MAGNUS RFID

The best in cost-effectiveness

- Wear-free technology allows for longer life time
- Status LED and diagnostic output
- Smallest design of RFID safety sensors
- Full mechanical compatibility with Magnus MG S and MG B
- Can be used as a stand-alone

The best in safety

- Tampering protection in accordance with DIN EN 14119, the highest in its class
- Screw covers prevent easy removal
- Series connection up to PL e / SIL 3

The best in versatility

- Dual mounting options
- M12 connector or cable
- IP67 and IP6K9K protection grade for use in harsh environments
- Complies with the strict hygiene and cleaning requirements of the food and packaging industry
- 3 different coding levels
- Extension cables for series connection

Operating temperature:
-25 ... +70 °C

-25 ... +70 °C

IP67

High protection classes IP67 and IP6K9K for use in harsh environments.

IP6K9K

Resistant to aggressive media, e.g. cleaning agents used in the food industry.

Vibration resistance:
10...55 Hz, amplitude 1 mm.

OVERVIEW

The application of Magnus RFID sensors can be extremely wide thanks to the compact and versatile design.

The different design and technology options and the complete mechanical compatibility with Magnus MG series make this product extremely valuable for users.

The RFID technology enables Magnus RFID sensors to be individually coded in three different ways to allow the appropriate tampering protection in all applications. The highest configurations allow each sensor to be paired with one only assigned actuator.

The RFID technology used allows to reach safety levels up to PL e / SIL 3 also when connecting the sensors in series.

As a result, Magnus RFID sensors can be simply integrated in existing safety scenarios, offering a cost-effective solution for modifying and upgrading machines.

Multiple options of actuation technology

- **Individual coding**
The actuator is programmed via teach-in and permanently assigned to the sensor during set-up (the process can be repeated if necessary)
- **Unique coding**
The actuator is permanently assigned to the sensor during manufacturing (it cannot be replaced with another actuator)
- **Actuator coded**
The actuator is free and not specifically assigned to the sensor (one actuator can work with multiple sensors)

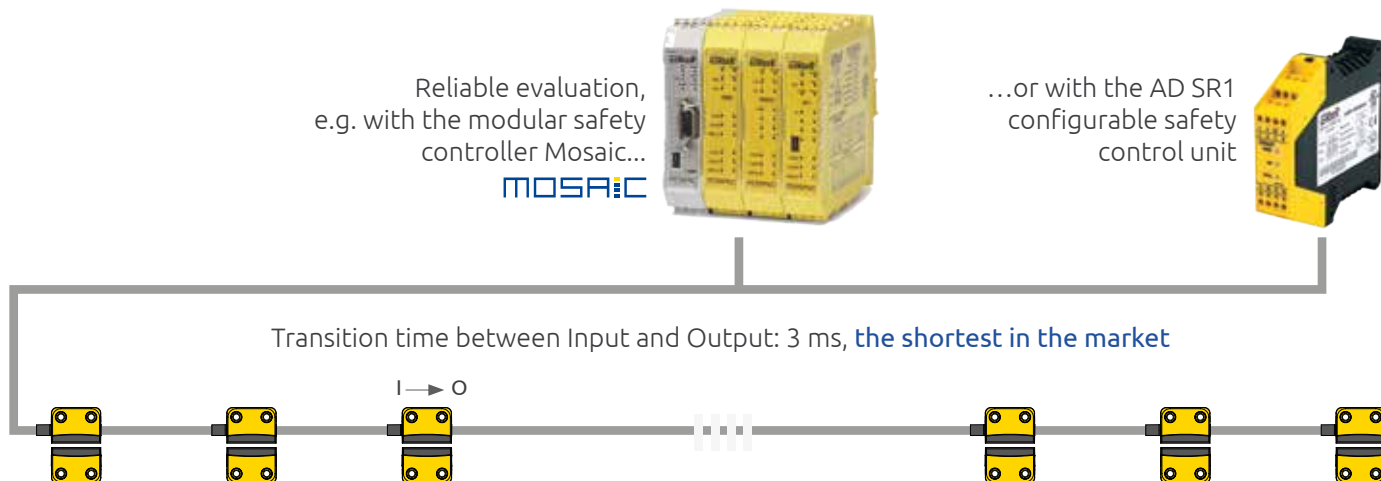

Ideal also in the most demanding applications

Unique mechanical characteristics allow protection against cleaning agents and washdown processes, a typical requirement of the food industry.

