JANUS

Type 4 Safety Light Curtain

Product catalogue

Issue 1

 **REER**

JANUS

Light curtain ideal
for palletizer
applications

7-segment
display
self-diagnosis
and light curtain
status

External Muting sensors
2 or 4 sensors operating logic

Settings of each function
integrally performed via
the main connector

Integrated Muting functions

Long range versions
up to 80 meters

Patented ML and MT models
with Muting sensors built into
pre-wired and pre-aligned arms

"L" Logic Crossed
beams (one-way)

Suitable solution for any applications of pallet exit.

"L" Logic
Parallel beams
(one-way)

Suitable solution for transparent material: glass and bottling industry of pallet exit.

"T" Logic
Crossed beams
(two-way)

Suitable solution for the most common pallet infeed/outfeed applications. Ideal solution in case of a continuous flow of pallets even without separation between the pallets.

"T" Logic
Parallel beams
(two-way)

Suitable solution for transparent material and application with presence of a pallet with reduced width or not centred with respect to the conveyor. Through the verification of the 4 sensors, allows to set infinite Muting time-out.

Please note: this configuration needs a separation between two consecutive pallets equal to the distance between the two external Muting sensors.

Models with passive
retro-reflector element
available

MAIN FEATURES

The Janus Type 4 family of safety light curtains is the ideal solution for the protection of a vast number of high-risk industrial applications, in particular those requiring a high level of integration of the safety functions.

Janus models with built-in Muting function guarantees the independence of the light curtain from the control circuits of the system and, where necessary, also the integration of the Muting sensors.

The features of the Janus range include:

-  Settings of each function integrally performed via the main connector
-  Integration of the main safety functions, including self-testing of the solid state outputs, external device monitoring (EDM) and the Start/Restart interlock function
-  Integration of the Muting function for the MI models and of the Muting sensors for the ML and MT models
-  The utmost reliability in the field, thanks to the rugged construction and to the high level of immunity to external interference (optical, EMC, etc.)

-10 ... +55 °C operating temperature

-10 ... +55 °C

IP65 protection rate

1:2 scale

THE JANUS RANGE

JANUS M - BUILT-IN MUTING FUNCTION

JANUS MI SERIES

The MI series features dedicated connections for connecting external Muting sensors of any type such as photocells, proximity sensors, limit switches, etc.; it can manage the Muting function in both two-way and one-way mode.

A wide range of models with protected height from 310 mm to 1810 mm with resolution of 30, 40, 90 mm and models with 2, 3, 4 beams provides the solution to any application problem.

JANUS MI

Operating range selectable:
0 ... 6 m - low range
1 ... 16 m - high range

JANUS MI Long Range

Operating range selectable:
8 ... 30 m - low range
18 ... 60 m - high range

JANUS ML SERIES

The ML series, with 2 or 3 beams for body detection, uses an original system of horizontal arms (one for the emitter and one for the receiver) with built-in pre-wired and pre-aligned photoelectric Muting sensors which do not require any adjustment.

The arms can be adjusted in height in order to create a detection plane that is more or less angled, with the purpose to achieve correct and constant detection of the material in transit and therefore reliable operation of the protection system.

This ensures the maximum speed and simplicity of installation. The ML series manages the Muting function in one-way mode and is particularly suitable for protecting the outfeed gates of palletizing systems.

JANUS ML

Built-in Muting sensors with crossed beams
Operating range: 1 ... 2,5 m

JANUS ML S2

Special models for the correct detection of transparent object.
Built-in Muting sensors with parallel beams
Operating range: 0 ... 2 m

JANUS MT SERIES

The MT series features four horizontal arms (two for the emitter and two for the receiver) with built-in pre-wired and pre-aligned photoelectric Muting sensors that do not require any adjustment.

The MT series manages the Muting function in two-way mode for the protection of the infeed/outfeed gates in palletizing systems.

JANUS MT

Built-in Muting sensors with crossed beams
Operating range: 0 ... 2,5 m

JANUS MT S4

The MT series also includes MT S4 special models for the correct detection of transparent objects.
Built-in Muting sensors with parallel beams
Operating range: 0 ... 2 m

JANUS M TRX - BUILT-IN MUTING FUNCTION AND PASSIVE RETRO-REFLECTOR ELEMENT

**JANUS MI TRX and TRXL SERIES**

Janus MI TRX and MI TRXL is composed of an active element and of a passive retro-reflector element requiring no wiring.

It features dedicated connections for connecting external Muting sensors of any type such as photocells, proximity sensors, limit switches, etc. The MI series can manage the Muting function in both two-way and one-way mode.

Models with 2, 3, 4 beams provide the solution to any application problem in access control.

