Its lightweight and compact design also make it ideal for applications which require some transport of the pump.

For further application assistance see the 'Yellow Pages' or contact your local Enerpac office.

CUSTOM BUILD YOUR SUBMERGED PUMP

If the Submerged Pump that would best fit your application cannot be found in the chart on page 85, here you can easily build your custom submerged pump.

▼ This is how a Submerged Pump Model Number is built up:

P	E	M	-	1	3	01	E
1	2	3		4	5	6	7
Product Type	Motor Type	Pump Type		Pump Series	Valve Type	Reservoir Size	Motor Voltage

1 Product Type

P = Pump

2 Motor Type

E = Electric Motor

3 Pump Type

D = Dump

J = Jog

M = Manual

R = Remote (Solenoid) ¹⁾²⁾

S = Pressure Switch

4 Pump Series

1 = 0,37 kW, 700 bar

5 Valve Type

0 = No valve (PER only)

1 = Dump

2 = 3-way, 2-position, normally open

3 = 3-way, 3-position, tandem center

4 = 4-way, 3-position, tandem center

5 = Modular solenoid valve (PER only)

6 Reservoir Capacity

01 = 5,5 litres

7 Motor Voltage and Heat Exchanger

B = 115 V, 1 Ph, 50/60 Hz ¹⁾

D = 115 V, 1 Ph, 50/60 Hz ¹⁾ with Heat Exchanger

E = 230 V, 1 Ph, 50/60 Hz ²⁾

F = 230 V, 1 Ph, 50/60 Hz ²⁾ with Heat Exchanger

I = 230 V, 1 Ph, 60 Hz

¹⁾ Solenoid valves operate only at 60 Hz.

Can run on 50 Hz with manual valves.

²⁾ Solenoid valves operate only at 50 Hz.

Can run on 60 Hz with manual valves.

The following submerged pump models include a modular solenoid valve and pilot operated check valve:

PER-1301B

PER-1301D

PER-1301E

PER-1401B

PER-1401D

PER-1401E

Ordering Example

Model Number: PER-1301E

The PER-1301E is a 0,37 kW, 700 bar, submerged electric pump, with 5,5 litres usable oil capacity, a 3-way, 3-position, remote solenoid valve and a 230 V, 1 Phase, 50/60 Hz motor.

PE Series

Reservoir Capacity:

5,5 litres

Flow at Rated Pressure:

0,27 l/min

Motor Size:

0,37 kW

Maximum Operating Pressure:

700 bar

Z-Class Enerpac Power Pumps

Introducing the **Z-Class** power pumps from Enerpac – pumps that run cooler, use less electricity and are easy to service.

Enerpac has used the latest metallurgical, bearing and seal technologies to produce a pump whose features and benefits far surpass the electric pumps that are available today.

By reducing the number of moving parts, improving flow dynamics and decreasing friction, Z-Class pumps will stay on the job longer, require less energy to operate

and when needed, have lower service costs.

Z-Class power pumps from Enerpac – simply the best pump you will ever use.

Z Tough.
Dependable.
Innovative.
CLASS

Z-Class, An Innovation in Pump Design

Z-Class Pumping Element – The Heart of Your Hydraulic System

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life – which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump – improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump – reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic pendant features sealed switches and operates at 24 V for improved operator safety.

Z-Class factory options & accessories

Extensive list of accessories including heat exchanger, roll cage, skid bar, pressure transducer, return line filter and level and temperature switches, allow complete pump control over a wide range of industrial applications.

Z-Class power pumps for your application

Available in one flow range for universal motor and eight flow ranges for induction motor. Choose from single or two-stage models to provide the optimum cylinder and tool performance for almost any industrial application.

Back-lit LCD on select Z-Class pumps

- pump usage information, hour and cycle counts
- low-voltage warning and recording
- offers self-test and diagnostic capabilities
- information displayed in 6 languages
- pressure read-out (when used with the optional pressure transducer)
- adjustable trigger pressure setting (when used with the optional pressure transducer).

Back-lit LCD available on ZU and ZE-Series Electric Pumps. ▶

ZU-Series Pump Applications

- **Mobile:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed
- **Pump speed:** two stage pump unit.

ZE-Series Pump Applications

- **Stationary:** when pump remains in one location
- **Induction motor:** 1 and 3-phase for high cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle application
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed
- **Pump speed:** single or two stage pump unit.

ZU4-Series, Portable Electric Pumps

▼ Shown from left to right: ZU4304ME, ZU4420SE-H, ZU4304PE-K

- High-efficiency two-speed pump design – higher oil flow and bypass pressure
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, moulded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport.

Pro-Series models only

- * Back-lit LCD readout provides pressure display and a number of diagnostics and readout capabilities never offered on a portable pump before
 - pump usage information, hour and cycle counts
 - self-test, diagnostic and read-out capabilities
 - pressure readout and auto-mode pressure settings.

◀ Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites.

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

▼ COMMON PUMP MODELS

For technical information and options see next page.

BASIC PUMP TYPES

Select the model that suits your application. For special requirements see ordering matrix on page 92 or contact your Enerpac office.

Manual Valve

- Ideal choice for most applications.
- For single-acting or double-acting applications.
- Venturi Valve Technology (VM33VAC) for faster retract of single-acting cylinders.
- Motor control on shroud.

Manual Valve with Pendant *

- For light production and lifting applications.
- For single- or double-acting cylinders.
- Venturi Valve Technology (VM33VAC) for faster retract of single-acting cylinders.
- Manual valve with power seat (VM43LPS), ideal for post-tensioning applications.

Dump Valve *

- Ideal for punching, crimping and cutting.
- For use when load-holding is not required.

Solenoid Valve *

- Ideal for lifting applications and where remote control is required.
- Venturi Valve Technology (VE33VAC) for faster retract of single-acting cylinders.
- With VE32 valve, motor only runs during the advance function, while holding and retracting, the motor is off.
- Motor runs continuously on pumps with VE33 and VE43 valves.

* Pendant with 3 m. cord controls valve and motor.

ZU4-Series, Electric Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high by-pass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4-Series Pumps are built to power small to large-sized cylinders or hydraulic tools, or wherever high-speed, intermittent duty, remote hydraulic power is needed.

Classic Electric Pump

- The Classic has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics.

The Classic delivers durable, safe and efficient hydraulic power for demanding markets like construction, post-tensioning and foundation repair.

Standard Electric Pump

- For applications that do not require digital display features of the Premium Pump. Available in all manual or jog versions.

Pro Electric Pump

- Digital (LCD) display features a built-in hour meter and shows self-diagnostic, cycle-count and low voltage warning information.

Pressure can also be displayed when the pump is equipped with an optional pressure transducer.

¹⁾ See valves section for technical information on valve types. ²⁾ See custom order matrix on page 95 for other voltage options.

³⁾ Subtract 1,4 kg for Standard (STD) Electric models. ⁴⁾ ZU47...-pump models have VM22 3-way/2-position manual valve for post-tensioning applications.

Pressure Transducer *

- More durable than analog gauges (against mechanical and hydraulic shock)
- More accurate than analog gauges (0,5% full scale of pump)
- Calibration can be fine tuned for certification
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on models with VE33/VE43 valves)
- Display pressure in bar, psi or MPa.

* Requires LCD Electric

Accessory Kit Model Number	Adjustable Pressure Range (bar)	Switch-point repeatability	Dead-band (bar)
ZPT-U4 *	3,5 - 700	± 0,5%	3,5

* Add suffix T for factory installation.

Level/Temperature Switch

- Ensures feedback on pump oil level and temperature
- Drop-in design allows for easy installation to pump reservoir
- Plugs directly into pump electrical enclosure
- Built-in thermal sensing shuts off pump when unsafe operating temperature is reached
- Oil level switch shuts down pump before oil reaches an unsafe operating level.

Model Number	Operating Temperature (°C)	Maximum Pressure (bar)	 (kg)
ZLS-U4 *	5-110	10	0,1

* Add suffix L for factory installation.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: **122**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

ZU4 Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

1,0 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

700 bar

Return Line Filter

- 25 micron filter removes contaminants from return oil flow
- By-pass valve prevents damage if filter is dirty
- With maintenance indicator.

Accessory Kit Modelnr.	Maximum Pressure (bar)	Maximum Oil Flow (l/min)	By-pass Setting (bar)
ZPF *	13,8	45,4	1,7

* Add suffix F for factory installation.

Heat Exchanger

- Removes heat from by-pass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit Nr.	Can be used on	(kg)
ZHE-U115 *	115 V pumps	4,1
ZHE-U230 *	230 V pumps	4,1

* Add suffix H for factory installation.

Heat Exchanger

Can be factory installed on ZU4-Series Classic, Standard Electric and Pro Electric models.

- Extends system life.
- Stabilizes oil temperature at a maximum of 54 °C at 21 °C ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water based fluids.

Thermal Transfer *		Maximum Pressure	Maximum Oil Flow	Voltage
Btu/h	kJoule	(bar)	(l/min)	(VDC)
900	950	20,7	26,5	12

* At 1,9 l/min at 21 °C ambient temperature.

CUSTOM BUILD YOUR ZU4-SERIES PUMP

If the ZU4-Series pump that would best fit your application cannot be found in the chart on page 91, you can easily build your custom ZU4-Series pump here.

▼ This is how a ZU4-Series pump model number is built up:

Z	U	4	1	04	D	E	-	H	K	T
1	2	3	4	5	6	7		8		
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Size	Valve Operation	Voltage		Options and Accessories		

1 Product Type

Z = Pump Series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 1,0 l/min @ 700 bar

4 Valve Type (see page 116-117 for more details)

- 1 = Dump (VE32D)
- 2 = 3 way/2 position manual or electric (VM32 or VE32)
- 3 = 3 way/3 position manual or electric (VM33 or VE33)
- 4 = 4 way/3 position manual or electric (VM43 or VE43)
- 6 = 3 way/3 position locking manual w/po check (VM33L)
- 7 = 3 way/2 position manual (VM22)
- 8 = 4 way/3 position locking manual w/po check (VM43L)
- 9 = 4 way/3 position manual w/power seating (VM43-LPS)
- 10 = 3 way/3 position manual Venturi valve (VM33VAC)
- 11 = 4 way/3 position electric Venturi valve (VE33VAC)

5 Reservoir Size (useable capacity)

- 04 = 4 litres
- 08 = 8 litres
- 10 = 10 litres ¹⁾
- 20 = 20 litres ¹⁾
- 40 = 40 litres ¹⁾

¹⁾ reservoir includes side handles.

6 Valve Operation

- D = Dump (solenoid valve w/pendant and LCD Electric)
- J = Jog (manual valve w/pendant and Standard Electric (i.e. w/o LCD)
- K = Jog (manual valve w/pendant and LCD Electric)
- L = Manual valve w/LCD Electric (w/o pendant)
- P = Manual valve w/pendant and classic electric (i.e. w/o LCD)
- R = Manual valve w/Classic electric (i.e. w/o LCD) [w/o pendant]
- M = Manual valve w/Standard Electric (i.e. w/o LCD) [w/o pendant]
- S = Solenoid valve w/pendant and LCD Electric

7 Voltage

- B = 115V, 1 ph, 50/60Hz
- E = 208-240V, 1 ph, 50/60 Hz (w/European plug and CE EMC compliant)
- I = 208-240V, 1 ph, 50/60 Hz (w/NEMA 6-15 plug)

8 Options and Accessories (see page 87 for possibilities)

- F = Filter
- G = 0-1000 bar pressure gauge (ø 63,5 mm) ¹⁾
- H = Heat exchanger
- K = Skid Bar (4 and 8 litres reservoirs only)
- L = Level/temperature switch ²⁾³⁾
- N = No reservoir handles (includes lifting eyes)
- R = Roll Cage
- T = Pressure transducer ²⁾
- U = Foot switch

¹⁾ Pressure gauge not available on pump models with pressure transducer

²⁾ These options require Pro Electric

³⁾ Not available on 4 and 8 litres reservoirs

ZU4 Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

1,0 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

700 bar

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 283

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

Page: 116

Ordering Example: ZU4108DE-HKT

is a Pro Electric model pump with LCD, 1,0 l/min oil flow at 700 bar, pump with a dump valve, an 8 liter reservoir, operates on 230V, heat exchanger, pressure transducer and skid bar.

Spring Centred Valve Kits

VM and VC-Series manual 3-position valves can be easily converted into spring centred valves. With these retro-fit kits the handle will automatically move into the neutral valve position when released.

¹⁾ See Valve Section (page 117) for hydraulic symbols and details.

²⁾ For No Valve, with Electric Box, see ordering matrix on page 101.

³⁾ Pendant includes 3 meters cord.

ZE-Series, Electric Pumps

- High-efficiency pump design – higher oil flow and by-pass pressure
- High-strength, moulded electrical box protects electronics, power supplies and LCD readout and stands up to harsh industrial environments
- IP54 protection and isolation class
- Back-lit LCD provides self test, diagnostic and read-out capabilities never before offered on an industrial pump (included on pump with electric valves, optional on other models)
- Totally enclosed, fan-cooled industrial electric motors for extended life
- User adjustable relief valve built-in on manual and solenoid valves. Oil ports on valves are 3/8" NPTF
- Steel fan guard on all electric motors
- Full sight oil level glass on 10, 20 and 40 litres reservoirs, oil level indicators on 4 and 8 litres reservoirs
- 40 micron filter breather with splash guard
- Durable steel reservoirs.

⁴⁾ See custom ordering matrix on page 101 for other voltages.

Adjustable Relief Valve

All VM and VE-Series have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a pilot-operated check valve. This provides hydraulic locking of the load until the valve is shifted into the retract position. To order this feature on your ZE-series pump see the valve type in the order matrix.

Page: **101**

Single or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure such as testing or clamping.

Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves. Can be factory installed on pumps with manual valve.

²⁾ When used with optional pressure transducer.

³⁾ English, French, German, Italian, Spanish and Portuguese.

Level/Temperature Switch ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level.

⁴⁾ 24 V, requires Electric Box. Available for 10, 20 and 40 litres reservoirs.

Accessory Kit Modelnr.	Fixed Temperature Signal (°C)	Operating Temperature (°C)	Max. Pressure (bar)
ZLS-U4 *	80	5 - 110	10

* Add suffix L for factory installation.

Return Line Filter

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25.

Accessory Kit Modelnr.	Maximum Pressure (bar)	Maximum Oil Flow (l/min)	By-pass Setting (bar)
ZPF *	13,8	45,4	1,7

* Add suffix F for factory installation.

Roll Cage

- For easy portability and hoisting
- Protects pump and electric box
- Available for all reservoir sizes.

Skid Bar

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces.

Foot Switch ⁵⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 3 meters cord.

⁵⁾ 15 V, requires Electric Box.

Accessory Kit Nr.	Fits on reservoir size:	 (kg)
ZRC-04 *	4 and 8 litres ⁵⁾	5,5
ZRC-04H *	4 and 8 litres ⁶⁾	6,5
ZRB-10 *	10 litres	6,0
ZRB-20 *	20 litres	6,0
ZRB-40 *	40 litres	6,0

* Add suffix R for factory installation.

⁵⁾ For pump without heat exchanger

⁶⁾ For pump with heat exchanger.

Accessory Kit Nr.	Fits on reservoir size:	 (kg)
SBZ-4 *	4 and 8 litres ⁵⁾	2,2
SBZ-4L *	4 and 8 litres ⁶⁾	3,2

* Add suffix K for factory installation.

Accessory Kit Nr.	Can be used on ZE-Series pumps with
ZCF-2 *	Solenoid VE-Series valves

* Add suffix U for factory installation.

Pressure Transducer ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- “Set pressure” feature turns off motor at user defined pressure ²⁾.

¹⁾ 24 V, requires Electric Box.

²⁾ Or shifts valve to neutral position on pump models with VE33 and VE43 solenoid valves.

Access-ory Kit Modelnr.	Adjustable Pressure Range (bar)	Switch-point repeatability	Dead-band (bar)
ZPT-U4 *	3,5 - 700	± 0,5%	3,5

* Add suffix **T** for factory installation.

Pressure Switch ³⁾

- Controls pump, monitors system
- Adjustable pressure 35-700 bar
- Includes glycerine filled 1000 bar pressure gauge G2536L
- Accuracy ± 1,5% of full scale.

³⁾ 24 V, requires Electric Box. Not available in combination with pressure transducer. Not available on LCD-electronics.

Access-ory Kit Modelnr.	Switch-point repeatability	Deadband (bar)	Oil Ports (NPTF)
ZPS-E3 *	± 2%	8 - 38	3/8"

* Add suffix **P** for factory installation.

Options

Accessory Kits can be installed by customer. See chart below for options on **Standard Electric** (without electric box) or **LCD Electric** (with electric box). Refer to page 95 for ordering matrix.

ZE-Series Options	Factory Installed		Accessory Kits	
	Std. Electr.	LCD Electr.	Std. Electr.	LCD Electr.
Return Line Filter	F	F	ZPF	ZPF
Skid Bar ¹⁾	K	K	SBZ	SBZ
Roll Cage	R	R	ZRB	ZRB
Single-stage	S	S	-	-
Heat Exchanger	-	H	-	ZHE
Pressure Gauge ²⁾	G	G	-	-
Pressure Switch ³⁾	-	P	-	ZPS-E3
Pressure Transducer ⁴⁾	-	T	-	ZPT-U4
Level/Temp Switch ⁵⁾	-	L	-	ZLS-U4
Foot Switch ⁶⁾	-	U	-	ZCF-2

¹⁾ Available for 4 and 8 litres reservoirs.

²⁾ Not available on pumps with pressure transducer.

³⁾ Includes 1000 bar gauge. Only available on manual valves without locking feature.

⁴⁾ Electric box can accept either pressure switch or pressure transducer, but not both.

⁵⁾ Available for 10, 20 and 40 litres reservoirs.

⁶⁾ For control of solenoid dump and 3-position valves.

Pendants ⁴⁾

- For pump types with valve operation “W” (No Valve, with Electric Box, without pendant).

⁴⁾ When ordering Enerpac VE-Series solenoid valve the pendant must be ordered separately. Pendant connection to be plugged into electric box.

Pendant Model Nr.	To be used with solenoid valve:
ZCP-1	VE32D
ZCP-3	VE32, VE33, VE43

Heat Exchanger ⁵⁾

- Removes heat from by-pass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit Nr.	Fits on reservoir size:	(kg)
ZHE-E04 *	4 and 8 litres	4,1
ZHE-E10 *	10, 20 and 40 litres	4,1

⁵⁾ 24 VDC, requires electric box.

* Add suffix **H** for factory installation.

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 0,5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 3, 14, 35 and 145 bar as rate of pressure change increases.
- “Set pressure” feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 54 °C at 21 °C ambient temperature.

Thermal transfer at 1,9 l/min and 21 °C ambient temperature: 900 Btu/hour [950 kJ].

Do not exceed max. oil flow of 26,5 l/min and max. pressure of 20,7 bar. Not suitable for water-glycol or high water based fluids.

ZE-Series, Specifications & Dimensions

▼ ZE-SERIES PERFORMANCE CHART

Pump Series	Output Flow Rate at 50 Hz * (l/min)				Pump Unit	Available Reservoir Sizes (useable oil) (litres)	Motor Size (kW)	Relief Valve Adjustment Range (bar)	Sound Level (dBA)
	low pressure at 7 bar	low pressure at 50 bar	high pressure at 350 bar	high pressure at 700 bar					
ZE3	0,59	0,59	0,57	0,55	Single-stage	4-8-10-20-40	0,75	70-700	75
	6,15	5,26	0,57	0,55	Two-stage				
ZE4	0,87	0,87	0,84	0,82	Single-stage	4-8-10-20-40	1,12	70-700	75
	8,88	8,20	0,84	0,82	Two-stage				
ZE5	1,75	1,72	1,68	1,64	Single-stage	10-20-40	2,24	70-700	75
	11,61	11,27	1,68	1,64	Two-stage				
ZE6	3,00	2,94	2,86	2,73	Single-stage	10-20-40	5,60	70-700	80
	12,29	12,15	2,86	2,73	Two-stage				

* Oil flow will be approximately 6/5 of these values at 60 Hz.

i Single or Two-Stage
Choose **single-stage** pumps for applications that require constant flow regardless of pressure such as testing or clamping. **Two-stage** pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

ZE-Series Pumps with 4 - 8 litres reservoir

ZE-Series Pumps with 10 - 20 - 40 litres reservoir

- ① User adjustable relief valve on all manual and solenoid valves.
3/8" NPTF on A and B ports;
1/4" NPTF on auxiliary ports.
- ② Electric Box
- ③ Heat Exchanger
- ④ Roll Cage
- ⑤ Return Line Filter
- ⑥ Skid Bar
- ⑦ Magnetic Oil Drain
- ⑧ Oil Drain / Oil Level/Temperature Switch

- G⁵⁾** = 208-240V, 3 ph, 50-60 Hz
- W⁵⁾** = 380-415V, 3 ph, 50-60 Hz
- K⁵⁾** = 440V, 3 ph, 50-60 Hz
- J⁵⁾** = 460-480V, 3 ph, 50-60 Hz
- R⁵⁾** = 575V, 3 ph, 60 Hz

8 Options and Accessories

- F** = Return Line Filter
- G⁶⁾** = 1000 bar gauge
- H⁷⁾** = Heat exchanger
- K** = Skid Bar (only on 4 and 8 litres)
- L⁷⁾** = Oil Level/Temperature Switch ⁸⁾
- N** = No reservoir handles (includes lifting eyes)
- P⁷⁾** = Pressure Switch (only available on manual valves without locking feature)
- R** = Roll Cage
- S** = Single-stage pump unit
- T⁷⁾** = Pressure transducer ⁹⁾
- U⁷⁾** = Foot Switch

¹⁾ ZE5 and ZE6-Series only available with 3-phase electric motors.