The Pharo Safety Laser Scanner is an optoelectronic protection device for accident prevention. Pharo is suitable for the protection of personnel exposed to risks deriving from both machines and systems with dangerous organs as well as from possible collisions with automatic guided vehicles (AGVs).

With the Pharo Safety Laser Scanner it is possible to create programmable protected horizontal or vertical areas of variable shape suitable to all applications without the need to use a separate reflector or receiver.

The device does not require an external control unit because all the safety functions are built-in.

The Pharo Safety Laser Scanner features a Configuration Memory Module built into the removable connector, which stores the data related to the protected zones programmed and to the operating parameters set.

This module enables the user to replace a faulty sensor with a new device without the need for reconfiguration and therefore maintaining the pre-existing configuration, without the possibility of errors or tampering.

The stored data can only be modified by authorised personnel.

Each sensor can create 2 independently programmable controlled zones:

- 2 safety zones with maximum radius of 4 metres
- 2 warning zones with maximum radius of 20 metres

MAIN FEATURES

Model	PHR 332
Protective (safety) fields	2 programmable
Warning zones	2 programmable
Scanning area	190° / 4 m radius
Programming by means	- graphic user interface - teach-in - data transfer from file (from PC or from another laser scanner).
Resolution	Configurable from 30 mm to 150 mm from hand detection to access control
Configuration Memory Module	Yes for easy re-installation
Configuration	Software via RS 232 serial port
Diagnostic	Detailed self-diagnosis via display and remote serial output
Start/restart interlock	Built-in start/restart interlock, selectable
EDM	Feedback input for control of external relays (EDM)

Operating temperature: -10 ... +50 °C

-10 ... +50 °C

ACCESSORIES

The following accessories are available for Pharo, to be ordered separately:

Model	Code	Description
PHR C3L5	1350061	30 poles connector pre-wired with 13-wire cable 5 m long Built-in Configuration Memory Module
PHR CSL2	1350070	Cable for serial connection between Pharo sensor and PC for configuring M8 4-pole / subD 9-pole connector, length 2 m
PHR B3	1350050	fixed attachment bracket
PHR B4	1350051	adjustable attachment bracket
PHR B5	1350052	floor mounting bracket

WARNING!

For the main connection of the Pharo laser scanner, it is necessary to provide a 13-wire cable with 0.56 mm² cross-section. This cable is supplied with the PHR C3L5 main connector.

To use the PHR B4 adjustable bracket it is also necessary to order the PHR B3 fixed bracket.

To use the PHR B5 floor mounting bracket it is also necessary to order the PHR B3 fixed bracket and the PHR B4 adjustable bracket.

Ilion is a Type 2 safety photocell with M18 cylindrical metal body.

The photocells must be connected to control unit for example: AU SX or AU SXM control unit with Muting to form a protection system that can be composed of 1, 2, 3 or 4 single beam photocells or Mosaic.

In case of connection with Mosaic safety controller, the number of photocells depends to the configuration of the protection system (for details on the interface see AU SX, AU SXM and Mosaic control units).

The compact size of the photocells makes it possible to fit the protection system into very small spaces, while the possibility to use more photocells provides the maximum flexibility in positioning the protective beams.

All connections through M12 5-pole connectors. Unshielded cables up to 50 meter long (between sensor and control unit).

Ulisse is a Type 2 safety photocell with metal body and M8 3-pole connector.

The photocells must be connected to control unit for example: standard AU SX or AU SXM control unit with Muting or Mosaic to form a protection system that can be composed of 1, 2, 3 or 4 single beam photocells.

In case of connection with Mosaic safety controller, the number of photocells depends to the configuration of the protection system (for details on the interface see AU SX, AU SXM and Mosaic control units).

Thanks to the very small size, the anodised aluminium case and the glass lenses free from electrostatic dust attraction, Ulisse is the ideal solution for the protection of weaving machines as well as of other applications characterised by high levels of mechanical stress or very restricted spaces.

SIL 3

SIL3 - SILCL 3
PL e - Cat. 4

Safety Sin/Cos incremental encoder, together with Mosaic, comprise a SIL 3 certified safety function for speed monitoring. Available in two models: Shaft or Hollow shaft versions.

APPLICATION EXAMPLE

Any applications requiring speed monitoring of a rotating axis. See the application example on page 34. Features a robust and reliable interface and the ability to handle high mechanical loads.