JANUS MI TRX

2 or 4 external sensors
Operating range: 0 ... 6 m

JANUS MI TRX L

2 external sensors - Single connector for all connections
Operating range: 0 ... 6 m

**JANUS ML TRX, ML TRX G and ML TRX V SERIES**

Also this series uses an original system of horizontal arms (one for the emitter and one for the receiver) with built-in, pre-wired and pre-aligned, photoelectric Muting sensors which do not require any adjustment.

Both the light grid and the sensor arms are composed of an active, emitter/receiver element and of a passive, retro-reflector element, requiring no wiring.

The ML TRX series manages the Muting function in one-way mode and is particularly suitable for protecting the outfeed gates of palletizing systems.

JANUS ML TRX

Operating range: 0 ... 3,5 m

JANUS ML TRX G

Glass models with special built-in Muting sensors to optimise correct and consistent detection of glass and transparent materials in general.
Operating range: 0 ... 2 m

JANUS ML TRX V

Models with longer built-in Muting arms available for high-speed conveyors.
Operating range: 0 ... 3,5 m

JANUS ML TRX GV

Model that integrates both the characteristics of the previous: TRX G (glass models) and TRX V (high-speed conveyors).
Operating range: 0 ... 2 m

**JANUS MT TRX, MT TRX G and MT TRX V SERIES**

Janus MT TRX and MT TRX G features four horizontal arms (two for the emitter and two for the receiver) with built-in pre-wired and pre-aligned photoelectric Muting sensors that do not require any adjustment.

Both the light grid and the sensor arms are composed of an active, emitter/receiver element and of a passive, retro-reflector element, requiring no wiring.

The MT TRX series manages the Muting function in two-way mode for the protection of the infeed/outfeed gates in palletizing systems.

JANUS MT TRX

Operating range: 0 ... 3,5 m

JANUS MT TRX G

Glass models with special built-in Muting sensors to optimise correct and consistent detection of glass and transparent materials in general.
Operating range: 0 ... 2 m

JANUS MT TRX V

Models with longer built-in Muting arms available for high-speed conveyors
Operating range: 0 ... 3,5 m

JANUS MT TRX GV

Model that integrates both the characteristics of the previous: TRX G (glass models) and TRX V (high-speed conveyors).
Operating range: 0 ... 2 m

**JANUS MM TRX**

Janus MM TRX is a modular system with 2, 3 and 4 beams which permits to add pre-wired Muting arms in order to get either a ML TRX (one-way) or a MT TRX (two-way) model with a few simple steps. SL TRX and ST TRX are the pre-wired Muting arms and can be ordered separately.

Janus MM TRX can also be used with external Muting sensors, with 2 or 4 sensors logic.

Muting logics for models MM TRX are:

- one-way (only exit), together with SL TRX
- two-way (two-way) together with SL TRX and ST TRX

Operating range: 0 ... 6 m (0 ... 3,5 m if used with SL TRX and ST TRX).

JANUS J - BUILT-IN CONTROL FUNCTIONS

JANUS J

Models with 2, 3, 4 beams.

JANUS J - LR and LR M12

Long Range models with 2, 3, 4 beams and models with 40 mm resolution and protected height from 610 to 1210 mm.

Long Range models with 2, 3 and 4 beams are also available in M12 version with a M12 8-pole connector for the receiver.

JANUS J LRH M12, J LRH M12 ILP

Long Range models with 2, 3 and 4 beams and M12 connector.

ILP version with integrated laser pointer.

JANUS J

Operating range selectable:
0 ... 6 m - low range
1 ... 16 m - high range

JANUS J - LR, JANUS J LR M12

Operating range selectable:
0 ... 6 m - low range
1 ... 16 m - high range

JANUS J LRH M12

Operating range selectable:
8 ... 30 m - low range
18 ... 60 m - high range

JANUS J LRH M12 ILP

Operating range selectable:
18 ... 40 m - low range
25 ... 80 m - high range

JANUS J TRX - BUILT-IN CONTROL FUNCTIONS AND PASSIVE RETRO-REFLECTOR ELEMENT

JANUS J TRX, TRXL SERIES

Janus J TRX and J TRXL are safety light grids with 2, 3, 4 beams consisting of an active element (emitter/receiver) and a retro-reflector passive element which does not require electrical connections.

Janus series J TRX and TRXL are the simplest and quickest installation solutions for detection of a person in access control in hazardous areas, and the ideal solutions for all applications in which it is difficult or costly to cable electrical lines.