²⁾ 4 and 8 litres only available on ZE3 and ZE4-Series.

³⁾ 1-phase motors only available on ZE3 and ZE4-Series

⁴⁾ 208-240V, 1 ph with European plug EMC directive compliant.

⁵⁾ Models with 3-ph motors without Electric Box shipped without cord, motor starter or overload protection.

⁶⁾ Not available on pumps with pressure transducer (T).

⁷⁾ Requires Electric Box.

⁸⁾ Not available on 4 and 8 litres reservoir.

⁹⁾ Provides digital pressure read-out on LCD-display of electric box.

¹⁰⁾ When using solenoid valve on valve type "W" order optional pendant.

All Z-Class electric pumps comply with TÜV and CE requirements.

ZE Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

0,55 - 2,73 l/min

Motor Size:

0,75 - 5,60 kW

Maximum Operating Pressure:

700 bar

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: **283**

How to Order Single-Stage Pumps

To specify a single-stage pump, place the letter "S" at the end of the model number. For example: **ZE4210ME-S** ZE4-Series pump, oil flow 0,82 l/min at 700 bar, VM32 manual valve, 10 litres reservoir, without electrical box, without pendant, 240 Volt 1-phase electric motor and single-stage pump unit.

Assisted Return Pumps

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

Page: **116**

Spring Centred Valve Kits

VM and VC-Series manual 3-position valves can be easily converted into spring centred valves. With these retro-fit kits the handle will automatically move into the neutral valve position when released.

Page: **117**

▼ Shown: PEM-8418

- Panel-mounted pressure gauge and adjustable relief valve for system pressure control
- Two-speed pump design, with high by-pass pressure, for rapid cylinder advance
- Dual-voltage motor (230/460 VAC, 3-phase)
- Full length reservoir sight tube with integral thermometer for ease in monitoring oil level and temperature
- Low voltage controls to protect the pump operator.

The Largest Pump for the Largest Jobs

Locking Valves

Pumps with VM43 manual valve are available with VM43L manual valve with pilot operated check valve for positive load holding. Add suffix "L" to pump model number.

Page: 116

FS-34 Foot Control Switch

This 3-position switch allows hands-free control of the solenoid valve on the pump. Operates 24V and 115V valves that use the square electrical connector.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 122

◀ With similar specifications, a gasoline-powered EGM-8000 Series is shown here performing a synchronized lift.

PE8000-Series, Electric Pumps

About the 8000-Series

The 8000-Series is the largest pump in the Enerpac line and the best choice to power most large size cylinders, multiple cylinder circuits, and applications where the need for high speed requires high flow rates.

The 8000-Series, with its large reservoir capacity, is best suited for large jobs and may be the only solution because of the required oil capacity. For further application assistance see our "Yellow Pages", or consult your local Enerpac office.

PE Series

Reservoir Capacity:

94 litres

Flow at Rated Pressure:

6,3 l/min

Motor Size:

9,3 kW

Maximum Operating Pressure:

700 bar

Speed Chart

	68	PER-8418	255	700	13,9	6,3	Solenoid VE43	4-way, 3-position	33,0	230	78 - 84	347
	68	PER-8418C	255	700	13,9	6,3			16,5	460	78 - 84	347

¹⁾ Oil flow rate will be approximately 6/5 of these values at 60 Hz.

²⁾ Consult Enerpac for availability of other voltages.

PA-Series, Air Hydraulic Foot Pumps

▼ Shown: PA-1150, PA-133

PA Series

Reservoir Capacity:
0,6 - 1,3 litres

Flow at Rated Pressure:
0,13 l/min

Air Consumption:
255 l/min

Maximum Operating Pressure:
700 bar

Reservoir Conversion Kit

Double the reservoir capacity of your existing PA-133 with this easy to install conversion kit.

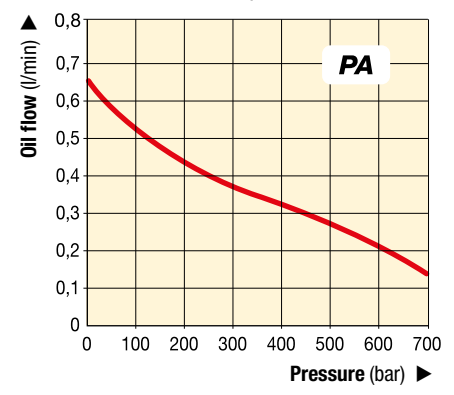

Model Number

PC-66

- Rugged construction – built for long life and easy service
- Swivel coupling simplifies hydraulic connection and pump operation
- Three-position treadle provides cylinder advance, hold or retract operation
- Operates in all positions for increased versatility in use and mounting (except PA-1150)
- Base mounting slots provided on PA-133.

OIL FLOW VERSUS PRESSURE

at 6,9 bar air pressure

Used with Cylinder	Usable Oil Capacity (cm ³)	Model Number	Pressure Rating (bar)	Output Flow Rate (l/min)		Valve Function	Air Pressure Range * (bar)	Air Consumption (l/min)	Sound Level (dBA)	Weight (kg)
				No load	Load					
Single-Acting	589	PA-133	700	0,65	0,13	Advance / Hold / Retract	4,1 - 8,3	255	85	5,4
	1311	PA-1150	700	0,65	0,13	Advance / Hold / Retract	4,1 - 8,3	255	85	8,2

* Recommended Regulator-Filter-Lubricator: RFL-102.

PAM-Series, Air Hydraulic Pumps

▼ Shown: PAM-1041

- Twin air motor configuration delivers high-flow performance in first stage, up to 14 bar, for rapid cylinder advance
- 4 and 8 litres reservoirs for use with a wide range of cylinders
- Integral shroud protects air motors and provides easy portability.

PAM Series

Reservoir Capacity:

4,0 - 8,0 litres

Flow at Rated Pressure:

0,15 l/min

Air Consumption:

510 l/min

Maximum Operating Pressure:

700 bar

Locking Valves

Pumps with 4/3 manual valves are available with 4/3 manual locking valves instead. Add suffix "L" to pump model number.

Page: 116

Remote Air Valve

For remote operation of PAM-Series air pumps. Permits either hand or foot operation.

Model Number

VA-2

	7,6	PAM-1042	700	10,65	0,15	Advance / Hold / Retract	4/3	4,1 - 8,3	510	87	27,2

* Recommended Regulator-Filter-Lubricator: RFL-102.

▼ Shown from top to bottom: PAMG-1402N, PARG-1102N, PATG-1102N, PATG-1105N

- External adjustable pressure relief valve (behind sight glass)
- Return-to-tank port for use in remote valve applications
- Internal pressure relief valve provides overload protection
- Quieter operation – reduced noise level to 76 dBA
- Operating air pressure: 2,8 - 8,8 bar, enables pump to start at extremely low pressure
- High efficiency cast aluminium air motor
- Reinforced heavy-duty lightweight reservoir for applications in tough environments
- Air pendant for remote control operation.

Compact Air Over Hydraulic

Regulator-Filter-Lubricator

Recommended for use with all Turbo air pumps. Provides clean, lubricated air and allows for air pressure adjustment. Steel bowl guards are standard.

Model Number

RFL-102

Large Reservoir Models

The Turbo II Air Pump is also available with an enlarged reservoir: **PATG-1105N, PAMG-1405N** and **PARG-1105N**.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

▼ Shown: XA11G

- Ergonomic design for less operator fatigue
- Variable oil flow & fine metering for precise control
- Higher oil flow for increased productivity
- Closed hydraulic system prevents contamination and allows pump usage in any position
- Pedal lock function for retract position
- External adjustable pressure setting valve
- Ground screw for improved ATEX explosion safety.

▼ Easy operated by foot. No need to fully lift up foot – rest bodyweight on heel, resulting in a handsfree and stabile working position.

Productivity & Ergonomics

Optional Pressure Gauge

Integrated gauge with calibrated scale reading in bar, psi and MPa for actual pressure reading.

4/3 Control Valve

For powering double-acting hydraulic cylinders and tools.

2 Litres Reservoir

Double oil capacity for powering larger hydraulic cylinders and tools.

Pedal Safety Guard

Customer installed frame protects both pedals against accidental activation.

Model Number¹⁾

XPG1

"Joy-stick" Lever Kit

Customer installed set of handles for manual operation of both pedals.

Model Number¹⁾

XLK1

Swivel Connector

Customer installed swivel connector for optimal orientation of the hydraulic hose. See page 127 for details.

Model Number¹⁾

XSC1

¹⁾ Accessories must be ordered separately.

Air Driven Hydraulic Foot Pumps

Production Application

XA11 pump is used with a 13 tons RCH-Series hollow cylinder to compress and position diesel engine valve springs.

The operator benefits from the fine metering capacities of this pump to apply the mandatory precise stroke and force.

XA Series

Reservoir Capacity:

1,0 - 2,0 litres

Flow at Rated Pressure:

0,25 l/min

Air Consumption:

283 - 991 l/min

Maximum Operating Pressure:

700 bar

▼ XA-SERIES PERFORMANCE CHART

ZA4-Series, Modular Air Hydraulic Pumps

▼ Shown: ZA4208MX, ZA4420MX

Z Tough Dependable Innovative CLASS

- ATEX 95 certified for use in potentially explosive atmospheres
- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation reduces cycle time for improved productivity
- User adjustable relief valve built-in on manual valves. Oil ports on valves are 3/8" NPTF
- Optional heat exchanger warms exhaust air to prevent freezing and cools the oil
- Full sight oil level glass on 10, 20 and 40 litres reservoirs, oil level indicators on 4 and 6,6 litres reservoirs.

ATEX 95 Certified

The Enerpac ZA4-series air pumps are tested and certified according to the **Equipment Directive 94 / 9 / EC** "ATEX Directive" for equipment and protective systems intended for use in potentially explosive atmospheres.

³⁾ Dynamic air pressure range: 4 - 7 bar.

Modulair Air Hydraulic Pumps

▼ This is how a ZA4-Series pump model number is built up:

1 Product Type

Z = Pump Class

2 Prime Mover

A = Air motor

3 Flow Group

4 = 1,3 l/min @ 700 bar

4 Valve Type

- 0** = No valve, with cover plate
- 2** = 3/2 manual valve **VM32**
- 3** = 3/3 manual valve **VM33**
- 4** = 4/3 manual valve **VM43**
- 6** = 3/3 manual locking valve **VM33L** with pilot operated check
- 7** = 3/2 manual valve **VM22**
- 8** = 4/3 manual locking valve **VM43L** with pilot operated check.

5 Reservoir Size, usable oil

- 04** = 4 litres
- 08** = 6,6 litres
- 10** = 10 litres
- 20** = 20 litres
- 40** = 40 litres

6 Valve Operation

- M** = Manual valve
- N** = No valve

7 Motor Voltage

- X** = Not applicable

8 Options

- F** = Return Line Filter
- G** = 1000 bar gauge
- H** = Heat exchanger (on 4 and 6,6 litres reservoir only)
- K** = Skid Bar (on 4 and 6,6 litres reservoir only)
- N** = No reservoir handles (includes lifting eyes on 10, 20 and 40 litres)
- R** = Roll Cage

Ordering Example

Model Number: **ZA4208MX-FHK**
 ZA4208MX-FHK is an air operated pump with a 3-way, 2-position manual valve, 6,6 litres reservoir, filter, heat exchanger and skid bar.

ZA4 Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

1,3 l/min

Air Consumption:

2840 l/min

Maximum Operating Pressure:

700 bar

- ① User adjustable relief valve on all manual valves. 3/8" NPTF on A and B ports; 1/4" NPTF on auxiliary ports.
- ② Air inlet 1/2" NPTF
- ③ Return Line Filter (optional)
- ④ Oil Sight Gauge
- ⑤ Roll Cage (optional)
- ⑥ Oil Drain
- ⑦ Lifting eyes (optional)
- ⑧ Handles
- ⑨ Skid Bar (Modelnr. SBZ-4) (optional)

ZG-Series, Gasoline Hydraulic Pumps

▼ Shown from left to right: ZG6440MX-BFCH and ZG5420MX-B

Z Tough, Dependable, Innovative CLASS

ZG-Series, Gasoline Pump Performance

Elevation can affect the performance of any gasoline engine. ZG-Series pumps are designed to develop rated performance at elevations up to 1500 m. For applications above this elevation, please consult your Enerpac office.

- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation reduces cycle time for improved productivity
- User adjustable relief valve built-in on manual valves. Oil ports on valves are 3/8" NPTF
- Available in three 4-cycle engine sizes: 4,1 kW Honda and 4,8 kW and 9,7 kW Briggs & Stratton
- Full sight oil level glass on all reservoirs allow quick and easy oil level monitoring.

ZG6-Series

- Easy serviceable 9,7 kW, 4-cycle gasoline engine with electric start, pressurized oil and 12 Volt charge output for accessories
- Dual forced air heat exchangers stabilizes hydraulic oil temperature
- Sturdy wheeled cart with collapsible handles.

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 134

User Adjustable Relief Valve

All VM-Series directional valves have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Page: 117

Directional Control Valves

Energac hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Energac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 700 bar, the range of Energac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

Assisted Return Pumps

To improve productivity and plunger retraction, Energac offers valve configurations designed to accelerate your cylinder

retraction speeds. ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders.

▼ Shown from left to right: VM32, VE33, VM33, VM43L, VE43

- Advance/Retract and Advance/Hold/Retract operation of single- and double-acting cylinders and tools
- Manual or solenoid operation
- Pump mounting will retrofit on most Enerpac pumps
- Available “locking” option on VM-Series valves for load-holding applications
- Standard “locking” feature on VE-Series 3-position valves
- User adjustable relief valve allows the operator to easily set the working pressure.

Venturi Valve Technology

- For fast return of single-acting gravity and spring return cylinders
- Available as manual or solenoid valve on ZU4- and ZE-Series electric pumps
- Retrofit Venturi valve kits for field installation on existing ZU4- and ZE-Series electric pumps.

Adjustable relief valve

All valves feature several gauge ports for “system”, A port and B port pressure monitoring. User adjustable relief valves are included on all models to allow the operator to easily set the optimum working pressure for each application.

VM33 and VE43 valves include “System Check” feature, for more precise pressure holding and improved system control.

The VM33 has improved porting which provides faster cylinder retraction while motor is running.

Locking Valves

For applications that require positive load holding, VM-Series valves (except VM22 and VM32) are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components

Section for a full range of gauges.

Page: **120**

Fittings

For additional fittings see the fitting page of the System Components section in this catalogue.

Page: **127**

Valving Help

See Basic System Set-Up and Valve Information in our 'Yellow Pages'.

Page: **284**

Enerpac System Components: all the additional elements you need to complete your high pressure hydraulic system and get started.

Engineered to work with your Enerpac cylinders, pumps and tools, all Enerpac components are designed to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges, Enerpac has the accessories to complement your system and ensure the efficient operation, long life and safety of your hydraulic equipment.

Yellow Pages

For sample system set-ups and how to correctly specify your system components, please view the Enerpac "Yellow Pages" section in this catalogue.

Page: **273**

Maintain System Integrity

Use Enerpac System Components, designed to interface with Enerpac cylinders, pumps and tools to ensure your system operates at peak performance.

H-Series, High Pressure Hydraulic Hoses

▼ Shown from top to bottom: HC-7206, HC-7210 and HC-9206

- Crimped-on rubber strain relief for improved life and durability on all models.

Thermo-plastic Hoses (700-Series)

- For demanding applications, featuring a 4:1 design factor
- Maximum working pressure of 700 bar
- Two layers of steel wire braids
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency

Heavy-duty Rubber Hoses (900-Series)

- The most complete offering: 35 models up to 15 metres in length
- Rubber coated with two layers of steel wire braids
- Designed to comply with Material Handling Institute IJ-100 hose specification
- Flexible, with little “memory”, is the best choice for long hose runs.

▼ To prevent back pressure and to increase cylinder retraction speed, when using long hoses with single-acting cylinders, the Enerpac HC-7300-Series of hoses with increased internal diameter is the best choice.

Emphasize Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 700 bar maximum pressure.
- Do not handle hoses which are under pressure.

More safety instructions in our ‘Yellow pages’.

High Pressure Hydraulic Hoses

Hose Oil Capacity

When using greater hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses.

To determine the hose oil capacity, use the following:

For 6,4 mm inside diameter hoses:

Capacity (cm³) = 32,17 x Length (m)

For 9,7 mm inside diameter hoses:

Capacity (cm³) = 73,90 x Length (m)

H700 H900 Series

Inside Diameter:

6,4 - 9,7 mm

Hose Length:

0,6 - 15 m

Maximum Operating Pressure:

700 bar

* For technical information on couplers see next page.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 134

Torque Wrench Hoses

Use Enerpac twin safety hoses with double-acting wrenches to ensure the integrity of your hydraulic system.

Page: 220

Fittings

For additional fittings see the fitting page of the System Components section.

Page: 127

Premium Hydraulic Oil

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

Page: 126

▼ Shown: FH-604, FR-400, AR-630, C-604, AH-604, AR-400

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Includes "2-in-1" dust cap for use on male and female couplers.

3/8" High Pressure 'Flush-face' Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage and reduced pressure drop
- HTMA* recognized for safety and performance
- Will not interchange with low pressure couplers.

3/8" Regular Spee-D-Couplers®

- For medium duty applications with hand pumps
- Includes female aluminium dust cap.

1/4" Regular Couplers

- For use with small cylinders and hand pumps
- Includes female aluminium dust cap.

1/4" Spin-on Torque Wrench Couplers

- For use with 700 bar S and W-Series torque wrenches, THQ-Series hoses and 700 bar torque wrench pumps.

Quick Connection of Hydraulic Lines

Thread sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon paste. When using Teflon Tape, apply the tape one thread from the end of a fitting to prevent it from winding up in the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected and should not be coupled or uncoupled when pressurized. More safety instructions in our 'Yellow Pages'.

Page: 274

F-Series

Flush-faced couplers provide reduced pressure drop versus other types and are preferred in dirty, grimy construction and mining environments due to easy clean, non-dirt trapping faces.

▼ With the use of Enerpac high flow couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

* Hydraulic Tool Manufacturers Association.

Hydraulic Couplers

CT-604 Safety Tool

Use the Enerpac CT-604 to relieve hydraulic back pressure by safely bleeding the hydraulic coupler.

Minimize injuries from projectile parts and under-skin hydraulic fluid injections by eliminating unsafe coupler bleeding practices. The CT-604 is Enerpac-engineering safe for use at 700 bar.

NOTE: For use on C-Series 700 bar High-Flow Couplers only

* GF-Series Force gauges with metric scale reading (bar, kN) are available by changing the suffix 'P' into 'B'.

▼ Shown from left to right: H4049L, G-2534R, G-4089L, G-2535L, G-4040L

Visual Reference of System Pressure

Glycerine Filled (G-Series)

- Dual scale reading calibrated in bar and psi
- All pressure sensing parts sealed and dampened by glycerine for long life
- Includes safety blow-out disk and pressure equalizing membrane
- Gauge snubbers or needle valves recommended for high cycle applications.

High Cycle Dry Gauges (H-Series)

- Dual scale reading calibrated in bar and psi
- Ideal for use in many applications, specifically for high cycle and harsh environments
- Gauge snubbers or needle valves recommended to shut off gauge when not in use.

Gauge adaptor assembly

45° Angled gauge adaptor **GA45GC** improves safe working conditions.

Page: 134

Gauge Adaptor

For easy gauge installation into almost any system, Enerpac offers a complete line of gauge adaptors.

Page: 135

Snubber Valve V-91

Infinitely adjustable for metering oil out of a gauge. The V-91 Snubber Valve is also suitable as a shut-off valve to protect the gauge during

high cycle applications.

Page: 136

◀ When lifting or pressing, always use a gauge. A gauge is your 'window' to the system. It lets you see what's going on.

Hydraulic Pressure Gauges

CAUTION!
When lifting or pressing,
always use a gauge.

Do not override factory setting of relief valves. Always use a gauge to check system pressure. A gauge is your 'window' to the system. It lets you see what's going on. See our Safety Instructions.

T-Series, Test System Gauges

▼ T-6003L

- Dual scale reading calibrated in bar and psi
- All gauges have spring-loaded backs with rubber blow-out plugs to protect case assembly in case of over-pressurization
- Integral maximum indicator pointer standard included
- 2800 and 3500 bar models include flange mounting
- ½" NPTF versions are made of high strength alloy steel
- 0.25" cone models are made of 316 stainless steel, with 403 stainless steel on 2800 and 3500 bar models.

▼ An Enerpac P-2282 hand pump equipped with a T-6011L test system gauge is used for proof pressure testing of hydraulic valves.

T Series

Digital Hydraulic Pressure Gauge

▼ DGR-2

- Rated for system pressure up to 1380 bar
- Displays in bar, psi, MPa and kg/cm²
- Zero reset - ensures that gauge reads actual pressure
- IP65 protection, UL listed, CE and RoHS compliant
- Batteries included, condition indicator on read-out
- Shut-off selectable – menu driven
- Back-lit readout allows easy reading in less than ideal lighting
- Protective cover included.

High Pressure Rating (bar)		High Pressure Rating (MPa)		Model Number	High Pressure Rating (psi)		High Pressure Rating (kg/cm ²)

Your Hydraulic Control Solution

Valve Applications

To see these valves used in typical hydraulic circuits, please see our 'Yellow Pages'.

Page: **278**

▼ The V-152 pressure relief valve limits the pressure or force developed in the hydraulic system.