TECHNICAL FEATURES

Shaft type	Hollow shaft version Ø 12 mm Shaft version Ø 10 mm with flat
Fastening	Safety-Lock™ Allow high rotational speed and high shaft load capacity
Protection rate	Housing and flange side IP67, shaft IP65 (optional IP67)
Immunity to interference	Shock and vibration resistant Insensitive to strong magnetic fields
Resolution	2048 pulse rate
Power supply	SC3 24D2048R - 24 VDC SC3 05D2048R - 5 VDC SC3 24B2048R - 24 VDC SC3 05B2048R - 5 VDC
Connector	Radial M12

CABLES NEEDED

M12 8-pole shielded. See page 36

NOTE: cable supplied with M12 8-pole connector at one end only. The other side must be cut off at correct length and crimped with RJ45 connector (not included).

Safelock is a safety switch utilised in the protection of personnel when opening doors leading to dangerous areas. It acts by monitoring and interrupting the safety circuit during dangerous scenarios.

The solenoid locks and unlocks access to the dangerous area, guaranteeing safety until the danger has stopped. Available models

SLK-M

Retention mechanism actuated by a spring and unlocked by ON current. Guard locking by spring force, release by applying voltage to the guard locking solenoid.

SLK-E

Retention mechanism actuated by ON current and unlocked by spring. Guard locking by applying voltage to the guard locking solenoid, release by spring force.

- Actuating head made of plastic or metal
- Auxiliary release on the front. Used for releasing the guard locking with the aid of a tool. To protect against tampering, the auxiliary release is sealed with sealing lacquer
- Approach direction: horizontal and vertical. Can be adjusted in 90° steps
- Any installation position

Operating temperature: -20 ... +55 °C

-20 ... + 55 °C

IP67 protection rating

TECHNICAL FEATURES

Housing material	Reinforced thermoplastic
Contact material	Silver alloy, gold flashed
Switching principle	Slow-action switching contact
Number of door position positively driven contacts	2
Number of guard lock monitoring positively driven contacts	1
Approach speed	Max. 20 m/min
Actuation frequency	1200 1/h
Guard locking principle	Closed-circuit current principle
Force	Locking force (Fmax): ≥1 kN (plastic), ≥2 kN (metal)
	Locking force (FZh): 1,5 kN 0,7 kN (plastic), 1,5 kN (metal)
	Retention force: 20 N
	Extraction force: 30 N Actuating force: 35 N
Solenoid operating voltage	AC/DC 24 V -15% ... +10%
Short circuit protection	4 A
Switching voltage	12 V Min at 10 mA
Switching current	1 mA Min at 24 V
Power consumption	6 W

DIMENSIONS

INTERFACES

Control unit for safety photocells Ilion and Ulisse, which can be combined to form a Type 2 safety system.

Up to 4 photocells may be connected.

With guided-contact safety relays.

Start/Restart interlock.

EDM Feedback input for external contactors monitoring.

Self test every 5 seconds.

AU SX

TYPE 2 CONTROL UNIT FOR ILION AND ULISSE PHOTOCELLS

TECHNICAL FEATURES

Safety relay outputs	2 NO - 2 A 250 VAC
Status output	PNP - 100 mA at 24 VDC
Response time (ms)	≤ 30
Start/Restart command according to IEC 61496-1	Manual or automatic Start/Restart selectable on terminal block
Signalling	LED indication of input/output status and diagnosis
Power supply (VDC)	24 ± 20%
Electrical connections	On terminal block
Operating temperature (°C)	0 ... 55
Protection rating	IP20 for housing IP2X for terminal block
Fastening	DIN rail fastening according to EN 50022-35 standard
Dimensions h x w x d (mm)	99 x 22,5 x 114

PART NUMBERS

AU SX module includes multi-language instruction manual and CE declaration of conformity.

AU SXM control unit, with integrated Muting functions, for safety photocells Ilion and Ulisse, which can be combined to form a Type 2 safety system.

Up to 4 photocells may be connected.

2-sensor Muting logics.

With guided-contact safety relays.

Muting time-out selectable.

Start/Restart interlock.

EDM Feedback input for extra external contactors monitoring.

Self test every 5 seconds.

More than 50 years of quality and innovation

Founded in Turin (Italy) in 1959, ReeR distinguished itself for its strong commitment to innovation and technology.

A steady growth throughout the years allowed ReeR to become a point of reference in the safety automation industry at a worldwide level.

The Safety Division is in fact today a world leader in the development and manufacturing of safety optoelectronic sensors and controllers.

ReeR is ISO 9001, ISO 14001 and BS OHSAS 18001 certified.