JANUS J TRX

M12 8-pole connector
Operating range: 0 ... 6 m

JANUS J TRXL

M23 19-pole connector
Operating range: 0 ... 6 m

MUTING TYPES

TWO-WAY MUTING WITH 2 SENSORS

- Max. time between the 2 Muting activation signals: 4 sec
- Possibility of use with photocells, proximity sensors, and limit switches
- Max. Muting time-out time 30 sec. or 90 min. selectable
- Muting enable input available (TRX models only)

Characteristics

- Suitable for the most common pallet infeed/outfeed applications
- Moreover, the TRX models have also the "Muting enable input" function, which starts the Muting sequence only if necessary for the machine cycle, i.e. Muting enabled only when the conveyor is moving

Models: MI - MI TRX - MI TRXL - MM TRX

TWO-WAY SEQUENTIAL MUTING WITH 4 SENSORS

- Max. time between the Muting activation signals: 4 sec. or infinite, selectable
- Possibility to use with photocells, proximity sensors, and limit switches
- Max. Muting time-out time 30 sec. or infinite, selectable
- Muting enable input available (TRX models only)

Characteristics

- Correct Muting sequence even in the presence of pallets with reduced width and/or length or not centred with respect to the conveyor
- Possibility of two-way transit of the pallets and simultaneous protection in the two directions against unauthorised access of personnel
- Moreover, the TRX models have also the "Muting enable input" function, which starts the Muting sequence only if necessary for the machine cycle, i.e. Muting enabled only when the conveyor is moving

Models: MI - MI TRX - MM TRX

ONE-WAY MUTING WITH 2 SENSORS

- Max. time between the 2 Muting activation signals: 4 sec
- Possibility to use with photocells, proximity sensors, and limit switches
- Max. Muting time-out time: 30 sec. or 90 min. selectable

Characteristics

- The light curtain only enables the pallet outfeed
- The Muting function can only be activated from inside the protected zone. No possibility to activate a Muting sequence from the outside
- Elimination of bulk outside the protected area, as the Muting sensors are only present inside the area
- Correct Muting sequence even in the presence of a pallet with reduced width and/or length or not centred with respect to the conveyor
- Moreover, the TRX models have also the "Muting enable input" function, which starts the Muting sequence only if necessary for the machine cycle, i.e. Muting enabled only when the conveyor is moving

Models: MI - MI TRX - MM TRX

ONE-WAY MUTING WITH 2 SENSORS - 2 BUILT-IN MUTING SENSORS WITH CROSSED BEAMS

- Max. time between the 2 Muting activation signals: 4 sec
- Operating range 1 ... 2.5 metres
- Muting sensor elements adjustable in height and angle
- Max. Muting time-out time: 30 sec. or 90 min. selectable
- Versions with 2 or 3 beams

Characteristics

- Reduced installation time and costs
- Sensors positioned in compliance with the regulations regarding the geometry of Muting sensors (IEC TS 62046) and all the other safety parameters; this makes it possible to avoid dangers arising from positioning errors and from possible tampering
- The light curtain only allows pallet outfeed
- The Muting function can only be activated from inside the protected zone. No possibility to activate a Muting sequence from the outside
- Elimination of bulk outside the protected area, as the Muting sensors are only present inside the area
- Correct Muting sequence even in the presence of a pallet with reduced width and/or length or not centred with respect to the conveyor

Models: ML

ONE-WAY MUTING WITH 2 SENSORS - 2 BUILT-IN MUTING SENSORS WITH PARALLEL BEAMS

- Max. time between the 2 Muting activation signals: 4 sec
- Operating range: 0 ... 2 meters for ML S2 and ML TRX G models, 0 ... 3,5 for ML TRX model
- Muting sensor elements adjustable in height and angle
- Max. Muting time-out time: 30 sec. or 90 min. selectable
- Versions with 2 or 3 beams
- Muting enable input available (TRX models only)

Characteristics

- Reduced installation time and costs
- The light curtain only allows pallet outfeed
- The Muting function can only be activated from inside the protected zone. No possibility to activate a Muting sequence from the outside
- Elimination of bulk outside the protected area, as the Muting sensors are only present inside the area
- Correct Muting sequence even in the presence of a pallet with reduced width and/or length or not centred with respect to the conveyor
- ML TRX G models especially designed for transparent material, ideal solution for glass and bottling industry
- ML TRX V models for high-speed conveyors
- ML TRX GV model with both the characteristics of the previous
- Moreover, the TRX models have also the "Muting enable input" function, which starts the Muting sequence only if necessary for the machine cycle, i.e. Muting enabled only when the conveyor is moving

Models: ML S2 - ML TRX - ML TRX G - ML TRX V - ML TRX GV - MM TRX with SL TRX

TWO-WAY MUTING WITH 2 SENSORS - 2 BUILT-IN MUTING SENSORS WITH CROSSED BEAMS

- Max. time between the 2 Muting activation signals: 4 sec.
- Operating range: 1 ... 2.5 metres
- Muting sensor elements adjustable in height and angle
- Max. Muting time-out time: 30 sec. or 90 min. selectable
- Versions with 2 or 3 beams