- All valves are rated for 700 bar operating pressure
- All valves feature NPTF porting to insure against leakage at rated pressure
- All valves are painted, coated, or plated for corrosion resistance
- Viton® seals (in V-66NV and V-152NV) for high temperature applications, nickel-plated for maximum corrosion resistance.

Valve dimensions in mm

Pressure and Flow Control Valves

Control Manifolds

Page: 126

Fittings

For additional fittings see the fitting page of the System Components section in this catalogue.

Page: 127

V Series

Maximum Operating Pressure:

700 bar

Valve Type and Model Number		Description		Hydraulic Symbol
Needle Valve V-82 V-182 V-8F		V-82: To control cylinder speed. Can also be used as shut-off valve for temporary load holding. 3/8" NPTF ports, nickle plated. V-182: Same as V-82, but with 1/4" NPTF female ports, nickle plated. Also	suitable for gauge snubbing (also V-82). V-8F: Like V-82, but with very fine metering for precise flow control 0,16-14,7 l/min at 275 bar. Not recommended as shut-off valve.	
Snubber Valve V-91		V-91: Infinitely adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released.	Also suitable as shut-off valve to protect the gauge during high cycling applications. 1/2" NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Auto Damper® Valve V-10		V-10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly. No adjustments are necessary.	1/2" NPTF male and female threads for use with GA-1, GA-2 or GA-4 gauge adaptors.	
Check Valve V-17		V-17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. 3/8" NPTF female port.		
Pilot Operated Check Valve V-42		V-42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with double-acting cylinders where pilot port receives pressure from a Tee-fitting in the cylinder retract line.	3/8" NPTF female ports. Pilot presure ratio 14% (6,5:1).	
Manually Operated Check Valve V-66, V-66NV * V-66F		V-66, V-66NV: For load holding applications with single and double acting cylinders. Valves allow oil to flow back to tank when cylinder retracts. V-66NV with Viton seals, nickel-plated.	V-66F: Similar to V-66, but with very fine metering capability for precise flow control. V-66F is not designed for load holding.	
Pressure Relief Valve V-152 V-152NV *		V-152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force imposed on other components. Valve opens whenever preset pressure is reached.	To increase pressure setting, turn handle clockwise. Includes: • 0,9 m return line hose kit, • ± 3% repeatability, • 55-700 bar adjustment range.	
Sequence Valve V-161		V-161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V-161 setting. When this pressure level is reached, the V-161 opens to allow flow to the secondary circuit.	A pressure differential is always maintained between the primary and secondary circuit. Mininum operating pressure: 140 bar.	

* See page 58 for more information about products for use in high temperature and extreme environment applications.

Enerpac Hydraulic Presses are available in a variety of capacities and sizes. The press frames are designed for maximum strength and durability. Strong frames and powerful high-pressure hydraulics will provide years of dependable service in many applications.

Enerpac Presses are available in Bench, H-Frame, Roll-Frame, C-Frame and Arbor models.

These Press features increase productivity and broaden the range of applications:

Exclusive Hydra-Lift™

Standard on many Enerpac IP Presses, the exclusive Hydra-Lift™ offers effortless adjustment to the press daylight by use of a hydraulic lift.

Side-to-Side Cylinder Movement

Easy horizontal cylinder position is achieved with the unique "roller-head" cylinder mounting block, standard on most Enerpac IP-Series Presses.

Optional "V-blocks"

For positioning of complex parts, are designed with high-strength steel for long life.

Press Section Overview

Available in capacities from 10 to 200 ton, each Enerpac press consists of three basic high quality components: a press frame, a power source and a cylinder.

Press Frame

Press frames include features like workpiece side-loading and height adjustment of the upper and lower bed.

Power Source

Depending on the production requirements, Enerpac presses can be powered by manual, air-hydraulic and electric-drive power sources.

Cylinder

Depending on the application, double-acting cylinders offer increased efficiency. Check out the Selection Charts for the press best suited for your needs.

Gauge

All Workshop, H-Frame and Roll-Frame Presses feature an easy to monitor pressure/force gauge for increased safety.

Capacity ton (kN)	Press type and functions	Serie		Page

4500 kg 900 - 90.000 kg	Tension Meters Load Cells	TM LH		149 ▶

IMPORTANT!

The pressframe of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

In order to fully comply with workplace health and safety legislation, some presses must be equipped with specific safety components, such as spring centered valves, two-hand control devices, guards or others.

Enerpac standard general purpose presses are supplied without guards. However, your application may require that measures should be taken to reduce the risk of injury to operators and other personnel by providing appropriate safeguarding, training and conducting a risk assessment, which eliminates or reduces danger.

▼ IPE-5060IPL H-Frame Press

IP-Series, H-Frame Presses

- Quality welded frame for maximum strength and long life
- Exclusive "Hydra-Lift™" bed for effortless adjustment of the vertical daylight (10-ton models are manual)
- Roller head design is standard to allow movement and locking of the cylinder from side to side (10-ton, 25-ton and 30-ton are manual).

VLP-Series, Presses

- Unique "Hydrajust" bed positioning device on 100 and 200 ton VLP-presses allows adjustment of the lower bed.

◀ IP-Series press with safety cage to ensure additional operator safety.

Setting the Industry Standard

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 148

Hydra-Lift™

Allows easy and effortless daylight adjustment. Standard on most IP-Series H-Frame Presses.

Page: 148

Pump Mounting Bracket

Heavy-duty steel brackets allow mounting of one of the Enerpac Power Sources to power your press.

Page: 148

V-Blocks

V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the

press bolster.

Page: 148

Gauge Included

All standard press models include a gauge and gauge adaptor, matching the press capacity.

H-Frame Press Gauges

All press models include a gauge and gauge adaptor, matching the press capacity:

Press Capacity tons (kN)	Gauge Model Number	Adaptor Model Number
10 (101)	GF-10P	GA-2
25 (232)	GF-20P	GA-2
30 (295)	GF-835P	GA-3
50 (498)	GF-50P	GA-2
100 (933)	GF-871P	GA-3
150 (1386)	GF-200P	GA-3
200 (1995)	GF-200P	GA-3

For more information on gauges, please refer to the System Components section.

Page: 128

Spring Centred Valves

To convert standard VM-Series manual valves use the spring centered valves kits.

For valve model	Model Number
VM33, VM43	VMC3343K
VM33L, VM43L	VMC3343KL

Page: 119

▼ Shown: IPR-5075IPL

- Quality welded frame for maximum strength and long life
- Frame rolls easily on 4 steel roller bearings
- Exclusive 'Hydra-Lift' bolster for effortless adjustment of the vertical daylight
- Roller head design is standard to allow lateral movement and locking of the cylinder up to 300 mm left or right of centre
- All models in the quick selection chart have been matched to an electric pump, double-acting cylinder, hose and gauge, offering the complete package
- Roll-Frame design features a stationary bed with the ability to support heavy loads.

Expert Designed Versatility

Cylinder Mounting Block

Allows cylinder mounting into a press frame, while also allowing side to side adjustment of cylinder position.

Page: 148

Hydra-Lift™

Allows easy and effortless daylight adjustment. Standard on most IP-Series H-Frame Presses.

Page: 148

Pump Mounting Bracket

Heavy-duty steel brackets allow mounting of one of the Enerpac Power Sources to power your press.

Page: 148

V-Blocks

V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 148

Roll-Frame Presses

▲ For offshore application high capacity spring loaded cylinders need to be assembled and tested. A special 100 ton roll frame press, with long stroke cylinder has been constructed. All movements are operated and monitored through a PLC controlled pendant.

IMPORTANT!

The pressframe of the presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

IPR Series

Capacity:

50 - 200 ton

Maximum Daylight x Width:

1295 x 1219 mm

Maximum Operating Pressure:

700 bar

▼ Shown from left to right: A-220, A-330 and A-258

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions.

Arbor Press

- 10 and 30 ton capacity
- Foot mounting holes for horizontal or vertical positioning
- Machined working surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts.

Bench Press Frame

- Cylinder mounting adaptor allows lateral positioning along rails
- Mounting holes for easy mounting to fix surface.

The Standard Workshop Tools

Push Pin A-183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A-13).

Page: **174**

Smooth Saddle A-185

For pressing applications of delicate parts, such as aluminium castings, this saddle decreases surface marks during the pressing application. Requires 10 ton cylinder and threaded adaptor saddle (A-13).

Page: **175**

Hydraulic Cylinders

Cylinders for C-Clamps and Arbor Presses must be ordered separately.

Page: **5**

Hydraulic Pumps

Pumps for C-Clamps and Arbor Presses must be ordered separately.

Page: **69**

Cylinder Speed and Pump Selection Chart

This chart will help you calculate the time required for an Enerpac cylinder to extend when powered by a 700 bar (10.000 psi) Enerpac hydraulic pump. The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

Cylinder Capacity (ton)	Cylinder Load	Hand Operated Pumps				Electric Pumps					Air Pumps

Tension Meter and Load Cells

▼ Shown: LH-102 and TM-5 (in middle)

TM LH Series

Capacity:

900 - 90.000 kg

Accuracy, % of full scale:

± 2%

TM and LH models are 100% tested to verify accuracy within a ± 2% range.

If your application requires a calibrated tool, it must be submitted for certification testing. Certification is NOT available from Enerpac.

Tension Meter TM-5

- Accuracy ± 2% of full scale
- Zinc and bronze plated to resist corrosion
- Dual-range readout in kilograms and pounds
- Maximum indicating pointer reading for pre-selected forces or to maintain force readings
- Cushioned metal case provides safe storage and transport.

Load Cells LH-Series

- Accuracy ± 2% of full scale
- Swivel loading pad reduces eccentric loading for improved accuracy
- Maximum indicating pointer reading pre-selected forces or to maintain maximum force readings
- Dual-range readout in kilograms and pounds.

TM-5

LH-Series

Enerpac offers a complete line of pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical, hydraulic, Sync Grip or the patented Posi Lock® system, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Sync Grip Pullers

The sync grip mechanism synchronizes movement of jaws for simultaneous engagement, helping to prevent misalignment for safe and easy use. Mechanical and hydraulic configurations are available with a variety of optional accessories that expand application range and increase utility.

Posi Lock® Pullers

The puller that meets the safety challenge. A control cage holds the pulling jaws securely in working position. This patented feature reduces the possibility of the puller jaws slipping off the work surface, thereby increasing productivity and tool life and reducing dangerous situations for the user. The Posi Lock® feature is available in a mechanical or hydraulic version.

WARNING

Do not exceed 50% of the rated puller capacity when using two jaw configurations, a double crosshead (2 grip arms) or when using puller legs in combination with bearing puller attachments.

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for details.

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

Puller Section Overview

When selecting a puller it is important to consider 3 basic specifications:

1. The Capacity:

is the amount of force the puller is capable of producing.

Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled.

For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from.

For hydraulic pullers, the capacity in tons should be 0,28 to 0,4 times the shaft diameter in mm. Use the following chart:

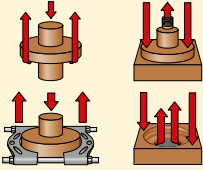

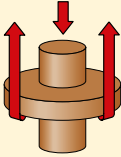

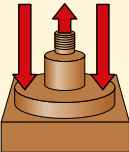

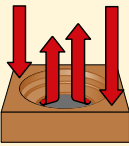

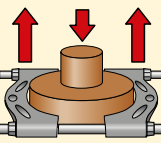

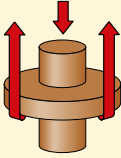

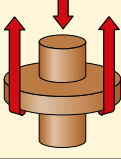

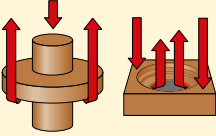

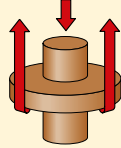

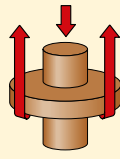

Shaft Diameter	Puller Capacity
0 - 25 mm	13 ton
25 - 50 mm	22 ton
50 - 89 mm	33 ton
89 - 140 mm	45 ton

2. The Reach:

is the distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. The Spread:

is the distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity ton	Puller Type	Series	Page
	13-45	Master Puller Sets Max. Reach: 252 - 700 mm Max. Spread: 247 - 1100 mm	BHP	152 ▶

▼ Shown: Master Puller Set BHP-3751G

Multi Purpose Puller Set

WARNING!

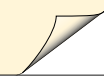

Do not exceed 50% of the rated puller capacity when using two jaw configurations, a double crosshead (2 grip arms) or when using puller legs in combination with bearing puller attachments.

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge, gauge adaptor and wooden case
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Separator, which can be ordered separately, see items nr. 10, 20, 30 and 40.

▼ Maintenance engineers throughout the industry greatly appreciate the Enerpac Master Puller sets.

Bearing Puller

Bearing Separator has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms.

The Bearing Separator can be used with the Cross Bearing Puller or the Grip Puller.

Overview and Dimension Guide

The Enerpac Sync Grip multi-purpose puller range is designed to make your jobs easier and safer to accomplish.

Remove bearings, bushings, gears, sleeves, wheels and flywheels, sprockets and other shaft mounted items simply and effectively.

Mechanical and hydraulic configurations are available with a variety of optional accessories that expand application range and increase utility.

Hydraulic models are available in standard sets which include detachable hydraulic cylinders and a choice of pump options, along with a gauge assembly and hose for safe monitoring of applied pulling forces.

* Puller capacity at 540 bar, maximum cylinder capacity at 700 bar is 54 ton.

** Weight of SGH-models with standard legs and hydraulic cylinder.

Sync Grip Pullers: available in both mechanical or hydraulic versions. Some models can be configured as a two jaw puller, however, three jaws are recommended for most even distribution of pulling forces.

Cross Puller: hydraulically powered via detachable cylinder and choice of pump. The Cross Puller can be used individually as a 'push' puller or in conjunction with the Bearing Separator or Bearing Cup Puller.

Bearing Separator: use where access is restricted. The Bearing Separator is used in conjunction with the Cross Puller.

Bearing Cup Puller: specifically designed for cup style bearing and other applications requiring an internal style puller.

Detachable Hollow Cylinder: provided with all hydraulic puller models including both the standard Sync Grip and Cross Puller.

In Sync Grip, Cross Bearing and Master Puller Sets a hose and gauge are provided as standard along with your choice of pump including manual hand operated, cordless battery powered, electric or air powered. In each case the pump selection has been optimized for compatibility with the pullers.

Easy To Use

Simple, Safe, Productive

All three jaws close simultaneously making the puller easier and safer to operate.

The synchronous feature of the SGM and SGH-Series Pullers makes positioning the puller simple and helps prevent misalignment.

SGM-Series, Mechanical Sync Grip Pullers

▼ SGM10 Mechanical Sync Grip Puller with three jaws

SGM Series

Puller Capacity:
1 - 20 ton

Maximum Reach:
105 - 600 mm

Maximum Spread:
110 - 680 mm

Dimensions

Dimensional information for all puller models is included in the dimensional overview and dimension guide.

Page: **156**

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement, helping to prevent misalignment for safe and easy use
- Threaded spindle and jaw indexes provide adjustable reach
- Three-jaw configuration for even load distribution
- Two-jaw configuration for confined access applications available on pullers of 1 to 10 ton (not available on SGM20)
- High-strength forged jaws for superior reliability
- Suitable for a variety of applications including bearings, bushings, wheels, gears and pulleys.

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

WARNING!

Do not exceed 50% of the rated puller capacity when using two jaw configurations.

▼ SGM10 with two jaws.

Hydraulic Sync Grip Master Puller Sets

▼ MPS14H

MPS Series

Puller Capacity:
13 - 45 ton

Maximum Reach:
320 - 700 mm

Maximum Spread:
350 - 980 mm

Maximum Operating Pressure:
700 bar

Dimensions

Dimensional information for all puller models is included in the dimensional overview and dimension guide.

Page: 156

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement
- Hydraulically applied pulling force increases pulling capacity reducing operator fatigue
- Standard jaws adjust to accommodate different reach requirements. Optional long jaws sets available for additional reach requirements
- Designed for applications including pulling, pushing and dismantling gears, bearings, bushings, etc.

WARNING!

Do not exceed 50% of the rated puller capacity when using two jaw configurations.

Master Puller Sets include: ¹⁾

Hydraulic Sync Grip Puller Sets

▼ GPS14H

SGH, GPS Series

Puller Capacity:
13 - 45 ton

Maximum Reach:
320 - 700 mm

Maximum Spread:
350 - 980 mm

Maximum Operating Pressure:
700 bar

Dimensions

Dimensional information for all puller models is included in the dimensional overview and dimension guide.

Page: **156**

- Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement
- Hydraulically applied pulling force increases pulling capacity and reduces operator fatigue
- Threaded spindle and jaw indexes provide adjustable reach
- Three jaw configuration for even load distribution
- High strength forged jaws for superior reliability
- The versatile puller set facilitates safe and easy dismantling in a variety of applications.

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

For 230 Volt application with cordless pump add suffix "E" to model nr; example MPS14CE

▼ Shown from left to right: EP-206, EP-108

- Patented 'Safety Cage' jaw retention system
- Roll threaded shafts for less effort when applying high torque
- Slim tapered jaws for improved gripping in tight spots
- Available in 2 and 3 jaw design and inside and outside pulling configuration
- More efficient pulling, as one man can do the job where manual pullers often require two operators.

For Safer and Faster Pulling

Long Jaws

Long Jaws are used to increase the reach and spread of manual pullers. They maintain the same pulling capacity as the standard jaws, but reduce clamping force by 25%.

Page: 165

Shaft Attachments

Shaft protectors and extenders are live centers that fit over the standard puller shaft for tip protection and additional reach.

Page: 165

Application Tip

Because of the unique safety cage design, Posi Lock® pullers will grip on surfaces where normal pullers would slip off; e.g. tapered bearings.

◀ Positioning an EP-104, 3-jaw puller on the drive pulley of an electric motor.

Posi Lock® Mechanical Grip Pullers

External Posi Lock® Pullers

- 1 Patented 'Safety Cage' guides jaws, holding them securely onto the part.
- 2 Durable forged jaws provide positive grip.
- 3 Jaw head provides pivot and reaction point for jaws.
- 4 Pin, for easy jaw removal and replacement.
- 5 T-handle provides control of the puller jaws.
- 6 Drive bolt with rolled threads for increased force with reduced input torque.
- 7 Snap-ring retains cage to drive bolt and provides quick removal for easy service.

EP EPP Series

Capacity:

2 - 40 ton

Maximum Reach:

101 - 355 mm

Spread Range:

12 - 635 mm

▼ QUICK SELECTION CHART EXTERNAL PULLERS

For quick technical information see next page.

Number of Jaws	Maximum Reach	Spread (min. - max.)	Capacity	Model Number	Center Bolt Diameter	
	(mm)					
2	101	12 - 127	2 (17)	EP-204	14	1,4
3	101	12 - 127	5 (45)	EP-104	14	1,8
2	152	12 - 178	6 (53)	EP-206	16	3,2
3	152	12 - 178	10 (89)	EP-106	16	3,6
2	203	19 - 304	12 (106)	EP-208	20	5,4
3	203	19 - 304	17 (151)	EP-108	20	6,4
2	245	25 - 381	14 (124)	EP-210	20	5,9
3	245	25 - 381	20 (178)	EP-110	20	7,3
2	304	63 - 457	25 (222)	EP-213	29	17,2
3	304	63 - 457	30 (267)	EP-113	29	20,0
2	355	76 - 635	35 (311)	EP-216	31	25,8
3	355	76 - 635	40 (356)	EP-116	31	30,8

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

Application Tip

In determining the correct manual puller capacity for your application, use the following rule:

The center bolt diameter of the puller should be at least ½ the diameter of the shaft being pulled on.

Example:

A part being pulled from a shaft with a diameter of 38 mm would require a puller with a center bolt diameter of at least 19 mm.

Enerpac offers an extensive range of dedicated tools for a variety of specific and flexible applications.

Whatever your requirement... cutting, punching, spreading or bending... you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Featuring maintenance sets, machine lifts and load skates, as well as hole punches, pipe benders and cable cutters, Enerpac has the tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Tool-Pump Sets

Most hydraulic tools in this section are available in sets, for a perfect tool-pump match.

Hydraulic System Set-up

Check out our 'Yellow Pages' section for help on system set-ups and valving configurations.

▼ Shown: MS2-10

- All sets include Enerpac pump, hose, cylinder and gauge
- Lock-on or threaded connectors
- Complete maintenance set for almost every maintenance application.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12,5 ton.

More Information

For detailed information on all included attachments, see the next pages.

Page: 174

Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets. ▶

▼ QUICK SELECTION CHART

Capacity using attachments* ton (kN)	Set Model Number						Number of Attachment Components	 (kg)
2,5 (22)	MS2-4	P-142	HC-7206	RC-55	GP-10S	GA-4	33	26
2,5 (22)	MSFP-5	P-142	HC-7206	RC-55	GP-10S	GA-4	24	20
5,0 (50)	MSFP-10	P-392	HC-7206	RC-106	G2535L	GA-3	23	48
5,0 (50)	MS2-10	P-392	HC-7206	RC-106	GP-10S	GA-2	35	63
12,5 (116)	MS2-20	P-392	HC-7206	RC-256	GP-10S	GA-2	13	95
5,0-12,5 (50-116)	MS2-1020	P-392	HC-7206	RC-102, -106, -256	GP-10S	GA-2	53	158

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 700 bar.

Universal Maintenance Sets

CAUTION!
When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (350 bar).

WARNING!
Only use attachments provided with set. Non-Enerpac attachments and longer extension tubes will reduce column strength, potentially creating unsafe conditions.

MS Series

Capacity (using attachments):

SP-Series, Lightweight Hydraulic Punch

▼ Shown: SP-35S

- 12,7 mm thick capacity through mild steel
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable steel case keeps tools and dies together and provides for easy carrying and storage
- CR-400 coupler included.

Much Faster than Drilling

Tool Kit SPK-10

Included with all 35 Ton punches, this tool kit is used to remove and install the punch into the head. Can be ordered as a replacement under model number **SPK-10**.

Ordering Information

The 35 ton hydraulic Punch may be ordered by itself or as a set, including a pump. A punch or die may also be ordered separately or as a matched set. Please refer to the Quick Selection Chart information on top of the next page.

LW-Series, Hydraulic Vertical Lifting Wedge

▼ LW-16 with SB-2 and optional LWB-1

- Requires very small access gap of only 10 mm
- Lifting force 16 ton at 700 bar hydraulic pressure
- Each step can spread under full load
- Straight vertical lifting
- Unique interlocking wedge design: no first step bending and risk of slipping out
- Single-acting, spring return cylinder
- Lifting wedge LW-16 includes safety block SB-2
- Includes RC-Series Cylinder with CR-400 coupler.

▼ For lifting heavy equipment with minimum floor clearance the LW-16 is the ideal tool.

LW Series

Maximum Lifting Force:

16 ton (157 kN)

Lifting Stroke:

21 mm

Tip Clearance / Maximum Spread *:

10 mm / 81,5 mm

Maximum Operating Pressure:

700 bar

Portable Hydraulic Toolbox

Toolbox with P-392 hand pump, gauge adaptor assembly, hose and LW-16.

Page: **59**

Control Manifolds

Control Manifold to control two or four lifting wedges simultaneously.
AM-21 with 3 ports 3/8" NPTF
AM-41 with 5 ports 3/8" NPTF.

Page: **126**

Maximum Lifting Force	Lifting Stroke	Model Number	Tip Clearance	Maximum Operating Pressure	Oil Capacity	
ton (kN)	(mm)		(mm)	(bar)	(cm ³)	(kg)
16 (157)	21	LW-16	10	700	78	9,0

Use optional stepped block LWB-1 to increase wedge lifting height by 30 mm.

* Using LWB-1.

▼ SOH-10-6

SOH Series

Lifting Capacity:

8,5 - 20 ton

Stroke:

136 - 157 mm

Toe Clearance:

20 mm

Maximum Operating Pressure:

700 bar

- For lifting heavy equipment with minimum available access
- Remote hydraulic pump enhances safety
- Low height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendable support feet provide extra stability
- Includes RC-Series DUO Cylinder with CR-400 coupler.

RSM-Series Flat-Jac®

Low height, single-acting spring-return cylinders are ideal for space restricted applications.

Page: 22

Load Skates

In combination with the Enerpac Machine Lifts we recommend Load Skates for moving heavy loads.

Page: 182

▼ Limited access under this machine makes the Enerpac hydraulic machine lift the perfect solution.

Capacity	Toe Clearance (mm)			Stroke	Model Number	Oil Capacity	Dimensions (mm)						🏋️ (kg)
	Minimum A1	Central A2	Maximum A3				Total Ext. Height C	Total Body Height D	F	H	J	K	
8,5 (75)	20	95	169	136	SOH-10-6	224	430	294	-	190	214	74	26
20 (178)	30	110	190	157	SOH-23-6	525	472	320	65	265	250	80	45

▼ Shown: Set ERS-20

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy transportation
- Attachable load leveling plates and swivel turntables for turning corners.

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications.

Two **ELB-1** link-up bars, two **ERH-1** handles (875 mm long) and one **EMB-1** metal box are included.

Optional long handle **ERH-2** (1180 mm) available for 60 and 80 ton only.

Lifting Wedge and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using the Enerpac Lifting Wedge or Machine Lifts.

Page: 180

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

▼ Chemical tank transportation: The first few centimetres the load was lifted with RCS-Series low height cylinders and then moved on to load skates for transportation.

▼ CM-16

- Protect your equipment from dust, water, grease and dirt
- Reduce losses on the jobsite, maintenance area or shop
- Durable steel, painted with rust-resistant primer and finished in durable enamel
- Heavy duty hinges and lifting handles
- Lockable.

▼ When not storing the lifting system, this heavy-duty storage case doubles as a work station.

CM Series

Case Size:

19 - 453 litres

Protect your Equipment

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of hydraulic powered tools.

Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12,5 ton.

Page: 172

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized

through the use of controlled hydraulic power.

1,0 (8,9)	35,0	A-92 *	158	–	–	3,6

* Maximum system pressure must be limited to half the rated pressure (350 bar).

A WR Series

Capacity:

0,75 - 1,0 ton

Tip Clearance:

12,8 - 35 mm

Maximum Spread:

94 - 292 mm

Maximum Operating Pressure:

700 bar

RC-Series Cylinders

10 ton RC-Series DUO cylinders (except RC-101) fit into A-92 Spreader Attachment.

Page: **6**

Portable Hydraulic Toolbox

Toolbox with hand pump, gauge adaptor assembly, hose and WR-5, RC-, RCS, RSM-or LW-Series cylinder.

Page: **59**

Best Match Hand Pump

To power your WR-5 and WR-15 the **P-392** hand pump is an ideal choice. Use Enerpac H700-Series hose (page 122) for hydraulic connection.

Page: **72**

▼ A WR-5 wedgie cylinder is used to loosen a bridge bearing.

WHC-Series, Hydraulic Cutterheads

▼ Shown from left to right: WHC-4000, WHC-750

- Single-acting, spring return on all models, except WHR-1250
- Guillotine action for smooth cutting operation
- Lifting handles on larger models for easy transport
- Carrying bag included for easy carrying and tool protection
- Ideal for use with most Enerpac pumps featuring 3-way valve or dump valve and 700 bar pressure rating (except WHR-1250, which requires 4-way valve)
- CR-400 coupler and dust cap included on all models.

WHC, WHR, STC Series

Capacity:
3 - 20 ton

Cutting Capacity:
Ø 13 - 101 mm

Maximum Operating Pressure:
700 bar

Tool-Pump Sets

STB-Series, Pipe Bender Sets

▼ Shown: STB-101H

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting.

Sweep shoes are used where increasing radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include genuine Enerpac cylinder, hose and manual, air or electric pump
- Sets are also available without hydraulics
- Bending shoes and bending frame are lightweight, heat-treated aluminium
- All sets include sturdy steel storage case
- All sets include BZ-12091 angle indicator for accurate bending
- BZ-12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB-202 models) have double-acting cylinder to eject pipe from the bending shoe.

▲ Typical one shot bending operation.

Enerpac's Bolting Solutions cater to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout the industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical alignment tools to synchronized PLC-controlled multi-point positioning systems.

Controlled Tightening

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application. From mechanical torque multipliers to hydraulic, pneumatic and electric square drive wrenches and from low profile torque wrenches to interconnectable bolt tensioning tools; we offer the products you need for accurate and simultaneous tightening of multiple bolts.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations.

High quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Bolting Integrity Software

Visit www.enerpac.com to access our free on-line bolting software application and obtain information on tool selection, bolt load calculations and tool pressure settings. A combined application data sheet and joint completion report is also available.

Torque Tightening and Tensioning

See our 'Yellow Pages' for information on Bolting Theory. See our Bolting Safety Instructions on www.enerpac.com

▼ Shown from left to right: E291, E393, E494

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Operator protected by anti-backlash device
- Torque multiplier accuracy $\pm 5\%$
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate style
- Angle-of-turn protractor standard on E300-Series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400-Series have replaceable shear drives, providing overload protection of internal power train
- One replacement shear drive is included with each E300 and E400-Series models.

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes.

◀ Enerpac Reaction Bar Torque Multiplier E393 used to manually torque bolts up to 4300 Nm.

▼ SELECTION CHART

Torque Multiplier Type	Nominal Output Torque		Model Number
	(Nm)	(Ft.lbs)	
Reaction Bar Multiplier	1015	750	E290PLUS
	1355	1000	E291
	1625	1200	E391
	2980	2200	E392
	4340	3200	E393
Reaction Plate Multiplier	2980	2200	E492
	4340	3200	E493
	6780	5000	E494
	10845	8000	E495

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available.

Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitive bolting applications.

Use Reaction Bar Models:

- Where space is limited,
- Where multiple reaction points are available,
- when portability is desirable.

Use Reaction Plate Models:

- Above 4300 Nm output torque,
- On flanges and applications where neighbouring bolt or nut is available to react against
- When extreme reaction forces are generated.

E Series

Nominal Output Torque:
1015 - 10.845 Nm

Torque Ratio:
3:1 - 52:1

Output Ratio Accuracy:
± 5 %

CAUTION!

Never use impact air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

Shearable Square Drive

Provides overload protection on E300- and E400-series multiplier's power train by shearing when the rated capacity of the tool is exceeded. Internal shear pin prevents tool from falling off bolt.

Torque Wrenches

Enerpac offers a complete range of hydraulic, pneumatic and electric torque wrenches.

¹⁾ E200 and E400-series do not have an Angle-of-Turn Protractor (scale).

²⁾ User must verify manual torque wrench accuracy prior to use to ensure accurate final output torque.

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handle comes standard with every S-Series (X-Edition) tool. Straight positioning handles are available as accessories.

Compatible S-Series (X-Edition) wrenches	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
S1500PX, S3000PX	SWH6A	SWH6S
S6000PX, S11000PX	SWH10A	SWH10S
S25000PX	SWH10EA ²⁾	

²⁾ SWH10EA is an eyebolt handle.

Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even with gloves on
- Includes robust handle which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening

Versatility

- Enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability ¹⁾

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation.

TSP300 Tilt & swivel manifold

Standard TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

ATEX declared. Calibration certificate included

All X-edition tools are CE - ATEX declared and are shipped complete with a calibration certificate.

¹⁾ TSP300 is designed for X-Edition tools only, and is not compatible with previous edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

X-Edition, Square Drive Torque Wrenches

Standard are: ① ② ④ ⑥ ⑧
Other items are optional.

- ① Drive Unit
- ② Angeled Positioning Handle
- ③ Straight Positioning Handle
- ④ Pro Series Swivel
- ⑤ Reaction Tube Extension
- ⑥ Standard Reaction Arm
- ⑦ Allen Drive
- ⑧ Square Drive
- ⑨ Short Reaction Arm
- ⑩ Extended Reaction Arm

Select the Right Torque
Choose your Enerpac Torque Wrench using the untightening rule of thumb:
Loosening torque equals about 250% of tightening torque.

S Series X-Edition

Nominal Torque Output:
35.455 Nm

Square Drive Range:
3/4 - 2 1/2 inch

Nose Radius:
25 - 64 mm

Maximum Operating Pressure:
690 bar

Use only Heavy Duty Impact Sockets
For power driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Enerpac professional series steel torque wrenches provide reliable controlled tightening solutions across the industry.

S3000X Square Drive Torque Wrench on wind tower erection and maintenance

S3000X used to connect wind tower segments during assembly and maintenance. A robust but compact solution is required for tightening of bolts on wind tower sections. Large numbers of fasteners require precise application of torque to ensure joint integrity is achieved and maintained. The Enerpac S-Series wrench was selected as it offers simple and reliable operation while providing accurate and repeatable results.

W4000X Low Profile Torque Wrench on an API Pipe Flange

Throughout the Oil and Gas, Petrochemical and Processing Industries, pipeline joints, valves, pumps and machinery present challenges for controlled bolting. The restricted access on this flange was easily overcome with an Enerpac W-Series Torque Wrench. These wrenches offer reliability and control, ensuring even and consistent torque is applied to all bolts.

S3000X on an oil and gas flange

During maintenance quick turnaround times are essential; S-Series wrenches are chosen as they provide a large angle of nut rotation per stroke, offering speed and accuracy in a compact ergonomic tool.

▼ Shown: W4000PX drive unit and W4206X hexagon cassette

Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety

Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Quick and easy disassembly for maintenance without special tools
- Include robust handle which mounts on both sides and the tops of cassettes to allow for extra maneuverability

Versatility

- Enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability ¹⁾
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools ¹⁾
- Drive unit compatible with UltraSlim and WCR-Series cassettes

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across full stroke.

Setting New Standards in Safety, Simplicity and Performance

Two Handle Styles

Robust angled positioning handle comes standard with every W-Series (X-Edition) cassette. Straight positioning handles designed for extreme limited

access applications are available as accessories.

Compatible with W-Series (X-Edition) Cassettes	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
W2000PX, W4000PX	SWH6A	SWH6S
W8000PX, W15000PX	SWH10A	SWH10S
W22000PX, W35000PX	SWH10EA ²⁾	

²⁾ SWH10EA is an eyebolt handle.

TSP300 Tilt & swivel manifold

Standard TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

ATEX declared. Calibration certificate included.

All X-edition tools are CE - ATEX declared and are shipped complete with a calibration certificate.

¹⁾ TSP300 is designed for X-Edition tools only, and is not compatible with previous edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

Double-Acting Hydraulic Hexagon Torque Wrenches, X-Edition

- ① Hexagon Cassette (pages 202-209)
- ② Drive Unit
- ③ Angled Positioning Handle (page 200)
- ④ Straight Positioning Handle
- ⑤ Pro Series Swivel
- ⑥ Extended Reaction Arm (page 213)
- ⑦ Reducer Insert (pages 202-209)
- ⑧ Reaction Paddle (page 213)

Items ① to ⑤ are standard.
Items ⑥ to ⑧ are optional.

W Series X-Edition

Nominal Torque at 690 bar:

47.454 Nm

Hexagon Range:

30 - 155 mm / 1 1/16 - 6 1/8"

Nose Radius:

31 - 115 mm

Maximum Operating Pressure:

690 bar

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

Page: **220**

These rigid steel wrenches with low profile interchangeable hexagon cassettes guarantee durability and maximum versatility in bolting applications. ▶

▼ W4206SL bi-hexagonal cassette with W4000X drive unit

Your easy and long lasting solution to difficult access bolting applications

UltraSlim: Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

Built to Outperform

High endurance components keep working when others fail.

Top Mounted Straight Handle

The top mounted straight handle is standard and provides safe and easy positioning and access to hard to reach fasteners.

Straight handle (standard)

SWH6S

Angled handle (optional)

SWH6A

ATEX declared. Calibration certificate included.

All UltraSlim Series cassettes are CE - ATEX declared and are shipped complete with a calibration certificate.

  II 2 GD T4

Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas
- Uses same drive unit as standard W-series hexagon cassettes

Performance

- Premium components provide best-in-class endurance compared to other limited access tools

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Top mounted straight handle for improved tool handling and safety
- Enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability

Accuracy

- Constant torque output provides $\pm 3\%$ accuracy of across full stroke
- Calibration certificate shipped with every cassette.

Slim enough to fit and tough enough to last. This UltraSlim wrench is the perfect controlled bolting solution for this oil and gas flange. ►

UltraSlim Bi-Hexagonal Cassettes

UltraSlim Bi-Hexagonal Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest grade materials, perfecting the geometry, and placing the positioning handle on top of the tool for safe fastening, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability*.

Durability of Key Components*

* Average test results, whereby three Enerpac 46 mm UltraSlim cassettes and three competitor 46 mm cassettes were tested at 5425 Nm for 50,000 cycles. The Enerpac side plates never broke for the full duration of the test.

W-SL Series UltraSlim

Nominal Torque Output:

5911 Nm

Bi-Hexagonal Range:

46 - 75 mm

Maximum Operating Pressure:

690 bar

Torque Wrench Pumps

System matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

* Bi-Hexagonal Cassette includes top mounted straight handle.

** Weight of drive unit W2000PX = 1,4 kg; W4000PX = 2,0 kg.

WCR-Series, Roller Cassette Torque Wrench

▼ WCR4000 Roller Cassette with Spanner and W4000PX Drive Unit

- Provides a safe and reliable controlled bolting solution for flanges with limited access
- Spanners available to fit most commonly used API flanges
- Small nose radius – resolves bolt to pipe restrictions
- Slim spanner design – reduces bolt height restrictions
- Wide range of spanners ranging from 36 - 80 mm (1⁷/₁₆ - 3¹/₈ inch)
- Includes handle to improve tool handling and safety
- Rigid steel body for maximum endurance and minimum downtime
- Enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability.

Bi-Hexagonal Spanner Size:

36 - 80 mm, 1⁷/₁₆ - 3¹/₈"

Spanner Nose Radius:

31 - 55 mm

Nominal Torque:

5762 Nm (4250 Ft.lbs)

Maximum Operating Pressure:

690 bar

WCR-4000 Applications

The WCR4000 helps resolve narrow clearance restrictions in bolting of API and BOP flanges.

The Enerpac WCR4000 Roller Cassette has been developed for applications where there are severe clearance restrictions, particularly in height above the nut or between the bolt center and the inside of the joint.

Powered by the standard W4000PX drive unit which is compatible with standard W-Series hexagon cassettes. The WCR-wrench must be removed and repositioned after each wrench cycle by operating the pump in the retract direction. The tool contains no spring return.

Closed Spanner Hexagon Size S (inch)	Closed Spanner Hexagon Size S (mm)	Closed Spanner Model Number	Nominal Torque (Nm)	Spanner Radius R (mm)	Spanner Weight * (kg)	Roller Cassette Assembly Model Nr.	Drive Unit Model Nr.

▼ PTW1000

Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime.

Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications.

Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool.

◀ The PTW1000 makes quick work of this flange maintenance job.

Continuous Rotation Controlled Torque

Calibration Certificate

All PTW-Series tools are CE declared and are shipped complete with a calibration certificate.

Typical Pneumatic Torque Wrench Applications

Oil and Gas, MRO

- Pipe flanges
- Valves
- Man-way covers
- Pressure vessels.

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings.

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance.

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

Pneumatic Torque Wrenches

PTW-Series, Pneumatic Torque Wrenches

Enerpac PTW-Series Pneumatic Torque Wrenches are designed for applications that require speed and control.

The standard package includes a Torque Wrench with a calibration certificate, an FRL (Filter/Regulator/Lubricator), and a 3 m long, ½" inch (13 mm) diameter air hose, which connects the FRL to the wrench.

Once the air hoses are connected, the operator simply adjusts the air pressure on

the FRL to achieve the desired torque using the calibration certificate. After this, the tool is ready to go to work! *

The air source used with the PTW system must be regulated and/or limited to 8,3 bar, and must be capable of providing a volume of at least (85 m³/h) at 6,9 bar. A separate ½" inch hose (not included) must be used to connect the FRL to the air supply.

* See instruction manual for comprehensive instructions.

PTW Series

Nominal Torque Output:

8135 Nm

Square Drive Range:

1 - 1½ inch

- ① PTW Torque Wrench
- ② Standard Reaction Arm
- ③ FRL120C Filter-Regulator-Lubricator with 3 meters air hose

Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

Page: **218**

FRL120C, Filter-Regulator-Lubricator with air hose

All PTW-Series tools are shipped complete with standard reaction arm, and Filter-Regulator-Lubricator (FRL120C).

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: **198**

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

▼ SELECTION CHART

All tools are shipped complete with standard reaction arm and FRL120C.

Minimum Torque		Nominal Torque		Square Drive (inch)	Model Number ¹⁾ (FRL120C included)	Speed (RPM)	Dimensions (mm)				Weight (kg) ²⁾
(Nm)	(Ft.lbs)	(Nm)	(Ft.lbs)				A	B	C	D	
407	300	1356	1000	1	PTW1000C	12,6	272	83	72	130	8,2
678	500	2712	2000	1	PTW2000C	8,0	286	83	79	133	8,8
1220	900	4067	3000	1	PTW3000C	3,1	343	83	95	133	10,4
1763	1300	8135	6000	1½	PTW6000C	2,5	366	114	127	178	17,7

¹⁾ To order without FRL120C, remove "C" suffix from model number (example: **PTW3000**).

²⁾ Weight does not include reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 1,3 kg and for PTW6000 is 3,5 kg.

▼ TW3000EI (torque wrench shown without servo motor cable *)

Versatility

- Patented firmware design provides accurate fastening on soft or pre-tightened joints when accuracy is critical
- Single control box may be used to operate multiple wrench models
- Wrenches and control boxes may be purchased separately or as a calibrated set

Performance

- High speed continuous rotation gets the job done faster
- Torque and angle functionality allows input of nominal torque value followed by a specific angle of rotation
- Pass/Fail LED indicator on back of tool verifies fastening has been completed according to specified input.

Simplicity

- Control box with 7-inch touchscreen simplifies tool operation
- Controls on back of wrench enable operator to monitor and manage the fastening process without returning to the control box
- Brightly lit three line LED display on wrench is easy to read in any environment, even in bright sunlight.

Traceability

- Fastening record can be viewed on-screen and transferred through standard USB connection on the control box
- Each tool is performance tested and shipped complete with a factory calibration certificate.

Safety

- Lift points on wrench enable use with positioning handle or lifting device for greater handling safety
- Ground fault detector protects operator in the event of insufficient grounding.

* NOTE: Wrench can not be used without control box.

Your Simple Solution for Smart Bolting

Touchscreen Control Box

ETW-Series tools feature an easy to use, interactive touch-screen control box, which helps make even the most complex jobs simple to complete.

Single control box may be used to operate multiple wrench models. Wrench can not be used without control box.

Firmware upgrades may be uploaded online and easily transferred to the tool via a USB connection.

Easy Access to Controls

Controls on back of wrench with LED display allow user to directly input desired torque, change direction of rotation, and monitor the fastening process.

Certifications and Declarations

All ETW-Series tools:

- Are CE declared
- Are shipped complete with a calibration certificate
- Are certified for North American Electrical Safety by CSA International
- Carry a CSA US and Canada mark.