Characteristics

- Reduced installation time and costs
- Standard solution for the most common pallet infeed/outfeed applications

Models: MT

TWO-WAY SEQUENTIAL MUTING 4 SENSORS - 4 BUILT-IN MUTING SENSORS PARALLEL BEAM

- Max. time between the Muting activation signals: 4 sec. or infinite, selectable
- Operating range: 0 ... 2 meters for MT S4. and 0 ... 3.5 meters for MT TRX models
- Muting sensor elements adjustable in height and angle
- Max. Muting time-out time: 30 sec. or infinite, selectable
- Versions with 2 or 3 beams

Characteristics

- Correct Muting sequence even in the presence of a pallet with reduced width and/or length or not centred with respect to the conveyor
- Possibility of two-way transit of the pallets and simultaneous protection in the two directions against unauthorized access of personnel
- MT TRX G models especially designed for transparent material, ideal solution for glass and bottling industry
- MT TRX V models for high-speed conveyors
- MT TRX GV model with both the characteristics of the previous
- Moreover, the TRX models have also the "Muting enable input" function, which starts the Muting sequence only if necessary for the machine cycle, i.e. Muting enabled only when the conveyor is moving

Models: MT S4 - MT TRX - MT TRX G - MT TRX V - MT TRX GV - MM TRX with SL TRX and ST TRX

APPROVALS

- 2006/42/EC: "Machine Directive"
- 2014/30/EU: "Electromagnetic Compatibility Directive"
- 2014/35/EU: "Low Voltage Directive"
- EN 61496-1/A1:2013 "Safety of machinery - Electro sensitive protective equipment - General requirements and tests"
- IEC 61496-2:2010 (SIL3) "Safety of machinery - Electro-sensitive protective equipment - Particular requirements for equipment using active opto-electronic protective devices (AOPDs)"
- IEC 61508-1:2010 (SIL3) "Functional safety of electrical/electronic programmable electronic safety related systems - General requirements"
- IEC 61508-2:2010 (SIL3) "Functional safety of electrical/electronic/programmable electronic safety related systems - Requirements for electrical/electronic/programmable electronic safety-related systems".
- IEC 61508-3:2010 (SIL3) "Functional safety of electrical/electronic programmable electronic safety related systems: Software requirements"
- IEC 61508-4:2010 (SIL3) "Functional safety of electrical/electronic programmable electronic safety related systems - Definitions and abbreviations"
- EN ISO 13849-1:2015 (Cat. 4, PL e) "Safety of machinery - Safety-related parts of control systems - Part 1: General principles for design"
- IEC 62061:2005 / A2: 2015 (SILCL3) "Safety of machinery - Functional safety of safety-related electrical, electronic and programmable electronic control systems"
- EN 50178:1997 "Electronic equipment for use in power installations"
- EN 55022:2006 "Information Technology Equipment - Radio Disturbance Characteristics - Limits and Methods of Measurement"
- UL (C+US) mark For USA and Canada
- ANSI / UL 1998: "Safety Software in Programmable Components"
- The mark TS indicates that the product has been approved by the government of Taiwan

NOTE: ML TRX and MT TRX models are quick and easy to install. Also, they are complying with regulatory requirements on Muting sensor geometry and all other safety-related parameters, as per IEC TS 62046 and other current standards.

JANUS MI

WITH MUTING FUNCTION

SAFETY LEVEL

TYPE 4
SIL 3 - SILCL 3
PL e - Cat. 4

Resolution (mm)
30, 40, 90

Start/Restart
Manual or Automatic

Muting logic
Two-way One-way

Access control
2, 3, 4 beams

Safety outputs
2

Muting sensors
External 2 or 4

Built-in Muting function in all the models. Ideal for palletizer applications.

Models with front M12 connectors for external Muting sensors, with operating logic with 2 or 4 sensors.

Configuration is carried out via hardware by means of the main connector.

Use of unshielded cables up to 100 m.

MJB connection box for quick connection of the light curtains and providing the main commands necessary for their operation close to the protected gate.

Protected heights:

310 mm ... 1810 mm - Models 40, 90 mm resolution.

310 mm ... 1210 mm - Models 30 mm resolution.