▼ ETW-Series Electric Torque Wrenches are ideal for high volume fastening applications that require precision and traceability, such as this wind tower job.

ETW-Series, Electric Torque Wrenches

Enerpac ETW-Series Electric Torque Wrenches are particularly well suited to complex jobs which demand precision and traceability.

The ETW-Series tools feature an automatic mode, which helps simplify and automate complex jobs, including those with torque and angle specifications, through the creation of presets.

Using the touchscreen, simply input the number of fasteners and desired torque value for each fastening step, followed by the required angle of turn. This sequence may then be saved as an automatic preset for future use.

For simpler jobs, torque values may be input with a digital slider on the touchscreen, or directly into the rear control panel of the wrench.

Once the input torque is achieved, the tool stalls, and a pass/fail indicator verifies that it is ready to move on to the next fastener.

When the job is completed, the fastening record can be viewed on the touch screen, or exported to a computer via a USB connection on the control box.

ETW-Set

- ① ETW Torque Wrench with 6m servo motor cable
- ② Control Box with 2m power cord
- ③ Standard Reaction Arm

PTW and ETW-Accessories

Enerpac offers the following accessories to support a wide variety of applications in industries such as mining, power generation and oil & gas. For additional custom accessories not pictured here, please contact Enerpac.

Optional Accessories

For use with PTW and ETW1000, 2000, 3000-models

Nr.	Description	Model Nr.	Application	Dimensions (mm)			
				A	B	C	D
1	Extended Drive, 6 inch (152 mm)	ED6TWS	Nose extension, primarily for truck wheel bolts	62	206	73	-
1	Extended Drive, 12 inch (305 mm)	ED12TWS	Nose extension, primarily for truck wheel bolts	62	384	73	-
1	Extended Drive, 18 inch (457 mm)	ED18TWS	Nose extension, primarily for truck wheel bolts	62	511	73	-
2	Standard Reaction Arm	RATWS	Standard arm included with PTW and ETW model	76	172	102	21
3	Extended Reaction Arm	ERATWS	Long plate for use with deep well sockets	73	150	202	51
4	Sliding Reaction Arm	SLRATWS	For widely spaced and uneven bolt centers	112	381	203	102
5	Double Straight Reaction Arm	DSATWS	Reduces time to reposition arm *	73	406	19	102
6	Straight Reaction Arm	SRATWS	Long plate for wide spaced reaction points	73	240	19	51
7	Blank Reaction Arm **	BLTWS	Weldable blank for custom applications **	72	151	25	51

For use with PTW and ETW6000-models

1	Extended Drive 6 inch (152 mm)	ED6TWL	Nose extension, primarily for truck wheel bolts	84	232	102	-
1	Extended Drive 12 inch (305 mm)	ED12TWL	Nose extension, primarily for truck wheel bolts	84	384	102	-
2	Standard Reaction Arm	RATWL	Standard arm included with PTW and ETW model	102	229	146	32
3	Extended Reaction Arm	ERATWL	Long plate for use with deep well sockets	102	254	184	64
4	Sliding Reaction Arm	SLRATWL	For widely spaced and uneven bolt centers	152	419	190	114
5	Double Straight Arm	DSATWL	Reduces time to reposition arm *	102	508	32	57
6	Straight Reaction Arm	SRATWL	Long plate for wide spaced reaction points	102	305	32	57
7	Blank Reaction Arm **	BLTWL	Weldable blank for custom applications **	102	152	32	57

* Time to reposition arm when repeatedly moving from tightening to loosening.

** WARNING: Blank reaction arms must be heat treated to HRc 38-42 prior to use.

Typical PTW and ETW-Series Torque Wrench Applications

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil & Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

Optimum Torque Wrench and Pump Combinations

For optimum speed and performance Enerpac recommends the following system set-up with wrench-pump-hose combinations. For other combinations, consult your Enerpac bolting expert or your authorized Enerpac distributor.

ZU4T – Electric Wrench Pumps

Utilizing a universal motor, the ZU4-Series has excellent low voltage characteristics. It works well with long extension cords or generator driven electrical power supplies.

A field proven, efficient design ensures this pump is dependable and will draw less current – lowering your operating cost. ZU4-pumps are available in Pro and Classic formats.

ZU4T Pro pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics – premium features not available on any other pump.

ZU4T Classic pumps feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE-Series Electric Wrench Pumps

The ZE-Series features premium options, such as the LCD to display torque or pressure values, and self-diagnostics. These pumps utilize an induction motor, making the ZE-Series the coolest and quietest pumps in their class.

ZA4T-Series Air Driven Wrench Pumps

Utilizing the highly efficient design of the Z-Class pumping element, this air driven pump is best suited to power medium to large size torque wrenches.

TQ-700 Series Electric Wrench Pumps

Designed for both portability and production, the TQ-700 features optimized flow technology to deliver superior bolting speed.

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For S & W	Modelnr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Torque Wrench Couplers

For torque wrench couplers see our "System Components" section in this catalogue.

Page: 124

Portable Electric Torque Wrench Pumps

▼ PMU-10422Q

- Powerful two-speed pump is lightweight and easy to carry
- Standard heat exchanger package on PMU-Series keeps pump cool under extreme use
- Glycerin filled gauge with scales reading in psi and bar
- Transparent overlays in Nm and Ft.lbs for all Enerpac torque wrenches provide a quick torque reference
- Universal motor for a high power-to-weight ratio; generates full pressure on as little as 50% of the rated line voltage
- Adjustable pressure relief valve for accurate torque adjustments and precise repeatability.

PME PMU Series

Reservoir Capacity:

1,9 - 3,8 litres

Flow at Rated Pressure:

0,33 l/min

Motor Size:

0,37 kW

Maximum Operating Pressure:

700 bar

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Modelnr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Gauge and Overlay Kit

Available separately for use with PMU-Series pumps: **GT-4015Q** includes gauge and overlays for all S- and W-Series wrenches.

▼ SELECTION CHART

For Use With Torque Wrenches		Maximum Pressure Rating (bar)		Oil Flow Rate (l/min)		Model Number with Heat Exchanger *	Useable Oil Capacity (litres)	Electric Motor (Volt-phase-Hz)	Dimensions L x W x H (mm)	Weight (kg)
		1 st stage	2 nd stage	1 st stage	2 nd stage					
S1500PX	W2000PX	48	700	3,3	0,33	PMU-10427Q	1,9	115 - 1 - 50/60	431x280x381	21
		48	700	3,3	0,33	PMU-10447Q	3,8	115 - 1 - 50/60	431x330x381	24

		48	700	3,3	0,33	PMU-10442Q	3,8	230 - 1 - 50/60	431x330x381	24

* For pump without heat exchanger change PMU into PME. Example **PME-10442Q**.
PME-Series pump size: 250 x 250 x 360 mm. Weight 18 kg (1,9 litres) and 21 kg (3,8 litres).

▼ TQ-700E

- Optimized flow technology – three stage pump maximizes productivity of the pump and tool while minimizing heat build-up and down time
- Heat exchanger is standard included
- A quiet (<85 dBA), lightweight pump with a compact footprint – easy to move around and through the work site
- Durable roll cage with an ergonomically sized handle and shielded gauge – a pump that is easy to put into position and safe from on site operational hazards
- Maintenance made simple with a brushless motor designed for continuous usage
- Straightforward operation with a simple pressure set and convenient to use 6 m pendant control – immediate productivity for crews operating the pump
- IP55 Rating for Superior Dust and Water Protection
- Transparent gauge overlays in Nm and Ft.lbs for all Enerpac S and W-Series torque wrenches provide a quick torque reference.

Lightweight Torque Wrench Pumps

Four Port Manifold

The TQ-700 offers an optional four wrench manifold as an accessory factory installed. (Add suffix "M" at the end of the model number.

For example: **TQ-700EM**).

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 191

Torque Wrench Hoses

Use Enerpac THQ-700 series twin hoses with 700 bar pumps.

For 700 bar	Model Nr.
6 meters long, 2 hoses	THQ-706T
12 meters long, 2 hoses	THQ-712T

◀ The TQ-700E and the W-Series wrenches are a productive combination in wind applications.

Electric Torque Wrench Pumps

TQ-700 Applications

The TQ-700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimising the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system.

The result of this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torqueing procedure on a pipe flange with 14, 1 7/8" bolts.

TQ Series

Reservoir Capacity:
4,0 litres

Flow at Rated Pressure:
0,5 l/min

Motor Size:
0,75 kW

Maximum Operating Pressure:
700 bar

Torque Wrench Pump Selection Matrix

CLASS

Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with electro-mechanical push buttons, 24V transformer timer and operator accessible circuit breaker.

Pro-Series

Back-lit LCD and Pressure Transducer featuring Auto-Cycle Technology.

- Features Z-Class high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator.

Pro Series pump only

- LCD readout provides pressure display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without auto cycle feature).

- Torque wrench model is selectable
- "Auto cycle" setting easily programmable.
- Digital read-out and "Autocycle" setting
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display
- Display pressure in bar, MPa or psi.

◀ Any brand of hydraulic torque wrench can be powered by the portable ZU4-Series torque wrench pump.

ZU4T-Series, Torque Wrench Pumps

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high bypass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4T-Series pumps are built to power small to large torque wrenches. Choosing the right ZU4T-Series torque wrench pump for your application is easy.

Classic Electric Torque Wrench Pump

- The Classic has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure display and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump – anywhere!
- Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without Auto-Cycle feature).

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
ZTM-Q	for 700 bar torque wrenches

* Add suffix **M** for factory installation.
Ordering Example: ZU4208TE-QM

Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
SBZ-4	4 and 8 litres reservoir ¹⁾
SBZ-4L	4 and 8 litres reservoir ²⁾

* Add suffix **K** to pump model number for factory installation.

- ¹⁾ Without heat exchanger 2,2 kg.
²⁾ With heat exchanger 3,2 kg.

Ordering Example: ZU4208TE-QK

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
ZHE-U115	115 V pumps
ZHE-U230	230 V pumps

* Add suffix **H** to pump model number for factory installation.

Heat Exchanger adds 4,1 kg to pump weight.
Ordering Example: ZU4208TE-QH

▼ Most hydraulic torque wrenches can be powered by the Enerpac ZU4T-Series torque wrench pump.

Roll Cage

- Protects pump
- Provides greater pump stability.

Accessory Kit * Model Nr.	Can be used on ZU4-Series torque wrench pumps
ZRC-04	4 and 8 litres reservoir ¹⁾
ZRC-04H	4 and 8 litres reservoir ²⁾

* Add suffix **R** for factory installation.

- ¹⁾ Without heat exchanger.
²⁾ With heat exchanger.

Ordering Example: ZU4208TE-QR

Thermal Transfer *	Max. Pressure	Max. Oil Flow	Voltage
(Btu/h)	(bar)	(l/min)	(VDC)
900	20,7	26,5	12

* At 1,9 l/min at 21 °C ambient temperature. Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or high water-based fluids.

ZU4T-Series, Ordering Matrix and Specifications

▼ This is how a ZU4T-Series pump model number is built up:

1 Product Type

Z = Pump series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 1,0 l/min @ 700 bar

4 Valve Type

2 = Torque wrench valve

5 Reservoir Size (useable oil)

04 = 4 litres

08 = 8 litres

6 Valve Operation

T = **Pro Series** pump with solenoid valve and pendant, LCD Electric and pressure transducer

B = **Classic pump** with solenoid valve and pendant.

7 Voltage

B = 115V, 1 ph, 50/60 Hz

E = 208-240V, 1 ph, 50/60 Hz (with European plug CE RF compliant)

I = 208-240V, 1 ph, 50/60 Hz (with NEMA 6-15 plug)

8 Options

Q = **700 bar couplers** for use with S and W-Series or other wrenches

H = Heat exchanger

K = Skid bar

M = 4-wrench manifold

R = Roll cage

ZU4T Series

Reservoir Capacity:

4 - 8 litres

Flow at Rated Pressure:

1,0 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

700 bar

How to order your ZU4T-Series torque wrench pump

Ordering Example : Modelnr. ZU4208TE-QMHK

Pro Series pump for use with Enerpac S and W-Series and other 700 bar torque wrenches, 230V motor, 8 litres reservoir, 4-wrench manifold, heat exchanger and skidbar.

Refer to the torque wrench pump selection matrix for optimum wrench, pump and hose combinations.

- Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without auto cycle feature)
- LCD readout provides pressure and torque display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- Totally enclosed, fan-cooled industrial electric motors supply extended life and stand up to harsh industrial environments
- High-strength, molded electrical enclosure protects electronics, power supplies and LCD readout from harsh environments.

Pro-Series

Back-lit LCD and Pressure Transducer featuring Auto-Cycle Technology.

- Torque wrench model is selectable
- "Auto cycle" setting easily programmable.
- Digital read-out and "Autocycle" setting
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display
- Display pressure in bar, MPa or psi.

◀ The ZE4T-Series torque wrench pumps are perfectly matched for this W2000X wrench.

Electric Torque Wrench Pumps

ZE4T AND ZE5T-SERIES OIL FLOW VERSUS PRESSURE

ZE4T ZE5T Series

Reservoir Capacity:

4 - 40 litres

Flow at Rated Pressure:

0,82 - 1,64 l/min

Motor Size:

1,1 - 2,2 kW

Maximum Operating Pressure:

700 bar

ZE4T and ZE5T-Series, 4 and 8 litres reservoirs

▼ COMMON TORQUE WRENCH PUMP MODELS

For Use With Torque Wrenches	Max. Operating Pressure (bar)	Model Number with Heat Exchanger and Roll Cage	Motor Electrical Specification (Volt - Ph - Hz)	Usable Oil Capacity ¹⁾ (litres)	Weight (kg)
all S and W-Series	700	ZE4204TB-QHR	115 - 1 - 50/60	4,0	61
	700	ZE4204TE-QHR	230 - 1 - 50/60	4,0	61
	700	ZE4204TG-QHR	230 - 3 - 50/60	4,0	62
	700	ZE5204TW-QHR	400 - 3 - 50/60	4,0	62

¹⁾ Larger reservoirs (8, 10, 20 and 40 litres) are available. Contact Enerpac.

▼ PERFORMANCE CHART

Pump Series	Output Flow Rate at 50 Hz ²⁾ (l/min)				Motor Size (kW)	Relief Valve Adjustment Range (bar)	Sound Level (dBA)
	7 bar	50 bar	350 bar	700 bar			
ZE4T	8,8	8,1	0,9	0,8	1,1	70 - 700	75
ZE5T	11,8	11,2	1,7	1,6	2,2	70 - 700	75

²⁾ Flow rate will be approximately 6/5 higher at 60 Hz.

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: 220

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model-Nr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

▼ ZA4204TX-QR

- Two-speed operation and high by-pass pressure reduces cycle time for improved productivity
- Glycerin filled pressure gauge with transparent overlays in Nm and Ft.lbs for Enerpac torque wrenches provide a quick torque reference
- Standard Regulator-Filter-Lubricator with removable bowls and auto drain
- Heat exchanger warms exhaust air to prevent freezing and cools the oil
- Ergonomic pendant allows remote operation up to 6 m.

Complete 700 bar Pump-Hose Set ZA4208TX-QRU105

- Fine air pressure adjustment for very accurate torque control
- Improved wrench performance at low pressure
- Standard with THQ706T twin hose.

CLASS

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model-Nr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Gauge and Overlay Kit

Gauge Overlay Kits are available separately for use with ZA4T-Series pumps: **GT-4015-Q** includes gauge and overlays for all S- and W-Series torque wrenches.

Torque Wrench Pump Selection Matrix

For optimum speed and performance see the torque wrench pump and hose selection matrix.

Page: 220

◀ Most hydraulic torque wrenches can be powered by the Enerpac ZA4T-Series torque wrench pump.

Air Driven Torque Wrench Pumps

ZA4T-Series Pump Applications

The ZA4T-Series pump is best suited to power medium to large size torque wrenches.

Patent-pending Z-Class technology provides high by-pass pressures for increased productivity.

Its high power to weight ratio and compact design make it ideal for applications which require easy transport of the pump.

All ZA4T-Series pump models meet CE, CSA and TÜV safety requirements. For further application assistance contact your local Enerpac office.

ATEX 95 Certified

The ZA4T-Series pumps are tested and certified according to the Equipment Directive 94 / 9 / EC "ATEX Directive".

The explosion protection is for equipment group II, equipment category 2 (hazardous area zone 1), in gas and/or dust atmospheres. The ZA4T-Series pumps are marked with: **Ex II 2 GD ck T4**.

ZA4T Series

Reservoir Capacity:

4,0 - 8,0 litres

Flow at Rated Pressure:

0,8 - 1,0 l/min

Air Consumption:

600 - 2840 l/min

Maximum Operating Pressure:

700 bar

OIL FLOW VERSUS PRESSURE

6,9 bar dynamic air pressure at 2840 l/min

Accessory Options

Available by placing the following additional suffix at the end of the model number:

- K** = Skid bar
- M** = 4-wrench manifold
- R** = Roll cage.

Page: 232

▼ COMMON PUMP MODELS

For Use With Torque Wrenches	Maximum Operating Pressure (bar)	Model Number	By-Pass Pressure (bar)	Usable Oil Capacity (litres)	Weight (kg)
All S and W-Series	700	ZA4208TX-QRU105 *	200	6,6	58
	700	ZA4204TX-Q	140	2,7	42
	700	ZA4208TX-Q	140	6,6	47
	700	ZA4204TX-QR	140	2,7	46
	700	ZA4208TX-QR	140	6,6	51

* Standard with THQ706T hose and fine air pressure adjustment for very accurate torque control. Pump weight 45 kg, set weight 58 kg.

www.enerpac.com

Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Roll Cage

- Protects pump
- Provides greater pump stability.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
SBZ-4	Reservoir 04 and 08

* Add suffix **K** for factory installation.
Weight skid bar 2,2 kg.
Ordering Example: ZA4208TX-QK

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
ZTM-Q	for 700 bar torque wrenches

* Add suffix **M** for factory installation.
Weight manifold 4,5 kg.
Ordering Example: ZA4208TX-QM

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque wrench pumps
ZRC-04	Reservoir 04 and 08

* Add suffix **R** for factory installation.
Roll cage weight 3,4 kg.
Ordering Example: ZA4208TX-QR

700 bar Spin-on Couplers

- Mounted on:
 - Torque wrench pumps with suffix "Q"
 - S and W-Series wrenches
 - THQ-Series hoses
 - 4-Wrench manifold ZTM-Q.

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model-Nr.
6 m long, 2 hoses	THQ-706T
12 m long, 2 hoses	THQ-712T

Torque Wrench Couplers

For Enerpac torque wrench couplers see our "System Components" section in this catalogue.

Ordering Matrix and Specifications

GT Series

Bolt Range:

M16 - M95, 5/8" - 3 3/4"

Maximum Load:

2845 kN

Maximum Operating Pressure:

1500 bar

How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from Adaptor Kits.

Example, to order a complete tensioner for a M36 x 4 threaded bolt order:

1 x Load Cell and Bridge: **GT2-LCB**

1 x Adaptor Kit: **GT2PM-NRS03640**

Bolting Integrity Software

A comprehensive on-line software solution for Bolted Joint integrity at www.enerpac.com

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools.

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

▼ ZUTP-1500E

ZUTP Series

Reservoir Capacity:
4,0 litres

Flow at Rated Pressure:
0,13 l/min

Maximum Operating Pressure:
1500 bar

- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for safe and accurate operation
- 6 m pendant cord enables motor control from a distance
- Angled 153 mm pressure gauge, with polycarbonate cover, built into a protective metal shroud for improved visibility and protection
- Safety relief valve limits output pressure
- Compact, lightweight and rugged aluminium frame for increased durability and ease of handling.

Applications

The Enerpac ZUTP-Series electric pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

Page: **234**

1500 bar hoses and couplers

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: **237**

Bolting Theory

See our 'Yellow Pages' for information on torque tightening and tensioning.

1500 bar HIGH PRESSURE PUMP

Pump Type	Useable Oil Capacity (litres)	Model Number ¹⁾	Pressure Rating (bar)	Output Flow Rate at 0 bar (l/min)	Output Flow Rate at 1500 bar (l/min)	Motor Electrical Specification	Motor Size (kW)	Sound Level (dBA)	 (kg)
Two speed	4,0	ZUTP-1500 B	1500	2,90	0,13	115 VAC, 1-ph	1,25	89	29,5
	4,0	ZUTP-1500 E ²⁾	1500	2,90	0,13	230 VAC, 1-ph ²⁾	1,25	89	29,5
	4,0	ZUTP-1500 I ³⁾	1500	2,90	0,13	230 VAC, 1-ph ³⁾	1,25	89	29,5

¹⁾ All models meet CE safety requirements and all TÜV requirements.

²⁾ European plug and CE EMC directive compliant.

³⁾ With NEMA 6-15 plug.

High Pressure Hand Pump and Accessories

▼ HPT-1500

- Lightweight and portable high-pressure hand pump
- Two-speed operation displaces a larger volume of oil per stroke, reducing cycle times for many testing applications
- Includes a pressure gauge and coupler for direct connection to Enerpac GT-Series Bolt Tensioners
- Integrated relief valve set at 1500 bar.

HPT, HT, B Series

Reservoir Capacity:

2,5 litres

Flow at Rated Pressure:

0,61 cm³/stroke

Maximum Operating Pressure:

1500 bar

Ultra-high pressure

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Applications

The hand pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

ATP-Series, Ultra-High Pressure Air Pump

▼ ATP-1500

- General purpose, high pressure air driven two speed pump unit for products requiring up to 1500 bar hydraulic pressure
- Compact, lightweight, rugged steel frame for protection and easy handling
- Prelubricated pump element, does not require an airline lubricator
- Easily adjustable output pressure control
- Integrated and protected easy to read glycerin filled gauge
- Safety relief valve limits output pressure.