TECHNICAL FEATURES

Max. range (m)	Selectable 6 or 16
Response time (ms)	7 ... 30
Safety outputs	2 PNP auto-controlled - 500 mA at 24 VDC with short-circuit, overload, polarity reversal protection
Light curtain status indication and weak signal output	PNP - 100 mA at 24 VDC
Status display	7-segment display and LEDs for self-diagnosis and light curtain status
Muting lamp output (mandatory)	24 VDC; 0,5 ... 5 W
External Device Monitoring	External device monitoring feedback input with enabling, selectable
Max. Muting time-out	30 sec. or 90 min. selectable (30 sec. or infinite selectable only for models with 4 sensors two-way logic)
Override function	Built-in override function with 2 operating modes, selectable: - manual action with hold to run - automatic with pulse command
Max. override time-out (min.)	15
Power supply (VDC)	24 ± 20%
Muting logic	Two-way with 2 or 4 sensors One-way with 2 sensors
Muting sensors	External Muting sensors with relay or PNP output (dark-on logic)

JANUS ML

WITH MUTING FUNCTION

Access control	Start/Restart	SAFETY LEVEL TYPE 4 SIL 3 - SILCL 3 PL e - Cat. 4
2, 3 beams	Manual or Automatic	
Safety outputs	Muting logic	Muting sensors
2	One-way	2 built-in

Built-in Muting function in all the models. Ideal for palletizer applications. Pallet outfeed only.

Muting sensors optoelectronics with 2 crossed or parallel beams built into 2 pre-wired and pre-aligned arms, adjustable in height and angle.

ML S2 models for detection of transparent object. Built-in sensor with parallel beams.

Configuration is carried out via hardware by means of the main connector.

Use of unshielded cables up to 100 m.

MJB connection box for quick connection of the light curtains and providing the main commands necessary for their operation close to the protected gate.

TECHNICAL FEATURES

Operating range (m)	1 ... 2,5 0 ... 2 for ML S2 models
Response time (ms)	7 ... 30
Safety outputs	2 PNP auto-controlled - 500 mA at 24 VDC with short-circuit, overload, polarity reversal protection
Light curtain status indication and weak signal output	PNP - 100 mA at 24 VDC
Status display	7-segment display and LEDs for self-diagnosis and light curtain status
Muting lamp output	24 VDC; 0,5 ... 5 W
External Device Monitoring	External device monitoring feedback input with enabling, selectable
Max. Muting time-out	30 sec. or 90 min. selectable
Override function	Built-in override function with 2 operating modes, selectable: - manual action with hold to run - automatic with pulse command
Max. override time-out (min.)	15
Power supply (VDC)	24 ± 20%
Muting logic	One-way with 2 sensors
Muting sensors	Optoelectronics with 2 crossed or parallel beams (model ML S2). Built-in – pre-aligned – pre-wired, with adjustable height and angle

SENSOR ELEMENT ADJUSTMENT - ML and MT versions

The sensor elements present in all Janus ML and MT versions are adjustable in height and angle.

This important and unique feature enables the inclination of the detection plane of the sensors to obtain correct and constant detection of irregular materials in transit.

Models ML TRX G e MT TRX G (Glass) with special built-in Muting sensors to optimise correct and consistent detection of glass and transparent materials in general.

A reference ruler placed on the side of the barrier facilitates the alignment of the arms.

JANUS MI TRX

WITH MUTING FUNCTIONS AND PASSIVE RETRO-REFLECTOR ELEMENT

TECHNICAL FEATURES

Max. range (m)	6
Response time (ms)	≤ 10,5
Safety outputs	2 PNP - 500 mA at 24 VDC with short-circuit, overload, polarity reversal protection
Light curtain status indication and weak signal output	PNP - 100 mA at 24 VDC
Muting status indication output	PNP - 100 mA at 24 VDC
Muting lamp output	24 VDC - 0,5 ... 5 W
Muting enable input	0 or 24 VDC (Active Low)
Status display	7-segment display and LEDs for self-diagnosis and light curtain status
External Device Monitoring	External device monitoring feedback input with enabling, selectable
Max. Muting time-out	30 sec. or 90 min. selectable and 30 sec. or infinite selectable for MI TRX models with 4 sensors logic
Override function	Built-in override function with 2 operating modes, selectable: - manual action with hold to run - automatic with pulse command
Max. override time-out (min.)	15
Power supply (VDC)	24 ± 20%
Muting logic	MI TRX - two-way with 2 or 4 sensors and one-way with 2 sensors MI TRXL - two-way with 2 sensors
Muting sensors	External Muting sensors with relay or PNP output (dark-on logic)

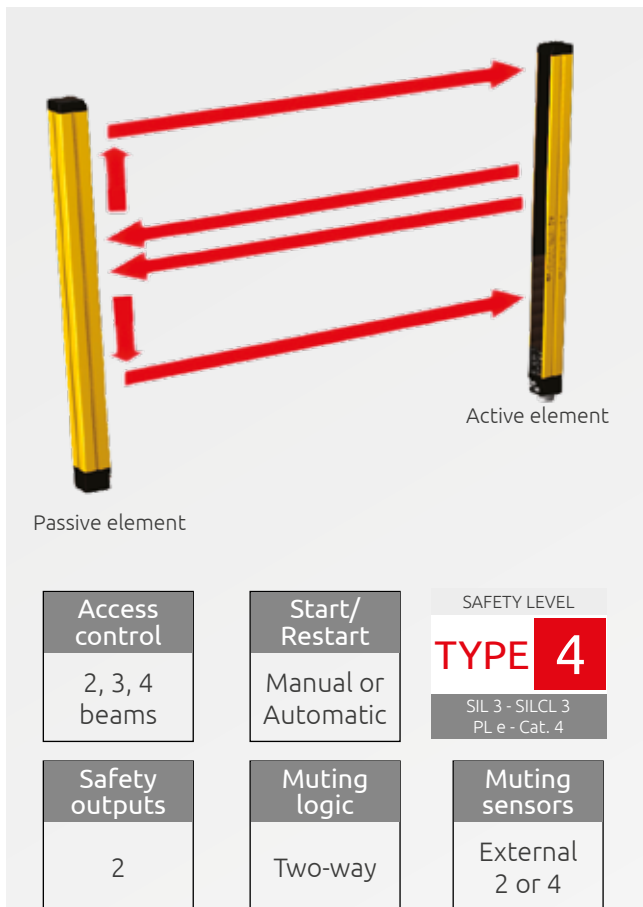

CABLES NEEDED

Janus J TRX and J TRXL are safety light grids with 2, 3, 4 beams consisting of an active element (emitter/receiver) and a retro-reflector passive element which does not require electrical connections.

Simplest and quickest installation solutions for detection of a person in access control in hazardous areas, and the ideal solutions for all applications in which it is difficult or costly to cable electrical lines.

Built-in Start/Restart interlock, selectable.

All configuration via hardware by means of main connector. No need of configuration via software.

Use of unshielded cables up to 100 m long.

MJB connection box for quick connection of the light curtains and availability of the Restart command in the area of the protected gate (only for model J TRX L).

		Signal received OK
4 - Clear		Light curtain clear, OSSD outputs set OFF (the receiver is waiting for a Restart signal)

CODE LEGEND

Example:

JANUS MI E 4B TRX =

- Type 4 safety light curtain Janus family; Emitter
- Built-in control functions - EDM - Selectable manual or automatic Start/Restart
- Dedicated connections for external Muting sensors
- 4 beams - Protected height 910 mm
- Passive retro-reflector element

INTERFACES

Interface relay modules for safety light curtains with feedback input for EDM: Janus.

- Guided-contact safety relays
- Additional NC contact line for the monitoring by light curtain (EDM)

NOTE: AD SR0 and AD SR0A modules can only be connected to safety sensors equipped with feedback input for monitoring external relays (EDM).

Certified by
TÜV Rheinland
Product Safety GmbH

This product uses two guided contact safety relays manufactured by DOLD (type OA or OA 5643 5644) and certified by TÜV Rheinland.

AD SR0 - AD SR0A

SAFETY RELAY MODULES FOR DEVICES WITH INTEGRATED FEEDBACK INPUT FOR EDM

TECHNICAL FEATURES

Safety relay outputs	AD SR0 2 NO + 1 NC - 2 A 250 VAC Each NO safety output line is interrupted twice by the two relays
	AD SR0A 2 NO - 2 A 250 VAC
Response time (ms)	≤ 20
Power supply (VDC)	24 ± 20%
Electrical connections	On terminal block
Operating temperature (°C)	0 ... +55
Protection rating	IP20 for housing IP2X for terminal block
Fastening	DIN rail fastening according to EN 50022-35 standard
Dimensions h x w x d (mm)	101 x 35 x 120

PART NUMBERS

AD SR0 and AD SR0A module includes multi-language instruction manual and CE declaration of conformity.

Ordering codes AD SR0: 1330902
AD SR0A: 1330903

Connection boxes are accessory devices designed for quick, reliable connection of Janus light grids and to ensure that major operating controls needed for operation are available in the guarded area.

- Lighted button for light curtain Start/Restart with green LED for indicating output status and weak signal
- Key selector controlling the override function
- Indicator lamp for Muting function active
- Connector for connection to the light curtain
- Dip switches for configuration of light curtain functions
- 2 Built-in safety relay with guided contacts driven and controlled by the light curtain
- Internal terminal blocks for cable connections
- Selector for connection of external Muting lamp
- Selector for internal or external relay control
- Electrical connection through cable gland
- Versions without Start/Restart and Override commands for connection with Janus J light curtain without Muting.