ATP Series

Reservoir Capacity:
3,8 litres

Flow at Rated Pressure:
0,07 l/min

Maximum Operating Pressure:
1500 bar

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: 237

Applications

The ATP-pump is ideally suited for use with GT-Series hydraulic bolt tensing tools and hydraulic nuts. See our Bolting Tools catalogue or enerpac.com

Page: 234

ATEX Certified

The ATP-Pump is tested and certified according ATEX.

Ordering Notes: Maximum allowable hardness to split is HRc-44. Not to be used on square nuts or stainless steel.

* Available as Tool-Pump Set, see note on this page.

▼ Shown: NS-Series Hydraulic Nut Splitters

- Specially designed to suit standard ANSI B16.5 / BS1560 flanges
- Single-acting (spring return) cylinder
- Tri-blade technology provides three cutting surfaces on a single blade
- Interchangeable heads provide maximum nut range flexibility
- Preset scale allows controlled blade extension, which avoids damage to bolt threads
- Grip tape and handle included for more secure manoeuvrability
- Nickel-plated cylinder body for excellent corrosion protection and improved durability in harsh environments
- Internal pressure relief valve for overload protection
- CR-400 coupler and dustcap included on all models.

▼ Heavily corroded and weathered nuts are quickly split and removed using a NS-Series Nut Splitter.

Nut splitter set for joint separation during inspection, maintenance and decommissioning operations. ▶

Power and Precision High Performance Nut Splitter

Blade Cutting Depth Scale

Adjustable cutting depth scale for controlled blade extension, which avoids damage to bolt threads. The scale indicates the

bolt range in metric and imperial values on each cutting head.

NC-Series, Hydraulic Nut Cutters

The NC-Series models are available featuring an angle-head design for 10 - 75 mm hexagon nuts.

Page: 239

Joint Separation Tools

FS and FSH-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 242

Flange Alignment Tools

The ATM-Series provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 244

Hydraulic Nut Splitters

Nut Splitter Sets

To provide maximum flexibility, NS-Series Nut Splitters can also be ordered in sets (NS-xxxSy). Select Nut Splitter size and pump style from the chart below. To order additional Cutting Heads (NSH-xxxxxx), Cylinders (NSC-xxx) or Replacement Blades (NSB-xxx), see Selection Chart below.

SET SELECTION:

- 1 Select your Nut Splitter
- 2 Select your pump type

NS Series

Capacity:

917 - 1711 kN

Hexagon Nut Size:

70 - 130 mm

Bolt Range:

M45 - M90

Maximum Operating Pressure:

700 bar

¹⁾ Maximum allowable hardness to split is HRc-44. See page 285 for hexagon bolt and nut sizes and related thread diameters.

²⁾ NS-Series Nut Splitters ship in two cases: One containing the NSC-Cylinder and one containing the NSH-Cutting Head. Assembly required.

³⁾ Both, the NSH-head and the NSC-cylinder include a cutting blade.

FS-Series, Hydraulic Flange Spreaders

▼ FS-56

- Lightweight, ergonomic design for ease of use
- Adjustable jaw widths from 70 mm to 216 mm for a wide range of applications
- Single-acting, spring return RC-Series DUO cylinder for fast trouble-free operation.

FS, STF Series

Capacity:

5 and 10 ton

Spread:

70 - 216 mm

Maximum Operating Pressure:

700 bar

Tool-Pump Sets

Both Flange Spreaders are available as sets (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Spreader Model Nr.	Pump Model Nr.	Set Model Number
FS-56	P-392	STF-56H
FS-109	P-392	STF-109H
FS-109	PATG-1102N	STF-109A

Wedge Spreaders

Friction-free, smooth and parallel wedge movement with unique interlock wedge design. Eliminates flange damage and risk of spreading arm failure.

Page: 243

Flange Spreader Matching Chart

ASA Rating (bar)	Pipe Size (mm)	
	FS-56	FS-109

Hydraulic and Mechanical Wedge Spreaders

▼ FSH-14 and FSM-8 with safety blocks SB-1

- **Integrated wedge concept:** Friction-free, smooth and parallel wedge movement eliminates flange damage and spreading arm failure
- **Unique interlocking wedge design** - no first step bending and risk of slipping out of joint
- **Requires very small access gap of only 6 mm**
- **Stepped spreader arm design** - each step can spread under full load
- **Few moving parts mean durability and low maintenance**
- **Safety block SB-1 and ratchet spanner SW-22 included with FSM-8 mechanical wedge spreader**
- **Safety block SB-1 and Enerpac RC-102 single-acting cylinder included with FSH-14 hydraulic wedge spreader.**

FSH, FSM, STF Series

Tip Clearance / Maximum Spread ¹⁾:

6 mm / 80 mm

Maximum Spread Force:

8 - 14 ton

Maximum Operating Pressure:

700 bar (FSH-14)

Stepped Blocks FSB-1

Use stepped blocks to increase wedge opening up to 80 mm. Fits both FSH-14 and FSM-8.

AM-Series Control Manifolds

For simultaneously and even spreading of flange joints, 180° apart with FSH-14.

Page: 126

Tool-Pump Sets

The hydraulic flange spreader is available as set (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

Spreader Model Nr.	Handpump Model Nr.	Set Model Number
FSH-14	P-392	STF-14H

Maximum Spreading Force ton (kN)	Model Number	Tip Clearance (mm)	Maximum Spread ¹⁾ (mm)	Spreader Type	Oil Capacity (cm ³)	Weight (kg)
14 (125)	FSH-14*	6	80	Hydraulic	78	7,1
8 (72)	FSM-8	6	80	Mechanical	-	6,5

¹⁾ Using stepped blocks FSB-1

* Available as pump-tool set, see note on this page.

▼ Flange maintenance and joint separation with FSH-14 Hydraulic Wedge Spreader.

ATM-Series, Flange Alignment Tools

▼ From left to right: ATM-4, ATM-9, ATM-2 (ATM-9 shown without pump and hose)

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- Reduces set-up time: no need for chains, pulleys or rigs
- Safety strap helps provide secure operation
- Can be installed and used in any position
- Stays stable in position under full load
- Portable, lightweight design enables easy transport and use, even in remote locations
- Each ATM-model contains a tool and kit box.

▼ The compact ATM-2 is actuated by simply hand turning the crank.

The faster, simpler and safer way to align flanges

Adjustable Reach

The highly adjustable reach of the wing and drop leg on ATM-4 and ATM-9 allow precise alignment.

Gauge and Adaptor

The ATM-9 includes P-142 hand pump and HC-7206C 1,8 m long hose. Enerpac recommend the use of the pressure gauge **GP-10S** and gauge adaptor **GA-4** for easy mounting of the gauge onto your system or use **GA45GC** Gauge Adaptor Assembly.

Page: **134**

▼ The ATM-9 is shown here with optional pressure gauge and gauge adaptor.

Applications

Enerpac ATM-Series Tools help correct flange misalignment, and allow bolts to be placed into joints. This alignment takes place during pipework construction, or maintenance.

These tools provide pipe installers and maintenance personnel with some of the simplest, safest and most productive solutions available for flange alignment in the market today.

- ① Extendable wing provides usage on wide variety of flanges.
- ② Portable, light weight design enables easy transport and use.
- ③ Hand-adjustable base for easy positioning by a single operator.
- ④ Safety strap helps provide secure operation from a horizontal or vertical position.

ATM Series

Minimum Bolt Size:

16 - 31,5 mm

Flange Wall Thickness:

14 - 228 mm

Maximum Lifting Force:

1 - 9 ton (10 - 90 kN)

ATM-2

ATM-4

ATM-9

Maximum Lifting Force		Model Number	Minimum Bolt Size		Flange Wall Thickness		Weight (kg)
(ton)	(kN)		(mm)	(inch)	(mm)	(inch)	
1	10	ATM-2	16	.63	14 - 82	.55 - 3.29	1,6
4	40	ATM-4	24	.95	30 - 133	1.18 - 5.23	8,6
9	90	ATM-9 *	31,5	1.24	93 - 228	3.66 - 9.00	14,5

* ATM-9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately). ATM-9 weight includes tool only.

Cylinder-Pump Sets

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in pipe line positioning and aligning.

Page: 56

Pipe Flange Face Tool

The portable, hand powered tool FF-120 makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Page: 246

▼ The ATM-Series – the faster, simpler and safer way to align flanges.

▼ FF-120

- **Makes refacing easy – hand operated machine tool can be set up anywhere without the need for air, electric or hydraulic power**
- **Lightweight and portable (15 kg in storage box)**
- **Adjustable cutting head for reface of flat flange surfaces of pipes with flange outside diameter facing range 25,4 - 304,8 mm [1 - 12 inch]**
- **Interchangeable collets for ID mounting range 25,4 - 152,4 mm [1-6 inch] allow the user to work on many different flanges with minimal time between set-ups**
- **Interchangeable lead screws suitable for refacing damaged raised-face (RF), flat-face (FF) or lens-ring joint flanges**
- **Tool body with expanding collets centers itself providing real concentric operation.**

▼ The Enerpac FF-120 used to face a pipe flange.

Safe, efficient and accurate refacing of flat pipe flange surfaces

Complete in Wheeled Carrying Case

The FF-120 comes as portable set (15 kg). Can be transported, easy set-up and operated by a single

technician. Set includes:

FFL-kit with locators, O-Rings and extensions;
FSS-kit with feed screw and nut ½"-20 UN for surface roughness Ra 1,6 - 2,4 μ.

FSF-kit with feed screw and nut ½"-11 UNF for surface roughness Ra 3,2 - 6,3 μ.

Joint Separation Tools

FS and FSH-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 242

Flange Alignment Tools

The ATM-Series provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 244

Controlled Tightening and Loosening

Use Enerpac Bolting Tools to seal the joint to the precise torque or tension required: torque

multipliers, torque wrenches and hydraulic bolt tensioners.

Page: 191

QuickFace – Mechanical Pipe Flange Face Tool

Mechanical Flange Face Tool

Portable, hand powered tool makes even the hardest to reach pipe flanges resurface-able in a safe and convenient way.

Makes refacing easy

A simple and cost effective solution – the FF-120 turns a two man operation with heavy equipment, compressors and portable generators into a one man job.

The FF-120 has interchangeable lead screws that make it suitable for resurfacing damaged flat-faced, raised-face or lens-ring joint flanges to the high safety standards required. After selecting the correct lead screw for the operation, the tool body is inserted in the pipe end and centres itself with adjustable locators to provide real concentric operation.

The tool arm is then rotated by hand using a worm-gear mechanism to provide a perfect spiral “gramophone” finish. The tool can be adjusted with a calibrated slide to define cut depth and the correct finish.

Surface finish & accuracy

A serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 3,2-12,5 μ (125-500 micro inches). The FF-120 has same precision and quality of finish as a lathe.

Cost effective solution

Small and portable enough to be a permanent addition to your equipment range, Enerpac’s FF-120 is the perfect solution to all of your small diameter facing problems.

FF Series

Pipe Flange Cutting Diameter Range:

∅ 25-305 mm / 1-12"

Internal Pipe Mounting Range:

∅ 25-152 mm / 1-6"

Cutting Resultant Roughness:

Ra 3,2 - 12,5 μ

- 1 Hand-operated cold work tool – no need for external power and hot work permits.
- 2 Calibrated cross slide for accurate cutting control.
- 3 Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range ∅ 25,4-304,8 mm [1-12 inch].
- 4 Interchangeable lead screws enable selection of surface finish between Ra 3,2-12,5 μ.
- 5 Utilizes standard 3/8 inch or 10 mm tool steel.
- 6 Range of interchangeable collets allow the tool to accommodate ∅ 25,4 - 152,4 mm (1 - 6 inch) pipe ID.
- 7 Tool body with expanding collets centers in the bore ensuring concentric and accurate set-up.

- | | |
|--|------------------------|
| 1 Feed Knob | 6 Tool Block |
| 2 Gear Box | 7 Swivel Slide |
| 3 Cutting Depth Adjustment with indicator: 0,127 mm (.005 inch) per mark | 8 HSS 3/8" Tool Bits |
| 4 Locking Collar | 9 Mandrel Locking Knob |
| 5 Lead/Feed Screw | 10 Locator Extensions |
| | 11 Adjustable Locators |
| | 12 O-Ring |

SELECTION CHART

Pipe Flange Cutting Diameter Range		Internal Pipe Mounting Diameter Range		Cutting Resultant Roughness	Model Number	(kg)
(mm)	(inch)	(mm)	(inch)	(Ra μ)		
25,4 - 304,8	1,0 - 12,0	25,4 - 152,4	1,0 - 6,0	3,2 - 12,5	FF-120	6,8

▼ The Enerpac FF-120 QuickFace has same precision and quality of finish as a lathe.

Enerpac Heavy Lifting Technology provides customers with tailored solutions, combining hydraulics, steel fabrication and electronic control technology. Global Leader providing best in class solutions for safe and precise positioning of heavy loads.

With more than 60 years supporting industrial markets, Enerpac has gained the unique and in-depth expertise that is respected by industrial professionals around the world. Across every continent, Enerpac's network of application engineers, authorized distributors and technical service centers can reach any location, and deliver innovative solutions, technical assistance and quality products.

Enerpac's complete line of standard and customized products and a unique systems approach offers the benefits of safety and efficiency to applications where high forces are required.

Whether constructing a signature bridge across a deep valley, lifting a national landmark for seismic retrofit or simultaneously testing hundreds of foundation pilings to support a new building, Enerpac will supply the hydraulic solutions to get the job done.

▼ SFP421SW and SFP404SW (pressure gauges and retract valves are not shown)

- 2, 4, 6 or 8 split-flow outlets
- Individual or simultaneous valve operation with advance/hold/retract function
- Joystick (manual) controlled or pendant (solenoid) controlled valves
- Flow per outlet ranging from 0,32 to 4,2 l/min at 700 bar
- For double and single-acting cylinders
- Pressure compensated flow control
- Adjustable pressure relief valve per circuit
- All models include pressure gauges
- Reservoir: 20, 40 or 150 litres.

▼ During manufacturing of container units, the Enerpac SFP404SW Split-Flow Pump with 4 outlets provide both lifting and load distribution function. The container units weight between 70 and 120 ton and are complete equipped as full operational shelter for specific applications in power-gen, mining and construction industries for on-site use.

Multiple Outlets with Equal Oil Flow

Typical Split-Flow Pump Applications

Split-Flow pumps distribute an equal amount of hydraulic oil to a maximum of 8 outlets. Smart valve technology allows both controlled lifting and lowering of heavy loads.

Pressure compensated flow control

This unique feature to our Split-Flow Pumps will ensure both smooth lifting and lowering. Independent of load distribution.

For lifting applications Split-Flow Pumps are an efficient and safer alternative than using individual pumps. Where synchronization of maximum 4% is acceptable split-flow pumps are a safe and economical solution.

Application examples:

- Bridge deck lifting for bearing maintenance
- Stage lifting in construction and shipbuilding
- Skidding to move structures and buildings
- Levelling of constructions like wind turbines.

Remote Control Pendant

Split-Flow pumps with solenoid valves include a remote pendant with selector switches for each individual outlet, allowing single or multiple cylinder operation.

Lifting Cylinders

For a complete line of Enerpac cylinders, see the Cylinder and Lifting Products in our catalogue.

Split-Flow Hydraulic Pumps

▼ Split-flow pump used to operate double-acting cylinders to lift steel bridge segments.

▼ EVOB 816W

- Pumps to control 4 to 8 lifting points
- Intuitive user interface provides easy set-up and control
- For use with standard single- or double-acting cylinders
- Built in warning and stop alarms for optimum safety
- Available in two oil flow options.

▼ Bridge maintenance: A 200 ton bridge was lifted using 8 cylinders to replace the old bearings.

The economical solution to basic lifting applications

The Basic EVOB-System

Leveraging Enerpac's market leading Z-Class pumps and components from the standard EVO, the Basic EVOB offers an economical solution to basic applications requiring stroke only control for a maximum of 8 lifting points.

The Basic EVOB-System has three work modes. The operator can navigate to any of these menus:

1. Manual
2. Automatic
3. Depressurize.

Typical Synchronous Lifting Applications

- Bridge lifting and repositioning
- Bridge launching
- Bridge maintenance
- Incremental launching and box jacking
- Lifting and lowering of heavy equipment
- Lifting, lowering, levelling and weighing of heavy structures and buildings
- Structural and pile testing
- Lifting and weighing of oil platforms
- Foundation levelling of onshore and offshore wind turbines
- De-propping/load transfer from temporary steel work
- Foundation shoring.

▼ Foundation repair: Synchronous lifting system used to lift a 1000 ton building.

Basic Synchronous Lifting Systems

What is Synchronous Lifting?

To achieve high-precision movement of heavy objects it is necessary to control and synchronize the movements of multiple lifting points.

The PLC-control uses feedback from multiple sensors to control the lifting, lowering and positioning of any large, heavy or complex structure, regardless of weight distribution.

By varying the oil flow to each cylinder, the system maintains very accurate positional control. By eliminating manual intervention, the sync lift helps maintain structural integrity and increases the productivity and safety of the lift.

PLC-controlled synchronous lifting systems reduce the risk of bending, twisting or tilting, due to uneven weight distribution or load-shifts between the lift points.

Wire Stroke Sensors

- Ordered separately, requires one for each lifting point
- Provides stroke feedback to controls
- Includes magnets for mounting.

Stroke Sensor Cables

- Ordered separately, requires one for each stroke sensor
- Can be connected together for additional length.

Stroke Sensor Model Number	Measuring Range (mm)
EVO-WSS-500	500
EVO-WSS-1000	1000

Sensor Cable Model Number	Cable Length (metres)
EVO-SC-25	25
-	-

Voltage Options: To select voltage, change suffix W into required suffix.

- B** = 115 V, 1 Ph, 50-60 Hz
- E** = 208-240 V, 1 Ph, 50-60 Hz
- G** = 208-240 V, 3 Ph, 50-60 Hz
- W** = 380-415 V, 3 Ph, 50-60 Hz
- J** = 460-480 V, 3 Ph, 50-60 Hz
- R** = 575 V, 3 Ph, 60 Hz.

Example: **EVOB408E**. EVOB Basic Pump for 4 lift points, 0,82 l/min at 700 bar, and 1,12 kW motor 208-240 V, 1 Ph, 50-60 Hz.

EVOB-Series (Basic)

Lifting Points	Oil Flow at 50 Hz ¹⁾ (l/min)		Model Number ²⁾	Usable Oil Capacity (litres)	Motor Size (kW)	Motor Weight (kg)
	(< 80 bar)	(> 80 bar)				
4	8,88	0,82	EVOB408E	40	1,12	278
4	11,61	1,64	EVOB416W	40	2,24	284
8	8,88	0,82	EVOB808E	40	1,12	278
8	11,61	1,64	EVOB816W	40	2,24	284

¹⁾ Oil flow will be approximately 6/5 of these values at 60 Hz.

²⁾ For other voltages options see information above this selection chart.

EVOB Series

Number of Lifting Points:

4 - 8

Reservoir Capacity:

40 litres

Flow at Rated Pressure:

0,82 - 1,64 l/min

Motor Size:

1,12 - 2,24 kW

Maximum Operating Pressure:

700 bar

Lifting Cylinders

For a complete line of Enerpac cylinders, see the Cylinder and Lifting Products in our catalogue.

Multi-functional Synchronous Lifting Systems

For more than 8 lifting points, to link up to 4 systems together and weighing system see the standard EVO-Series.

▼ **Box jacking:** Multi-point synchronous system to push hydraulically the tunnel segments under the railway.

▼ EVO 841460W

- Modular lifting pumps to control 4, 8 or 12 lifting points
- Can be connected to single- or double-acting cylinders with the same or different lifting capacities
- PLC-controlled system with integrated 700 bar hydraulic power unit and 250 litres reservoir
- Network capability to link up to 4 HPU's to a separate master control box via wireless control
- Intuitive user interface providing easy set up, control and navigation
- Data storage and recording capabilities
- Variable frequency drive motor (VFDM) and PLC for precise synchronization and oil flow control.

The multi-functional synchronous lifting systems

EVO-System Work Modes

The application possibilities are infinite with the standard EVO-System, powering interlinked hydraulic cylinders – single or double-acting, push or pull, stage lift, hollow plunger or lock nut cylinders. The standard EVO-System has 9 work modes. The operator can navigate to any of these menus:

1. Manual
2. Pre-Load
3. Automatic
4. Retract Fast
5. Depressurize
6. Tilting
7. Stage Lift
8. Weighing *
9. Center of Gravity determination *

* Available in the EVO-W-models.

Typical Synchronous Lifting Applications

- Bridge lifting and repositioning
- Bridge launching
- Bridge maintenance
- Incremental launching and box jacking
- Lifting and lowering of heavy equipment
- Lifting, lowering, levelling and weighing of heavy structures and buildings
- Structural and pile testing
- Lifting and weighing of oil platforms
- Foundation levelling of onshore and offshore wind turbines
- De-propping/load transfer from temporary steel work
- Foundation shoring.

◀ *The superlifting and launch of a 43.000-ton floating oil production system in Malaysia for the Gumusut-Kakap offshore field has set high benchmarks for safety through its use of sophisticated EVO-Series synchronous hydraulics to lift, balance, weigh and smoothly launch massive resources structures.*

Benefits of the standard EVO-Series System

Precise control of multiple lift points

- Comprehensive understanding and management of a lifting operation from a central control system improves safety and operational productivity.
- Programmable synchronized lifting.
- Automatic stop at pre-set cylinder stroke or load limit.