APPROVALS

- 2004/108/EC "Electromagnetic Compatibility (EMC)"
- 2006/95/EC "Low Voltage Directive (LVD)"
- UL (C+US) mark for USA and Canada

MUTING ARMS

JANUS SL TRX e ST TRX

ACCESSORY MUTING SENSOR ELEMENTS FOR JANUS MM

TECHNICAL FEATURES

MODELS	SL TRX	ST TRX
Ordering codes	1360695	1360696
Optoelectronics sensors	2 parallel beams	2 parallel beams
Operating range (m)	0 ... 3,5	0 ... 3,5

Note for ordering

- To form a L logic system you need:
Light curtain JANUS MM TRX + SL TRX
- To form a T logic system you need:
Light curtain JANUS MM TRX + SL TRX + ST TRX

Janus SL TRX Muting arm, with active and passive retro-reflector elements, in combination with Janus MM TRX models form a one-way access control system with L logic (only exit).

Together with Janus SL TRX and ST TRX Muting arms, Janus MM TRX models become a two-way access control system with T logic (two-way).

JANUS SL

ACCESSORY MUTING SENSOR
ELEMENTS FOR JANUS MI

/ TECHNICAL FEATURES

MODELS	SL	S2L
Ordering codes	1360060	1360061
Optoelectronics sensors	2 crossed beams	2 parallel beams
Operating range (m)	1 ... 2,5	0 ... 2

The SL series accessory Muting sensor elements (arms) can be combined with the Janus MI light curtain model, making it possible to create an "L" barrier with built-in sensors with 30, 40, 90 mm resolution and protected height from 310 to 1810 mm.

The SL and S2L models have 2 built-in sensors, pre-wired and pre-aligned, with crossed or parallel beams.

COLUMNS

FMC B / FMC BR

FLOOR SUPPORT COLUMNS FOR LIGHT CURTAINS

PART NUMBERS

Columns

Standard Models	FMC B 2	FMC B 3	FMC B 4	FMC B 1700	FMC B 2000
Ordering codes	1200610	1200611	1200612	1200618	1200616
Models with PG11 rear union for cable sheath	FMC B 2 R	FMC B 3 R	FMC B 4 R	FMC B 1700 R	FMC B 2000 R
Ordering codes	1200613	1200614	1200615	1200617	1200619
A - Height (mm)	1000	1200	1330	1670	1970
B - Overall height with FMC CB base (mm)	1055	1255	1385	1725	2025
B - Overall height with FMC CBL base (mm)	1037	1237	1367	1707	2007
For light curtains with:	2 beams	3 beams	4 beams	controlled height up to 1360 mm	controlled height up to 1660 mm

Bases for columns

Models	FMC CB	FMC CBL
Ordering codes	1200500	1200501
Description	Base for column	Base for column with reduced height
Height (mm)	55	37

Note for ordering

The column ordering codes does not include the base which must be ordered separately (CB FMC and FMC CBL models)

PG11 Cable gland
FMC BR Models

Steel base with springs for a perfect adjustment of the column vertical axis. FMC BR models for light curtains complete with PG11 rear union for light curtain cable sheath.

Columns made by aluminium extrusion poles, with adjustable angular orientation. Easy assembling and disassembling of the light curtain with easy adjustment of the first beam's height.

Steel foundation inserts included with the product.

Built-in spirit level for a correct positioning of the vertical axis.

A: column height
B: column height with base FMC CB or FMC CBL

FMC B12 / B18

SUPPORT COLUMNS

PARTS NUMBERS

Model	FMC B12	FMC B18
Ordering codes	1200502	1200505
Dimensions (mm)	60 x 30	80 x 80
Height (mm)	1200	1800
Overall height with FMC CB base (mm)	1255	1255
Overall height with FMC CBL base (mm)	1237	1237

Simplified version for 2, 3, 4 beams light grids. It permits the use with light grids with integrated Muting sensors.

Note for ordering

The column ordering codes does not include the base which must be ordered separately (CB FMC and FMC CBL models)

FMC B12

FMC B18

B - Overall height with FMC CBL base (mm)	1037	1237	1367

Note for ordering

The column ordering codes does not include the base which must be ordered separately (CB FMC and FMC CBL models)

Support columns for deflecting mirrors, designed to provide secure fastening to the floor, fast installation, and a simple and precise adjustment of the optical alignment of the system.

FMC S models with pre-assembled deflecting mirrors, allow perimeter protections of up to 4 sides.

FMC SB models with pre-installed independent adjustable deflecting mirrors for safety light grids with 2, 3 and 4 beams. For applications with multiple sides and/or with a large protected perimeter is recommended the use of this models.