Safe and efficient movement of loads

- System secured with warning and stop features to realize optimal safety.

High accuracy

- Variable frequency drive (VDFM) and PLC for precise synchronization and control of oil flow, stroke and speed.
- Depending the cylinder capacities used, an accuracy of 1,0 mm between lifting points is achieved.

Ease of operation

- User friendly interface: visual screens, icons, symbols and color coding.
- A single operator controls the entire operation.

Monitoring and Data Recording

- Displays data of the operation.
- Data recording at user-defined intervals.
- Data storage and read-out for reporting.

Network capability

- Ethernet IP protocol for communication between hydraulic power units, allow easy "plug and play".

EVO-W Weighing System

Weighing applications with 1% accuracy

- Includes calibrated sensors and auto-calibration of external load cells.
- Center of gravity determination functionality.
- Parameters for "waiting time for stabilization" and "number of cycles".

Global standardized system

- Enerpac global coverage ensures local support.

EVO Series

Number of Lifting Points:

4 - 8 -12 (up to 48)

Reservoir Capacity:

250 litres

Flow at Rated Pressure:

0,75 - 4,80 l/min

Motor Size:

3,50 - 7,50 kW

Maximum Operating Pressure:

700 bar

Stroke Sensors and Cables

Optional accessories required for each lifting point and stroke sensor.

8	4,0 - 13,3	0,75 - 2,51	EVO 821380 W³⁾	250	3,5	VFDM	910
8	4,7 - 15,6	1,44 - 4,80	EVO 840380	250	7,5	VFDM	910
8	4,7 - 15,6	1,44 - 4,80	EVO 840380 W³⁾	250	7,5	VFDM	910
12	4,0 - 13,3	0,75 - 2,51	EVO 1221380	250	3,5	VFDM	920
12	4,0 - 13,3	0,75 - 2,51	EVO 1221380 W³⁾	250	3,5	VFDM	920
12	4,7 - 15,6	1,44 - 4,80	EVO 1240380	250	7,5	VFDM	1025
12	4,7 - 15,6	1,44 - 4,80	EVO 1240380 W³⁾	250	7,5	VFDM	1025

¹⁾ Oil flow will be approximately 6/5 of these values at 60 Hz. ²⁾ For 460-480 VAC, 3 phase, 50-60 Hz change 380 in model number into 460. Example **EVO421460**.

³⁾ Model numbers with suffix **W** are pumps for weighing systems. ⁴⁾ VFDM = Variable Frequency Drive 15-50 Hz.

Master Control Box

Required to link up to 4 standard EVO-pumps together to achieve a maximum of 48 lifting points. Contact Enerpac for more

information or for assistance: enerpac.com/contact-us.

▼ Precision levelling caisson pier box:
3 EVO-Systems connected with 32 jacks lowered the 1100 ton bascule pier box.

▼ BLS-1006

- Include integral tilt saddle with maximum tilt angles up to 5 degree
- Large base with anti-rotation rod for stability and safety
- Built-in safety valve prevents accidental over-pressurization
- Ideal in combination with the stage lift work mode of the EVO-Series synchronous lifting system
- Baked enamel finish for increased corrosion resistance
- CR400 couplers included on all models.

▼ Synchronous Stage Lifting: 48 double-acting jacks (25 and 50 ton) are networked in to a 16 points synchronous system to lift this 50 metres long, 1000 ton building up to a height of 2,5 metres to construct a new floor level.

A Simple Solution to Incremental Lifting

Lifting Height

Climbing Jacks overcome the usual limitation of lifting height imposed by the cylinder's plunger stroke length. Large objects, such as oil tanks, can be lifted, held and lowered for maintenance without sending for a crane.

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points Split-Flow

Pumps are a far better alternative than using separately operated pumps. Smart valve technology allows both controlled lifting and lowering of heavy loads.

Page: 250

Synchronous Lifting System

The standard EVO-Series System is ideal for stage lifting, powering interlinked hydraulic cylinders. The EVO-system has 9 work modes

including the stage lift work mode.

* Cribbing blocks are not supplied by Enerpac.

▼ JS-250, Enerpac Jack-Up System (one lifting tower shown)

- Self-contained hydraulics in each jack-up unit for uncluttered work area
- Synchronously lift loads with multiple jack-up units. The most common system set-up includes 4 jack-up units
- Lifting barrels are stacked together to mechanically hold the load
- Up to 5% side load capacity depending on lifting height
- Computer controls for operating the jack-up system with automatic and manual lifting settings.

Incremental Lifting System – Synchronously Lift and Mechanically Hold

Typical Applications

- Bridge maintenance
- Lifting and lowering of heavy equipment
- Lifting, lowering and levelling of heavy structures and buildings
- De-propping/load transfer from temporary steel work.

Computer Controls

- Enerpac Jack-Up Systems provide precision control suitable for many demanding lifting/lowering applications. The comprehensive self-contained design features simple to use software.
- Automatic synchronization of multiple networked lift points.
 - Overload and stroke alarms
 - Emergency stop switch at jack-up units and controls.

▼ Enerpac has been awarded a contract by Burkhalter to extend the height of Enerpac's 2000 ton (500 ton per tower) jack-up system from 20m to 36m for future projects.

▼ A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'.

▼ Lifting barrels are stacked together to mechanically hold the load.

Enerpac Jack-Up Systems

Enerpac Jack-Up Systems

The jack-up system is a custom developed multi-point lifting system. A typical system setup includes four jack-up units positioned under each corner of a load.

Example: A four unit setup with JS-250 has a lifting capacity of 1000 ton (250 ton per tower unit). The lifting frame of a jack-up unit contains four hydraulic lifting cylinders, one in each corner, which lift the load using the stacked steel barrels.

A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'. A jack-up system is operated and controlled by a computer control unit.

Each unit's lifting and lowering operations occur simultaneously; the computer control unit's synchronous technology maintains the balance of the load.

JS Series

Capacity Per Lifting Tower:

125 - 750 ton

Lifting Height:

Up to 6 - 20 metres

Handle for manual barrel insertion on JS125, JS250 and JS500. Automatic barrel insertion on JS750

▼ Shown: HSL50006 Strand Jack

- Precision control of synchronous lifting and lowering
- Can be controlled by a single operator from a central location for increased safety
- Automated locking - unlocking operation
- Two strand sizes: 15,7 mm and 18 mm (.62 and .71 inch)
- Telescopic strand guide pipes prevent bird caging
- Internal components are coated with Lunac, an anti-corrosion coating, making it suitable for marine environments
- Lifting anchor included with all strand jacks
- Lloyd's witness tested to 125% of maximum working load.

▼ *Songdo Bridge, South Korea: Four HSL85007 strand jacks were installed on top of a temporary bent tower and simultaneously lifted both pylons up to their permanent position at 75 degrees. The lift was monitored and controlled using a computer controlled strand jack system with 30 kW hydraulic power units.*

High Capacity Precision Control

Heavy Lifting Strand Jacks

Enerpac strand jacks are the strand jacks of choice for customers seeking precise synchronous control with heavy-lifting capacity in an economical, compact, and reliable foot print.

Enerpac strand jacks are powered by electrical or diesel driven hydraulic power packs and controlled by Enerpac's proprietary SCC-Smart Cylinder Control System to ensure full control of lifting and lowering operations.

Enerpac continually improves reliability, durability, and safety of their strand jacks, making them an industry standard for heavy lifting.

▼ *HSL85007 Strand Jack System used on Enerpac custom Self Erecting Tower.*

Heavy Lifting Strand Jacks

Strand Jacks

A strand jack can be considered a linear winch. In a strand jack, a bundle of steel strands are guided through a main "lifting" jack.

Above and below the cylinder are anchor systems with wedges that grip the strand bundle simultaneously. Lifting and lowering a load is achieved by hydraulically controlling the main jack and both mini jacks alternately.

In the case of system pressure loss, the wedges are mechanically closed automatically, holding the suspended load in place.

Today strand jacks are widely recognized as the most sophisticated heavy lifting solution. They are used all over the world to erect bridges, load out offshore structures, and lift/lower heavy loads where the use of conventional cranes is neither economical nor practical.

HSL Series

Capacity:

15 - 1250 ton

Stroke:

250 - 600 mm

Maximum Operating Pressure:

350 bar

▼ SHS-Series 4-Point SyncHoist System

- High precision load manoeuvring, vertically and horizontally – using one crane
- Reduces the risk of damage from oscillations of wire rope due to crane jogging and sudden starts/stops
- Vastly improving worker safety, operating speed and control
- Weather conditions play less critical role
- PLC-controlled hydraulics turn lifting into high accuracy hoisting and load positioning system
- Double-acting push/pull cylinders with load holding valves for added safety in case of hose rupture or coupler damage
- Cost reduction compared to conventional load positioning methods.

Options for system management & control:

- Manual control: system warning functions
- Automatic control: fully PLC-monitored system with programmable functions using touch screen and system warning functions.

▼ Bridge segments are hoisted from the ground, being positioned with a 4-point SyncHoist system with fully monitored cylinders.

▼ An SyncHoist system used to align steel blocks of the ship's control tower sections allowing gradual lift and positioning of the load.

Accurate Hoisting and Load Positioning Enhancing a Crane's Capability

Synchronous Hoisting

Enerpac SyncHoist is a unique crane product for below-the-hook positioning of heavy loads that require precision placement. The SyncHoist system may reduce the number of cranes needed and reduce the costs of multiple picks.

Functions

- High precision horizontal and vertical load positioning
- Pre-programmed positioning, tilting and aligning.

Applications

- Positioning of rotor, stator and propeller blades of wind turbines
- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly.

▼ SyncHoist Powerpack to operate the 4 lifting points.

SyncHoist - High Precision Load Positioning

SHS-Series, SyncHoist

Enerpac SHS-Series SyncHoist is a hydraulically operated auxiliary attachment for high precision load positioning for cranes.

The automatic version with PLC-controlled hydraulic pump monitors and guides the powerful double-acting push-pull cylinders integrated into the lifting points above the load. The SyncHoist system can be used for pre-programmed positioning, tilting and aligning of loads.

- Patented system
- Complete system tested in compliance with European lifting directive and safety requirements.

SyncHoist improves safety, operating speed and control of load movement

Geometric positioning of heavy loads in a horizontal and vertical plane are frequently done using more than one crane.

Synchronising movements between cranes are difficult and risky. The lifting inaccuracy can result in damage to the load and support structures and puts workers at risks. The SyncHoist system can be used for controlled hydraulic horizontal and vertical material handling.

System management and control

Contact Enerpac for the following options, or other customised stroke, capacity and control configurations.

1. Manual control

- Valves with manual levers
- Warnings for thermal motor protection
- Visual check: oil level, filter indicator.

2. Automatic control

- Load and stroke monitoring, and stroke control
- PLC-control and touch screen
- Solenoid valves with pendant
- Pre-programmable motions and data recording
- System warnings for:
 - maximum cylinder load control setting
 - stroke and position control
 - thermal motor protection
 - oil level and filter indicator.

SyncHoist Power Packs

SyncHoist Power Packs are specifically designed to work with the SyncHoist cylinders to insure proper operation of the system. Contact Enerpac for more information or for assistance: enerpac.com/contact-us.

SHAS-Series, Wireless SyncHoist

¹⁾ With 4 cylinders and one 400 VAC-3 phase-50 Hz Powerpack (suffix W). For 460-480 VAC-3 phase-60 Hz Powerpack change suffix W into J. Example: SHS 45560 MJ.

²⁾ Pump and cylinders include 4x 25 meters hydraulic hoses with couplers.

³⁾ Weight per cylinder

▼ SHAS411040WE Autonomous SyncHoist System demonstrated using a load simulation

- High precision load manoeuvring using one crane
- Vastly improving worker safety, operating speed and control
- Integrated PLC-controlled hydraulics in each lifting device – no need for external powerpack and hydraulic hoses
- Wireless control for safe operation
- Quick installation, set-up and operation - one electric connection per lifting point
- Cost reduction compared to conventional load positioning methods.

Accurate Hoisting and Load Positioning Enhancing a Crane's Capability

Autonomous SyncHoist System

Enerpac Autonomous SyncHoist System is a unique crane product for below-the-hook positioning of heavy loads that require precision placement. The SyncHoist system may reduce the number of cranes needed.

Functions

- High precision horizontal and vertical load positioning
- Pre-programmed positioning, tilting and aligning.

Applications

- Positioning of rotor, stator and propeller blades of wind turbines
- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly.

▼ A single operator controls and oversees the entire hoisting job - the portable wireless control allows him to be at a safe distance.

▼ SyncHoist lifts and positions Brisbane Riverwalk concrete girders.

▼ Rigging engineers used the SyncHoist system to precisely monitor and adjust each lifting point independently, or together in a synchronized manner, to position the 1140 ton nuclear plant module.

SyncHoist - High Precision Load Positioning

SHAS-Series, SyncHoist

Enerpac SHAS-Series SyncHoist is a hydraulically actuated auxiliary attachment for high precision load positioning for cranes.

The autonomous system (SHAS) with integrated PLC-controlled hydraulics, monitors and guides the powerful double-acting push-pull cylinders which are integrated into the lifting points.

The SyncHoist system can be used for pre-programmed positioning, tilting and aligning of loads.

- Complete system in compliance with European lifting directive and safety requirements.

SyncHoist improves safety, operating speed and control of load movement

Geometric positioning of heavy loads in a horizontal and vertical plane are frequently done using more than one crane. Synchronising movements between cranes are difficult and risky. The lifting inaccuracy can result in damage to the load and support structures and puts workers at risk. The SyncHoist system can be used for controlled hydraulic horizontal and vertical material handling.

Autonomous System

- Wireless remote control
- Only one electric power connection per lifting point
- Integrated hydraulics, PLC and controls
- No need for hydraulic hoses and cables
- No need for mid-hoist disconnection of hoses and movement of pump.

Modular System

- Standard with four lifting devices.
- Quick installation, set-up and operation.

PLC-Controlled System

- Pre-programmable motions
- Data recording
- Load control
- Stroke control
- Alarms for overload
- Real time indication of force and stroke per lifting point
- Controlled adjustment of forces per lifting point during entire operation.

Wireless Controls

- Operate from safe distance
- Portable, no cables
- Siemens wireless 7 inch touch screen control panel
- Emergency stop, TÜV certified in PROFISAFE.

SHAS Series

Capacity Per Lifting Point:

110 - 225 ton

Maximum Stroke:

1000 - 1500 mm

Accuracy Over Full Stroke:

± 1,0 mm

¹⁾ Standard with 4 lifting points. For more or less lifting points contact Enerpac.

²⁾ WE = with European electrical wiring. Change into suffix "WU" for US-market. Example: **SHAS 411060WU**. ³⁾ Weight per cylinder.

▼ SBL1100 with optional skid tracks, header beams, powered side shifts and lifting anchors

- Self-contained hydraulics and electronics
- Intelli-Lift wireless control system
- Self-propelled wheels or tank rollers
- Foldable boom on SBL900, SBL1100, MBL500 and MBL600
- Full range of supplementary equipment: skid tracks, header beams, powered side shifts and lifting anchors
- Designed and tested to meet ASME B30.1-2015 safety standards
- Lloyds witness tested to 125% of maximum working load.

▼ Two SBL1100 telescopic hydraulic gantry systems lifted the 1300 ton hydrocracker off the barge onto a SPMT Self-Propelled Modular Transporter.

Precision Lift and Position of Heavy Loads

The Ultimate in Safety and Control

Intelli-Lift Wireless Control

The Intelli-Lift wireless control system is included with all Enerpac hydraulic gantries.

The Intelli-Lift controller offers superior safety and control and includes the following features:

- Encrypted bi-directional communication that eliminates interference from other devices
- Remote operation using multi channel wireless (2.4 GHz) or wired (RS-485) control
- High and low speed settings
- Automatic synchronization of lifting with an accuracy of 24 mm (0.95 inch)
- Automatic synchronization of travelling with an accuracy of 15 mm (0.60 inch)
- Overload and stroke alarms
- Remote side shift control
- Emergency stop switch.

Telescopic Hydraulic Gantries

Maximum Capacity (with 4 towers)	Model Number (4 towers)	Retracted Height

6000	MBL 600	6553

Telescopic Hydraulic Gantries

Telescopic Hydraulic Gantries

Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac offers three series of Hydraulic Gantry systems:

- **SL-Series Super Lift**

The cost-effective SL-Series Super Lift offer control and stability for everyday lifting applications below 4000 kN up to 9 metres

- **SBL-Series Super Boom Lift**

The heavy-duty SBL-Series Super Boom Lift boom style gantries offer increased lifting capacity of over 4000 kN to heights of almost 12,2 metres.

- **MBL-Series Mega Boom Lift**

The massive MBL-Series Mega Boom Lift offers capacities and lifting heights of over 6000 kN at almost 14,6 metres extreme lifting conditions.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

SL, SBL, MBL Series

Capacity with 4 towers:

600 - 10.484 kN

Lift Height:

3,49 - 14,55 meters

▼ Optional Gantry Accessories

Contact Enerpac for more information or for assistance: enerpac.com/contact-us

Skid Tracks

Allows for easy levelling of the gantry tower and reduce ground bearing pressure, available in two standard lengths, 3 and 6 m.

Header Beams

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers. Available in standard lengths of 8, 10 and 12 meters. Custom lengths available on request.

Powered Side Shift

Electric propulsion controlled by standard gantry controls. Each set consists of 4 units.

Lifting Anchors

Designed to transfer the load to the top of the header beam. Can accommodate a 250 ton shackle or attach directly to the lifted load.

▼ Shown: HSK1250 Skidding System

HSK-Series, Skidding System

- PTFE skid pads with dimpled surface for low friction and long lifetime
- Easy to replace skid pads, no tools necessary
- Bi-directional operation using push-pull cylinders avoid the need to reposition cylinders for switching direction
- Large load support surface on the skid beams for distributing load
- Bottom of skid shoes equipped with stainless steel sliding plates.

LH-Series, Low-Height Skidding System

- 2-in-1 track design for added support
- Intuitive pump controls (SFP-Series Split-Flow Pump)
- Easily reversible to change skidding direction
- Portable design for quick setup
- 400 ton skidding capacity with two push-pull units.

▼ A custom hydraulic Low-Height Skidding System will provide the maintenance team with the ability to maneuver and transport transformers with physical access limitations.

The Ideal Jack and Slide Solution

Skidding Systems

The skidding system is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed track.

A series of special PTFE coated pads are placed on the skid tracks. The PTFE surface is matched with a sliding plate under the Enerpac skid beams, designed to achieve minimum friction coefficients. The skid beams are connected by hoses to a hydraulic electric or diesel driven power pack.

In addition to our standard skidding systems, we have the capability to create customized skidding systems to meet your specific requirements.

Controls

Enerpac offers several options for controlling our skidding systems. Wireless Controls allows the operator the freedom to view

the skidding operation from multiple locations while providing complete control of all system functions.

Manual controls offer a cost-effective solution by utilizing manual hydraulic valves mounted directly on the skidding system power unit.

▼ HSKJ-2500 Skid Shoe Jack.

Skidding Systems

Enerpac Skidding Systems are available in several versions:

- **B-Series (Skid Beam)** utilizes a tall skid beam with built-in push-pull cylinders. Skidding direction can be easily switched by flipping a lever on the attached gripper box.
- **J-Series (Skid Jack)** provides the same functionality as the B-Series with the added benefit of having a built-in cylinder for lifting or leveling the load.

- **LH-Series (Low-Height)** includes low-height skid beams that can fit in tight spaces while still offering high capacity. We also offer a track support for added rigidity when the surface is not fully supported.

HSK LH Series

Capacity:
100 - 250 ton

Push/Pull Stroke:
600 mm

Lifting Stroke:
175 mm

LH-Series Skidding System Requirements

- 1 Skid Track (required)
- 2 Skid Beam (required)
- 3 Push-Pull Cylinder Unit (required)
- 4 Hydraulic Hoses (required)
- 5 Split-Flow Electric Pump (required)
- 6 Track Support (optional, not shown)
- 7 Storage/Transport Frame (optional, not shown)
- 8 Pump Cart (optional, not shown)

HSK-Series Skidding System Requirements

- ① Skid Track
- ② Skid Beam
- ③ Hydraulic Power Pack
- ④ Hydraulic Push-Pull Unit

Skid Tracks

Include specially constructed and easily replaceable PTFE coated pads. Skid track is sold separately.

Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with Skidding Systems.

SPMT, Self-Propelled Modular Transporter

▼ SPMT600-360 with MTPP-360 hydraulic power unit (HPU)

- **Modular design for multiple configurations.**
- **Minimized height and slim design are ideal for in-plant operation**
- **Intelli-Drive wireless control system is intuitive and easy to use**
- **One power pack can operate 2-3 trailers maximum depending on model**
- **Two trailers and power pack can be shipped inside a 20 ft. container**
- **Hydraulic power unit is tier-4 diesel engine for reduced emissions.**

Capacity (per trailer) ton (kN)	Model Number	Maximum Configuration (trailers in rows)	Steering Range (degrees)	Lifting Stroke (mm)	 HPU * (kg)	 Trailer (kg)
60 (600)	SPMT600-100	4 x 2	-50° - +50°	384	2500	8000
	SPMT600-360	6 x 2	-179° - +179°	384	2800	8300

* HPU hydraulic power unit = 54 kW Power Pack Diesel

SPMT Series

Capacity:

60 ton (600 kN)

Transport Speed (unloaded - loaded):

3 - 1,5 km/h

Motor Size:

54 kW

Self-Propelled Modular Transporter

The Enerpac Self-Propelled Modular Transporter (SPMT) features a minimized height and slim design, which makes it very easy to operate in confined spaces. Each transporter consists of a rigid frame with 6 wheel units, divided over 3 axle lines. Each wheel unit is equipped with a lifting cylinder and a steering actuator. Two axles are driven, the centre axle is non driven. Wheel propulsion is established by wheel drives.

The SPMT is operated by the Intelli-Drive Remote Controller. This remote controller can be used both hard wired and wireless (based on radio frequency).

The SPMT is a modular system and can be built up to a maximum configuration of six transporters in a row and two in the width. This is the maximum setup of units that can work together on just one Intelli-Drive Remote Controller.

The SPMT is a modular system comprised of trailers with 3 axle lines each and diesel hydraulic power units (HPU). Depending on the model number, the trailers and HPUs can be configured to a maximum of 4 trailers in 2 rows (4x2) or 6 trailers in 2 rows (6x2).

▼ Turbine rotor transport.

Custom Heavy Lifting Solutions

When your application requires something other than our standard product offering, look to Enerpac Heavy Lifting Technology, Experience and Expertise.

Our group of engineers, designers and specialist, will work with you to understand your specific application and provide a turn-key solution that will exceed your expectations.

STEEL FABRICATION

Enerpac has a dedicated facility for steel fabrication and welding. We design and manufacture custom structures used in demanding heavy-lifting applications.

ENGINEERING

Enerpac has a multi-disciplined engineering team capable of design and development of all aspects of a heavy lifting system. Leveraging design and application experience with the latest in computer software, rapid prototyping and analysis methods ensures delivery of the highest quality systems.

ELECTRONICS

Enerpac designs all control systems in-house. This capability keeps control technology close to the design engineers who are developing the rest of the system. In doing so, we can tailor the control system to match unique project requirements.

MACHINING

Enerpac utilizes the latest in CNC machining technologies and manufactures all large and special hydraulic cylinders in-house. We can machine diameters up to 1000 mm with lengths to 6000 mm.

FIELD SUPPORT

Enerpac Heavy Lifting Technology is available to provide on-site support including training and troubleshooting of systems. We also stock repair parts and consumable items at several locations to ensure fast delivery and minimal downtime.

HYDRAULIC POWER UNITS

Enerpac designs, assembles and tests small to large hydraulic power units in-house. Power units range from 0,5 to 240 kW and are tested with the system they are intended to operate.

MAINTENANCE and REPAIR

Due to the unique nature of Enerpac Heavy Lifting Technology, we offer complete maintenance and repair services. Our M&R group is available to assist customers who do not have access to local service facilities qualified to work on these systems.

OFFSHORE GANTRY CRANE

The Enerpac Over Head Travel Crane (OHTC) comprises two pairs of lifting beams, with an overall width of 30m, and a lifting capacity of 4800 ton for lifting, moving and lowering the concrete blocks for the offshore highway.

STRAND JACK GANTRY

The strand jack gantry is a steel structure to facilitate erection and skidding back, forth and sideways of heavy loads. The Enerpac strand jack gantry can be used with either skidding systems or hydraulic gantries on top.

TRAVEL GANTRY

The travel gantry combines the safety and efficiency of a hydraulic gantry with the ease of use of SPMT (self-propelled modular transporter) technology. With a lifting capacity of 67 ton, the travel gantry sets a new standard in equipment and container handling.

BRIDGE LAUNCHING SYSTEMS

Spindle Bar System: group of in-line hollow plunger cylinders. The hollow plungers allow the steel bars to be inserted through the cylinders, which are used for pushing, pulling and braking. **Enerpac Enerlauncher** is an automatic and synchronous incremental hydraulic tandem launching system with a 800 ton lifting section and an 300 ton push/pull section.

JACK-UP SYSTEMS

The jack-up system is a custom developed multipoint lifting system – synchronically lift and mechanically hold. A typical system setup includes four jack-up units positioned under each corner of a load.

ROTOR REMOVAL AND INSTALLATION SYSTEM

The generator rotor removal and installation system is a custom developed product for removing and installing the rotor (field) in a power plant's generator. The system is designed to comply with the varying dimensions and challenging accessibility of a plant's generator.

CUSTOM HYDRAULIC PRESSES

Our hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.

SELF-ERECTING TOWER

The Enerpac Self Erecting Tower (ESET) is a self-erecting tower lift system that enables you to build a free standing gantry from ground level. The ESET can be supplied in various capacities and lifting heights and is built with standard modular components, enabling a flexible solution to future project demands.

LAS VEGAS WHEEL

Our expertise has been acknowledged by the world's leading industrial professionals and has contributed to the successful movement of a number of the most recognizable structures on earth. At the time of construction the Las Vegas High Roller was the largest observation wheel in the world. A custom hydraulic drive system was developed to propel the wheel for daily use and was also used to construct the wheel in sections.

Enerpac 'Yellow Pages' stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine, then you will appreciate these pages. The 'Yellow Pages' are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these 'Yellow Pages' and you will benefit even more from Enerpac High Pressure Hydraulics.

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing. Enerpac worked hard to earn the quality rating ISO 9001, in its ongoing pursuit of excellence.

ISO 1402, ISO 4672, ISO 6803

Enerpac thermoplastic hoses are related to the criteria set forth in these standards.

ATEX 95 Certified

The ATP, ZA and XA-Series air pumps and S and W-Series torque wrenches are tested and certified according to the Directive 2014/34/EU "ATEX Directive". The explosion protection is for equipment group II, equipment category 2 (hazardous zone area 1), in gas and/or dust atmospheres. ATP, ZA and XA-Series air pumps are marked: Ex II 2 GD ck T4.

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at maximum 700 bar (10.000 psi) pressure unless otherwise specifically noted.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of the Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TÜV and by CSA, national recognized testing laboratories.

EMC Directive

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2004/108/EC.

CE Marking & Conformity

Enerpac provides a Declaration of Conformity and CE marking for products that conform with the European Community Directives.

ASME B30.1-2015

Our cylinders fully comply with the criteria set forth by the American National Standards Institute (except RD and BRD-Series).

Safety Instructions

When used correctly, hydraulic power is one of the safest methods of applying force to your work. And to that end we offer some DO's and

DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

- Lift slowly and check the load often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them.

The line drawings and application photo's of Enerpac products throughout this catalog are used to portray how some of our customers have used hydraulics in industry.

In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs.

Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system.

Enerpac can not be held responsible for damage or injury, caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with instructions spelling out specific safety information. Please read them carefully.

Jacks

Provide a level and solid support for the entire jack base area.

The entire jack saddle must be in contact with the load. Movement of the load to be in the same direction as jack plunger.

Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

Remove the jack handle when it is not being used.

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

Both couplers must be connected when using double-acting cylinders. Ensure return hose is fitted.

Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 65 °C (150 °F).

General

80% Manufacturer's rating of load and stroke are maximum safe limits. **80%** Good practice encourages using only 80% of these ratings!

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Don't override the factory setting of relief valves. Always use a gauge to check system pressure.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 115 millimetres. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off of the ground through the couplers.

* Oil Flow

- Determined by motor size
- Directly affects electrical power requirements
- Determines cylinder or tool speed

** Duty Cycle

- Extended applications require more than one hour of uninterrupted pump use
- Intermittent use - from 20 minutes to one hour

*** Portability

1 Cylinder

Applies hydraulic force.
Page 5

2 Cylinder Base Plate

For applications like lifting where additional cylinder stability is required.
Page 10

3 Pump

Provides hydraulic flow.
Page 69

4 Hose

Transports hydraulic fluid.
Page 122-123

5 Male Coupler

For quick connection of the hose to system components.
Page 124-125

6 Female Coupler

For quick connection of the hose end to the system components.
Page 124-125

7 Gauge

To monitor pressure of the hydraulic circuit.
Page 128-134

8 Gauge Adaptor

For quick and easy gauge installation.
Page 134-135

9 Swivel Connector

Allows proper alignment of valves and/or gauges. Used when units being connected cannot be rotated.
Page 135

10 Auto-Damper Valve V-10

Used to protect gauge from damage due to sudden pressure pulses in the system. Needs no adjustment and allows correct positioning of gauge, prior to tightening.
Page 136-137

11 4-Way Directional Control Valve

Controls the direction of hydraulic fluid in a double-acting system.
Page 116-117

Single-acting push application, such as in a press.

The hand pump offers controlled cylinder advance, but may require many hand pump strokes in longer stroke applications when the cylinder capacity is 25 ton or above.

Examples of pump, hose and cylinder sets can be found on pages 56-57 and 59.

Single-acting cylinder with longer stroke used for lifting applications.

Double-acting cylinder set-up used for lifting applications where a slow controlled descent of the load must be maintained.

Double-acting cylinder set-up used in a push/pull application.

12 3-Way Directional Control Valve
Controls the direction of hydraulic fluid in a single-acting system.
Page 116-117

13 Safety Holding Valve
Controls load descent in lifting applications.
Page 136-137

14 Manifold
Allows distribution of hydraulic fluid from one power source to several cylinders.
Page 126

15 Needle valve
Regulates the flow of hydraulic fluid to or from the cylinders.
Page 136-137

Two point lifting set-up using single-acting cylinders.

Four point lifting set-up, using single-acting cylinders and directional control valves.

Flow

A hydraulic pump produces flow.

Pressure

Pressure occurs when there is resistance to flow.

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig.1). This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see section Heavy Lifting Technology) must be added to the system (Load B).

CAUTION!

When lifting or pressing, always use a gauge.

A gauge is your 'window' to the system. It lets you see what's going on. You will find the gauges in the System Components section.

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the “effective area” of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
F	=	P	x	A

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC-106 cylinder with 14,5 cm² effective area operating at 700 bar will generate what force?

$$\text{Force} = 7000 \text{ N/cm}^2 \times 14,5 \text{ cm}^2 = 101500 \text{ N} = 101,5 \text{ kN}$$

Example 2

An RC-106 cylinder lifting 7000 kg will require what pressure?

$$\text{Pressure} = 7000 \times 9,8 \text{ N} \div 14,5 \text{ cm}^2 = 4731,0 \text{ N/cm}^2 = 473 \text{ bar.}$$

Example 3

An RC-256 cylinder is required to produce a force of 190.000 N. What pressure is required?

$$\text{Pressure} = 190.000 \text{ N} \div 33,2 \text{ cm}^2 = 5722,9 \text{ N/cm}^2 = 572 \text{ bar.}$$

Example 4

Four RC-308 cylinders are required to produce a force of 800.000 N. What pressure is required?

$$\text{Pressure} = 800.000 \text{ N} \div (4 \times 42,1 \text{ cm}^2) = 4750,6 \text{ N/cm}^2 = 476 \text{ bar.}$$

Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

An HCL-2506 cylinder is going to be used with a power source that is capable of 500 bar. What is the theoretical force available from that cylinder?

$$\text{Force} = 5000 \text{ N/cm}^2 \times 363,1 \text{ cm}^2 = 1.815.500 \text{ N} = 1815 \text{ kN} (185 \text{ ton}).$$

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
------------------------------	---	--------------------------------	---	------------------------

* Note: these are theoretical examples and do not take into account the compressibility of oil under high pressure.

Example 1:

An RC-158 cylinder with 20,3 cm² effective area and 200 mm stroke requires what volume of oil?

$$\text{Oil Capacity} = 20,3 \text{ cm}^2 \times 20 \text{ cm} = 406 \text{ cm}^3$$

Example 2:

An RC-5013 cylinder has an effective area of 71,2 cm² and a stroke of 320 mm. How much oil will be required?

$$\text{Oil Capacity} = 71,2 \text{ cm}^2 \times 32 \text{ cm} = 2278,4 \text{ cm}^3$$

Example 3:

An RC-10010 cylinder has an effective area of 133,3 cm² and a stroke of 260 mm. How much oil will it require?

$$\text{Oil Capacity} = 133,3 \text{ cm}^2 \times 26 \text{ cm} = 3466 \text{ cm}^3$$

Example 4:

Four RC-308 cylinders are being used, each with an effective area of 42,1 cm² and a stroke of 209 mm. How much oil will be required?

$$\text{Oil Capacity} = 42,1 \text{ cm}^2 \times 20,9 \text{ cm} = 880 \text{ cm}^3 \text{ for one cylinder}$$

Multiply by four to obtain the required capacity: 3520 cm³

CAUTION!

Enerpac oil will compress 2,28% at 350 bar and 4,1% at 700 bar.

Conversion Tables

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z1 for depth of internal base thread.

- | | |
|---|---------------------------------------|
| A = Collapsed height | L = Plunger centre to side of base |
| B = Extended height | M = Mounting holes to plunger centre |
| C = Cylinder body length | N = Length of smaller cylinder part |
| D = Cylinder outside diameter | O = Plunger hole or thread of saddle |
| D1 = Cylinder width | P = Plunger thread length |
| E = Cylinder inside diameter | Q = Plunger outside thread |
| F = Plunger rod diameter | U = Pitch (BC) of mounting holes |
| G = Oil inlet thread | V = Thread of cylinder mounting holes |
| H = Cylinder bottom to advance port | W = Collar thread |
| I = Cylinder top to retract port | X = Collar thread length |
| J = Saddle outside diameter | Y = Centre hole diameter |
| K = Cylinder rod protrusion at collapsed height | Z = Internal base thread |
| | Z1 = Depth of internal base thread |

Key to measurements

All capacities and measurements in the catalogue are expressed in uniform values.

The conversion chart provides helpful information for their translation into equivalent systems.

All ton values specified in this catalogue are metric tonnes and are for cylinder class identification only.

Please refer to the kN data for calculations.

Cylinder Speed Charts

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 700 bar Enerpac hydraulic pump.

The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine: Cylinder plunger speed

An RC-256 cylinder (25 ton) is powered by a ZE3-Series two stage pump. While lifting the load, the cylinder plunger travels at 2,8 mm per second. While extending towards the load, the cylinder plunger travels at 30,9 mm per second.

To determine: Best matching pump

Your 25 ton cylinder needs to move a load at a speed of 3,0 mm per second. Simply go down from the top of the chart, to the value of 2,8 mm per second. Follow the chart to the right to find that the ZE3-Series pump is most suitable for your application.

Millimetres of cylinder plunger travel per hand pump plunger stroke

No Load indicates the plunger speed as the plunger extends towards the load (1st stage).

Load indicates the plunger speed as the load is lifted at a system pressure of 700 bar (2nd stage).

Example: At what speed (V) will the RC-256 (25 ton) cylinder move when powered by a ZE3-Series pump?

RC-256 Cylinder Effective Area = 33,2 cm²

ZE3-Series pump oil Flow (no load) = 6150 cm³/min

$$\text{Cylinder Plunger Speed (mm/sec)} = \frac{\text{Pump Oil Flow (cm}^3\text{/min)} \times 10}{\text{Cylinder Effective Area (cm}^2\text{)} \times 60}$$

$$\text{Speed V} = \frac{6150 \text{ cm}^3\text{/min} \times 10}{33,2 \times 60} = 30,9 \text{ mm/sec}$$

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports: pressure (P), tank (T), and cylinder (A).

A 4-way valve has 4 ports: pressure (P), tank (T), advance (A) and retract (B).

Single-Acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-Acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Centre Configuration

The centre position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem**

Centre. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed**

Centre configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit.

Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more type of valves, such as Open Centre and Float Centre. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open Centre

Float Centre

Directional Control Valves

3-Way Valves are used with single-acting cylinders.

4-Way Valves are used with double-acting cylinders.

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder Controlled by a 3-way, 3-position valve.

* Heavy hexagon nuts.

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturers instructions or engineering recommendations when making bolted connections.

IMPORTANT

The hexagon sizes shown in the tables should be used as a guide only. Individual sizes should be checked before specifying any equipment.

BSH-Series Heavy Duty Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN3129 and

DIN3121 or ASME-B107.2/1995.

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint the first time.

Bolting Solutions

For further information on Torque Tightening or other controlled tightening methods, please visit our website or ask for our **E414e Bolting Tools Catalogue**.

Bolting Integrity Software

A comprehensive free on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools.

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as a combined Application data sheet and Joint completion report.

What is Torque?

It is a measure of how much force acting on an object causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torqueing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

Torque Tightening

Turning movement

Stretch of Fastener (Pre-load)

Preload (residual load) = Applied Torque *minus* Frictional Losses

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seize compounds should be applied to both, the nut bearing surface and the male threads.

Frictional Losses

Friction points should always be lubricated when using the torque tightening method.

Select the Right Torque Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt, more torque is usually required than when tightening.
- For general conditions it can take up to **2½ times** the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of bolted joints

- Humidity corrosion (rust) requires up to **twice** the torque required for tightening.
- Sea water and chemical corrosion requires up to **2½ times** the torque required for tightening.
- Heat corrosion requires up to **3 times** the torque required for tightening.

Torque Procedure

When torquing it is common to tighten only one bolt at a time, which can result in Point Loading and Load Scatter.

To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut.
- Step 2** Tighten each bolt to one-third of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required. This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to **2½ times** the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

Tensioning requires longer bolts

INCORRECT

CORRECT

What is Bolt Tensioning?

Tensioning is the direct axial stretching of the bolt to achieve preload. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

Preload (residual load) = Applied Load minus Load Losses

What is Load Loss?

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

The preload depends on Applied Load and Load Loss (load loss factor).

GLOSSARY OF TERMS

Applied Load:

The load applied to a bolt during tensioning which includes an allowance for Load Loss.

Bolt Tensioning:

A method of controlled tightening which applies preload to a bolt by stretching it axially.

Breakout Torque:

The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

Elastic Range:

The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

Plastic Range:

The range on a stress / strain curve where the tensile load applied to a bolt results in permanent deformation.

Load Loss:

The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

Load Scatter:

The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

Preload:

The load in a bolt immediately after it has been tightened.

Proof Load:

Proof load is often used interchangeably with Yield Strength but is usually measured at 0,2% plastic strain.

Tensile Point:

The point at which the tensile loading on a bolt causes the bolt to rupture.

Torque Tightening:

The application of Preload to a bolt by turning of the bolt's nut.

Ultimate Strength:

The maximum tension which can be created by tensile load on a bolt.

Yield Strength:

The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

80% **Manufacturer's rating of pressure and load are maximum safe limits. Good practice encourages using only 80% of these ratings!** **80%**

Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and

provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

General Procedure

- Step 1:** The bolt tensioner is fitted over the stud.
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud (bolt).
- Step 3:** The stud's nut is wound down against the joint face
- Step 4:** Hydraulic pressure is released and the tensioner removed.

The bolt behaves like a spring, when the hydraulic pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened.

The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

Enerpac is the leading global provider of high-pressure hydraulic tools and solutions with a broad range of products, local expertise and worldwide distribution network. With a proven track record in a wide range of markets, Enerpac designs and manufactures high-quality tools and solutions for all industrial applications.

Enerpac has gained unique experience in delivering hydraulic solutions for the controlled movement and positioning of heavy objects. Enerpac supports your business by offering the right solutions and service to help you get your work done efficiently and safely.

Worldwide Catalogue Coverage

Enerpac Catalogues are printed in many languages. If your requirements call for product use in a different country, please send your request to the applicable country listed on page 292 or **www.enerpac.com**. The Enerpac catalogue of the country serving your specific market area will be forwarded promptly.

Enerpac Academy & Maintenance Program

Do you work with high-pressure hydraulic tools regularly or even every day? Operating such tools requires sound knowledge of how they work and this should be maintained. Effective

use of these tools boosts safety and reduces risk - both for you as the operator and for the environment within which the tools are used. Having the right training will enable you to use the tools safely and properly.

Enerpac Academy is our in-house training centre, set up exclusively for Enerpac business partners, Enerpac users and Enerpac employees: training programs ranging from tool expertise, repairs and maintenance, to safe operation of high-pressure hydraulic tools.

Putting theory into practice

The training courses are interactive and benefit from a highly diverse program that puts the covered theory into practice right away. Our training services are grounded in many years of experience in providing and applying Enerpac tools.

Tailored training

Enerpac Academy offers you the exclusive opportunity to train your (new) employees in making proper use of Enerpac tools. Our trainings can also be done on-site.

Safety training: Safe use of Enerpac high pressure hydraulic tools, user and environmental safety.

Controlled bolting trainings: Bolting tool theory, tool applications, hands-on training on safe and efficient use of torque wrenches, tensioners and pumps.

General hydraulic sales training: Knowledge of hydraulics, hydraulic tools and applications.

Tool repair training: Repair and maintenance of general Enerpac tools.

Application training: Tool feature and benefits, tool application review, safe use of hydraulic tools and market information.

Enerpac Academy – The Power of Knowledge

- Specialist in-house Enerpac training center
- Standard and tailored training programs
- Highly experienced trainers
- Selection of training courses with a proven (value adding) track record
- Knowledge and experience sharing
- User and tool safety come first.

Training Centre Locations

- Singapore
- Sydney (Australia)
- Ede (The Netherlands)
- Hosur, Tamil Nadu (India)
- Columbus, Wisconsin (USA)

Request sign up information

If you would like to schedule a training course, please contact Enerpac for a training calendar, application form, brochure and pricing.

EMP – Enerpac Maintenance Program

EMP is a preventive maintenance program. Your Enerpac Authorised Service Centre will check the tools on essential points: leaking, oil level and quality, maximum pressure setting, and damage. EMP reduces operational risks, increases safety and minimises extremely expensive delays in your operations. You will be advised about regular maintenance of the Enerpac tools.

- Work more safely
- Minimise operational risk
- Ensure tools are always available and in tip-top shape
- As good as new after repair
- Prevent downtime
- Advice on safe and effective use
- Maintenance when tools are not used.