Optical power reduction factor: 15% for each mirror.

Special models equipped with mirror with protective anti-fragmentation film available on request.

NOTE: for more information on how to chose mirrors, please refers to ReeR website, section "Light Curtains - Applications".

A: column height
B: column height with base FMC CB or FMC CBL

SP

DEFLECTING MIRRORS

TECHNICAL FEATURES

Material	Extruded aluminium
Mirror pre-fitted with heights (mm)	250 ... 1900
Angular orientation	Adjustable using supplied brackets
Optical power reduction factor	15% (for each mirror)
Protective anti-fragmentation film	Available on request

PART NUMBERS

Mirror Model	Ordering codes	Height H in picture (mm)	For light curtains with protected height (mm)	For light grids with:
SP 100 S	1201805	250	160	
SP 200 S	1201800	370	250	
SP 300 S	1201806	400	310	
SP 400 S	1201801	540	460	
SP 600 S	1201811	715	610	2 beams

SP 1500 S	1201808	1600	1510	
SP 1600 S	1201813	1750	1660	
SP 1800 S	1201809	1900	1810	

The SP deflecting mirrors make it possible to create perimeter protection of areas with access points on multiple sides, with a considerable reduction of costs.

This solution eliminates the need to use more than one safety light curtain. Can be used to realise perimeter protection up to 4 sides.

The following rules should be taken into consideration when using deflecting mirrors:

- Total working distance (range) given by the sum of the lengths of all sides giving access to the protected area
- Each mirror used will decrease the maximum working range between the Emitter and the Receiver by 15%
- In order to ensure compliance mirrors must be placed at the minimum safety distance on each side from the danger zone
- The use of the LAD laser alignment device is recommended for a quick and reliable alignment of the system especially when using longer range light curtains or grids

NOTE: for more information on how to choose mirrors, please refer to Reer website, section "Light Curtains - Applications".

BRACKETS

The SAV vibration dampers have been designed to avoid mechanical damage to the light curtains installed in those applications which have a high level of vibrations.

The unprotected light curtains might resent the vibrations produced by e.g. presses, weaving machines, etc.

The SFB 4J swivel brackets allow the rotation of the light curtain around its longitudinal axis, as well as the adjustment of its vertical and horizontal position.

The use of the SFB 4J swivel brackets is recommended to align those light curtains which are employed in applications having a long range or using deflecting mirrors.

SAV 1, SAV 2

VIBRATION DAMPERS

PARTS NUMBERS

Model	Ordering codes	Description	For light curtains with protected height mm / beams
SAV 1	1200084	set 4 vibrations dampers	310... 1060 / 2,3,4 beams
SAV 2	11200085	set 6 vibrations dampers	1210 ... 1810

2 set must be ordered for each light curtain.

SFB 4J

SWIVEL BRACKETS

PARTS NUMBERS

Model	Ordering codes	Description
SFB 4J	1360068	set of 4 swivel brackets

One set must be ordered for each pair of light curtain (emitter + receiver)

The LAD 3 laser alignment device makes it possible to obtain a fast and reliable optical alignment of the ReeR safety light curtains; they are also compatible with the use of the FMC floor mounting columns.

The LAD 3 devices emit a laser beam with visible red light with useful range up to 100 m.

Their use is recommended for aligning light curtains that operate over long distances or multiple sides with the use of deflecting mirrors.

PART NUMBERS

Each LAD model includes multi-language instruction manual.

Ordering code LAD 3: 1220302

The test rod is an opaque cylinder used after the installation of a safety light curtain to check that no beams are bypassed due to the presence of reflecting surfaces.

The test is carried out by slowly moving the test rod (\emptyset = Resolution) in the centre and then along each side of the protected area. During this procedure the Green led on the Receiver must always remain in the off state.

LAD 3

LASER ALIGNEMENT DEVICE

TECHNICAL FEATURES

Light source	Laser diode – wavelength 650 nm
Class light source	II – EN 60825-1
Range m	100
Beam divergence (mrd)	< 0,5
Max. power (mW)	1
Power supply (VDC)	3 (2 AAA batteries)
Fastening	Quick fastening to the light curtains
Dimensions h x w x d (mm)	70 x 78 x 70

TR

More than 50 years of quality and innovation

Founded in Turin (Italy) in 1959, ReeR distinguished itself for its strong commitment to innovation and technology.

A steady growth throughout the years allowed ReeR to become a point of reference in the safety automation industry at a worldwide level.

The Safety Division is in fact today a world leader in the development and manufacturing of safety optoelectronic sensors and controllers.

ReeR is ISO 9001, ISO 14001 and BS OHSAS 18001 certified.
